

Analytics Advisory and Consulting Offering Toolkit

UPDATED: NOVEMBER 2025

YOUR 1-PAGE SUMMARY

Analytics Advisory and Consulting

WHAT IT IS

Analytics Advisory and Consulting helps organizations shift from gut-feeling decisions to data-backed strategy. Many business leaders struggle with critical questions: "Is the work working?" and "What's the real impact of my strategy?" These challenges often stem from limited capacity, time, and discipline that reduce strategic plans to disconnected tactical tasks with no clear link to goals or measurable value. Our team of strategic consultants brings deep expertise in measurement, data, and analytics to answer these questions and drive intentional growth through proven outcomes.

GTM HUB PAGE

This [link](#) has all the content to support the offering: training, engagement models, case studies, thought leadership, Merkle reports, etc.

KEY BUSINESS OUTCOMES

- Accelerated Decision-Making
- Data-Driven Strategy Plans
- Optimized Analytics Investment and ROI
- Improved Cross-Functional Alignment
- Enhanced Business Impact from Analytics

WEDGES

Measurement Strategy Consulting
* Includes Roadmaps, KPI Framework, Measurement Maturity

Starting at \$90k USD

Analytics Readiness and Org Design

Starting at \$90k USD

PART 4: Training

INTERNAL

PART 1: POV and Narrative

These slides include content that supports the offering narrative. It includes problem space definition, predictions or expectations on how the market will develop, supporting market research, the opportunity space, and our unique POV or approach to solving the problem.

These slides are ready for client or prospect presentation.

THE CHALLENGE

Many organizations lack the capacity, time, and discipline to connect their tactical execution to **strategic goals**

Despite advances in data
and analytics capabilities,
leaders struggle to extract
actionable clarity

Questions abound...

How Do We
Beat **Last Year's
Numbers?**

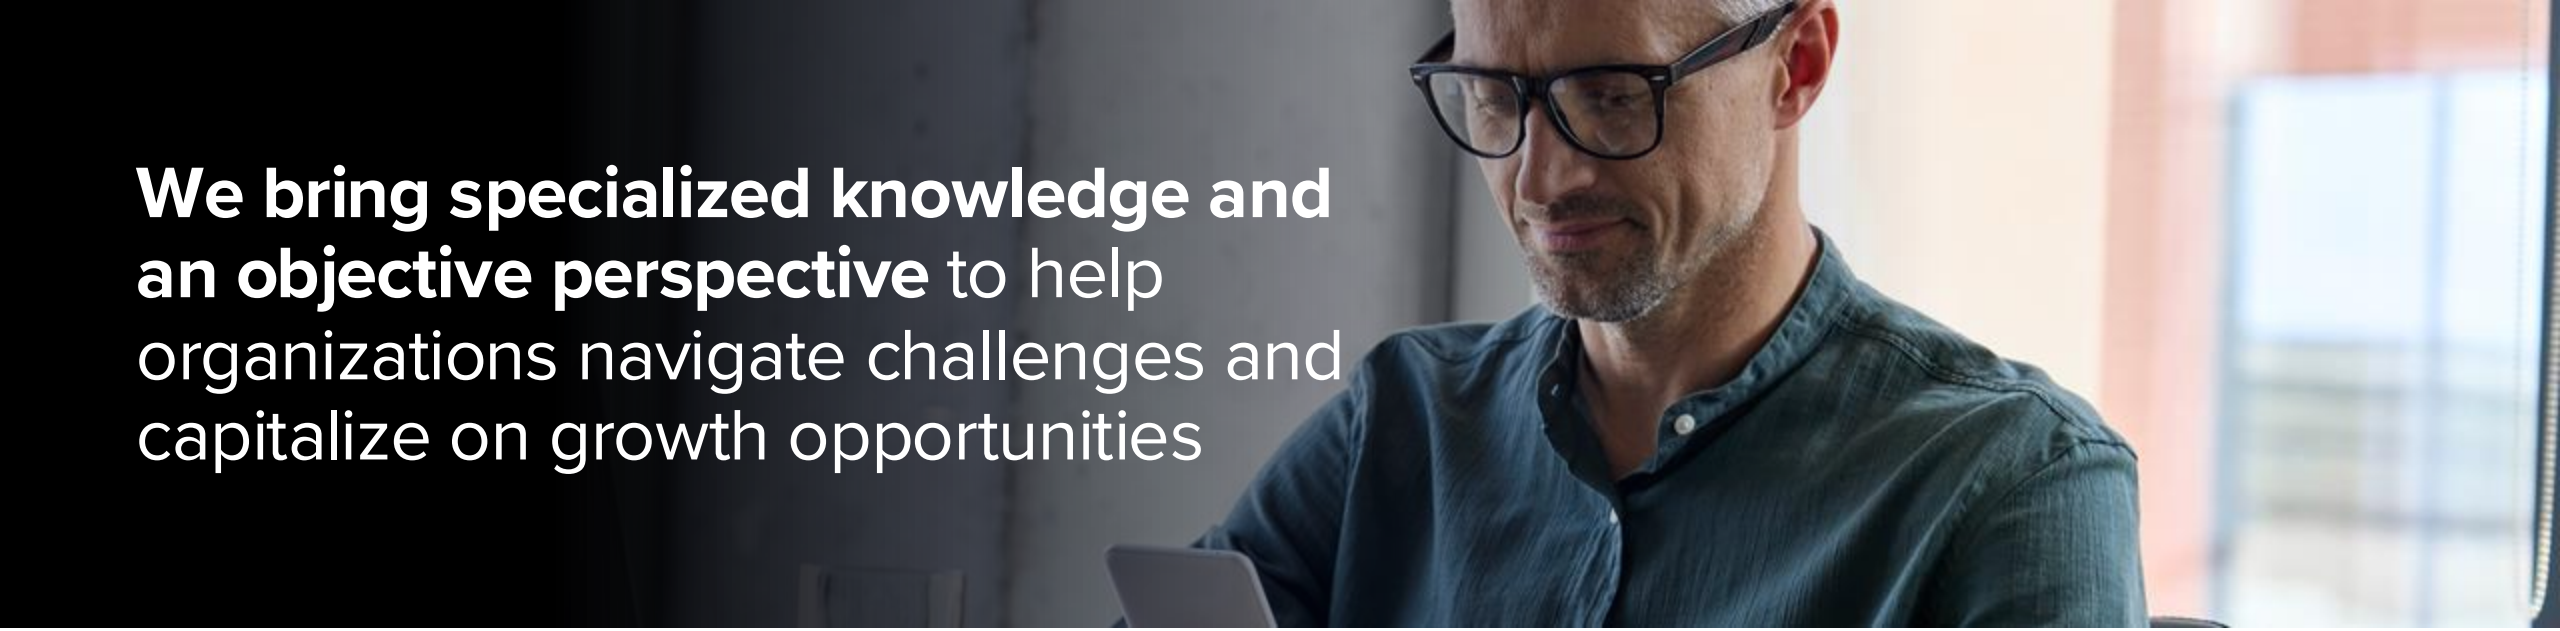

Will Our Privacy
Team **Shut Down
Our Data Collection?**

Are We Moving
Fast Enough **To
Understand AI?**

Do we have the right
**people and process
to drive results?**

How do we know
**our strategy is
working?**

How Do We
Explain This **To
Leadership?**

We bring specialized knowledge and an objective perspective to help organizations navigate challenges and capitalize on growth opportunities

Data Privacy

Build a durable, privacy-conscious foundation for continued marketing success by identifying the necessary technology infrastructure and processes to navigate privacy challenges.

Data Strategy

Ensure data is actionable and insightful through well-defined use cases and recommendations supporting the utilization of organization owned data.

Analytics Assessments

With a focus on ‘in-sourcing’ analytics, organizations need to understand what is needed to establish and grow their analytics organization to meet the goals of the business.

Analytics and Measurement

Empower organizations with actionable insights that drive informed decision-making, optimize business performance, support strategic planning, enhance operational efficiency, and foster innovation.

AI Readiness and Enablement

Enable organizations to understand which aspects of their AI investments are truly moving the needle on customer experience and revenue.

Expanded Menu of Advisory Opportunities

01 Data Privacy Consulting

- Privacy Assessment and Roadmap
- Data Clean Room Strategy
- Digital Data Operations
- Activation and Measurement
- Privacy Practice Enablement

02 Data Strategy Consulting

- BI and Reporting Use Case Development
- Data Use Cases
- Data Monetization
- Data Audit and Assessment
- Taxonomy and Data Orchestration Assessment

03 Analytic Assessments

- Analytic Readiness Assessment
- Measurement Maturity Assessment
- Analytics and Measurement Org Assessment
- Digital Analytics Tools Utilization Assessment

04 Analytics and Measurement Consulting

- Measurement Strategy
- Account Based Experience Measurement
- Measurement and Analytics Roadmap
- Test and Learn Advisory
- Strategic and Long-Range Planning

05 AI Strategy Consulting

- AI Readiness Assessment
- AI Technology Assessment
- AI Analytics Planning
- Newton AI Advisory Plan

PART 2:

Case Studies and Why Merkle

This content provides reasons to believe that we are uniquely qualified to solve the client challenge presented in the preceding narrative.

Case studies should only be presented under NDA. If no NDA exists, the case studies should be blinded.

These slides are ready for client or prospect presentation.

Why Merkle for **Analytics Advisory and Consulting**?

At Merkle, we don't just understand data—we know how to transform it into bottom-line results. Your challenges deserve more than off-the-shelf solutions.

Merkle's Analytics Advisory and Consulting team brings real-world experience from every corner of the business landscape—Fortune 10 enterprises, emerging brands, and everything in between.

We speak both languages: advanced analytics and practical business sense. Our consultants assess where you are today, then build clear roadmaps to get you where you need to be tomorrow, ensuring your team can drive results. We cut through the noise, matching sophisticated analytics with your organization's reality.

From foundational data needs to cutting-edge solutions, we provide the strategic clarity and hands-on expertise that turns insights into revenue.

15+

Dedicated Consultants and Advisors focused on driving excellence

200+

Years of analytics and data experience both in business and agency

300+

SMEs to partner with across every discipline and vertical to ensure each client's solution not only meets their needs but is best in class

A Merkle Customer Analytics Partnership

BUSINESS CHALLENGE

Become a data-driven organization leveraging data and technology to create a comprehensive customer experience. Advance customer insights and measures of success beyond simple “gallons and dollars” to know our customer and grow our relationship with them. Develop an in-house center of analytics and customer data excellence staffed by trusted business advisors

MERKLE SOLUTION

With the focus of the brand’s vision to drive data-driven customer experiences and coupled with the objective of creating a center of analytics excellence Merkle had a three phased approach

Manage And Execute

0-18 Months

- Foundational reporting
- Customer profiling and insights
- Analytics and KPI Framework
- SOW, LTV model development
- Standardized campaign analysis

Lead And Train

19-36 Months

- Customer Measurement Framework
- Analytic and Measurement Strategy Workshops
- Direct Channel Attribution
- Affinity Score (RGPA)
- DIY Segmentation

Coach And Partner

36+ Months

- Thought partnership and guidance on connect insights to business action
- Tool enhancement and solutioning for ongoing business needs
- Resource and skills assessment for team restructure
- Measurement and Business application advancement

14+

Analytic Solutions Developed to Solve Customer Experience Needs

8:1

Estimated ROI based on Incremental Impact of Insights, Campaign, Reporting, Analytic Solutioning and Consulting

100+

Insights, Recommendations, Analysis and Reports

“Thank you for all your wise advice. You help give me better perspective and grow as a leader every time!”

GLOBAL PAINT SUPPLIER

Measurement Strategy Drives Thoughtful Change

BUSINESS CHALLENGE

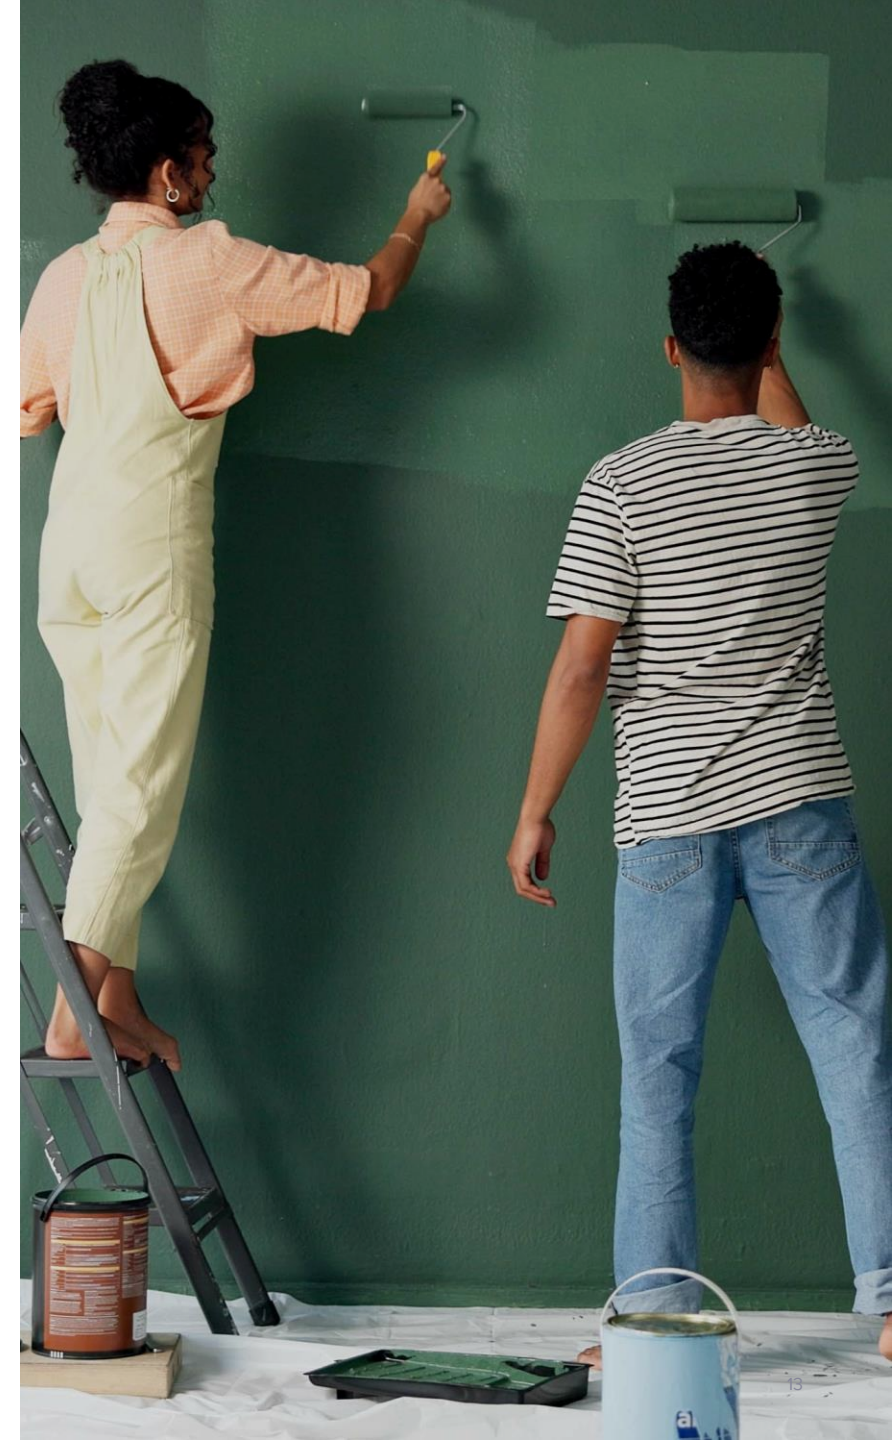

After launching a comprehensive customer marketing database, supporting both B2B and B2C, a global paint supplier needed a method to assess total contribution of marketing and cross-functional collaboration in measurement.

MERKLE SOLUTION

Utilizing Merkle's approach to measurement evaluation, a comprehensive multi-phased measurement strategy was developed identifying the building blocks needed to transform the organization into a data-driven enterprise.

RESULTS

In year one, the organization enabled the key data sets required to implement universal KPIs, fast-tracked business health dashboards, streamlined campaign reporting and analysis and initiated advanced efforts to deploy fractional attribution as well as leveraging KPIs to inform audience optimization. In year two, measurement continued to evolve. the organization leveraged the tools, approach and recommendations (e.g. test and learn, measurement RACI, etc.) developed in the measurement framework as a blueprint for data enabled growth.

MAJOR TIRE MANUFACTURER

Building a 1P data infrastructure foundation that is flexible to changing ecosystems

BUSINESS CHALLENGE

Major tire manufacturer foresaw the organizational changes needed to adapt to privacy regulation changes, and the challenges they would experience in leveraging first-party for audience activation

MERKLE SOLUTION

Merkle developed a focused marketing strategy and audience action plan that outlined how to evolve the clients identity infrastructure and leverage first-party data for media measurement through structured testing

10+

Closed loop tests designed and deployed to demonstrate audience incrementality

200+

1P audiences syndicated for activation

\$4M+

Delivered in incremental revenue

First-party data strategy to drive cookieless activation and measurement

BUSINESS CHALLENGE

Adapting to provincial privacy regulations and browser / OS restrictions, the client sought out a strategy on how best to leverage first-party data for activation and measurement.

MERKLE SOLUTION

Merkle developed a focused marketing strategy and action plan that outlined how to evolve the client's first-party data infrastructure, fill gaps in reporting, and support media measurement using observable signals

65%

Decrease in observable traffic within Quebec province

50 → 8

Prioritized high value digital actions predictive of offline sales were identified to streamline media optimization

Transforming to a durable, privacy-forward DTC data strategy for measurement and activation insights

BUSINESS CHALLENGE

Privacy requirements were significantly reducing data availability for digital marketing analytics and activation use cases for a global biotechnology company. The organization required a strategy to identify incremental capabilities and technologies that would allow them to adhere to consumer data privacy protection requirements while delivering against aggressive data-driven marketing analytics and media optimization objectives.

MERKLE SOLUTION

Merkle served as an advisory partner to help the company craft a targeted multi-year marketing technology roadmap and operational plan. The co-created business case and strategy enabled the organization to build new first-party data infrastructure and capabilities that bridge gaps in marketing data and enhance media measurement and targeting without compromising privacy.

3 capabilities

Net new privacy-preserving capabilities to empower effective marketing strategy in 2025+

50% recovery

Of previously lost data signals for marketing measurement and media optimization

\$30M saved

In media budget that would have otherwise been lost due to measurement blind spots

A large member organization seeks to transform their business with GenAI

BUSINESS CHALLENGE

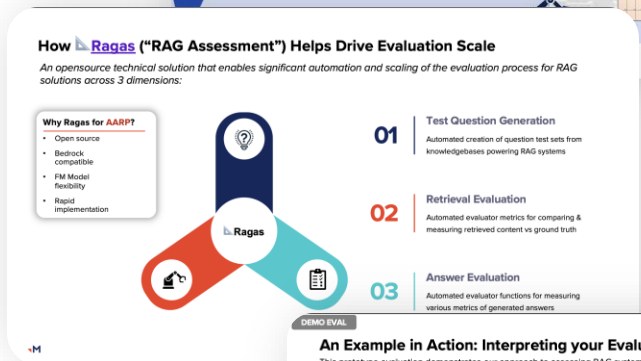

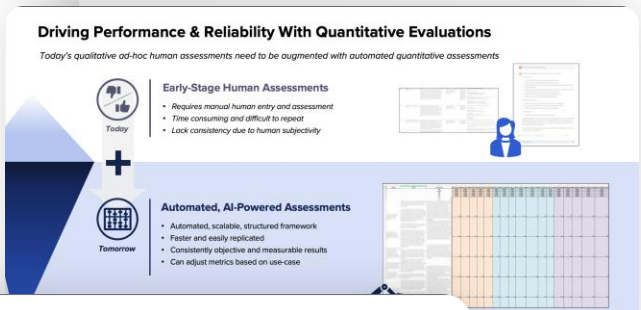

The client, a large membership organization, sought to leverage generative AI to transform their business operations. They partnered with Merkle to improve their nascent RAG system into one that can serve a variety of internal and external use cases while maintaining strict adherence to brand standards.

MERKLE SOLUTION

We began the engagement by establishing an evaluation framework to assess system performance across key areas. This framework allowed us to establish baseline performance metrics. Based on this evaluation, the Merkle team provided over 20 targeted recommendations to enhance system performance. The team subsequently followed with a set of best practices for continuous improvement, addressing short-,medium-,and long-term evaluation and observability considerations.

RESULTS

- Our evaluation framework covered a variety of key performance areas and included the assessment of various supporting tools and packages
- Recommendations included strategies for both tactical/immediate improvements and long-term system optimization
- Continuous improvement practices were tailored to client's specific needs and operational goals, aligning with their rollout plans

DEMO EVAL

An Example in Action: Interpreting your Evaluation Scores

This prototype evaluation demonstrates our approach to assessing RAG system performance using a small sample set. While the limited sample size constrains definitive conclusions, it provides valuable insights into evaluation process and potential areas for system performance.

	Metrics	Context Relevancy	Content Recall	Faithfulness	Answer Relevancy	RESULTS	INTERPRETATION	POTENTIAL ACTIONS
EVALUATION OF RAG PERFORMANCE	9th	0.1636	0.1222	0.0905	0.1676	Context relevancy is significantly lower than the other RAG evaluation metrics	Retrieval process may be bringing in irrelevant info or LLM not capturing nuances	Refine retrieval algorithm to improve context selection precision or better classify/organize knowledgebase
	median	0.1181	1.0000	0.9445	0.9024			
	25th	0.0685	0.9888	0.7888	0.7537			
	75th	0.3030	1.0000	1.0000	0.9632			
TEXT GENERATION QUALITY	9th	0.9378	0.9889	0.9889	0.9094	Both text generation quality metrics indicate room for improvement	Generated text lacks accuracy and fluency compared to references	Adjust generation parameters or improve prompt engineering, or fine-tune model on high-quality data (long-term)
	median	0.3482	0.2792	0.2699				
	25th	0.2682	0.2689	0.2689				
	75th	0.4054	0.4253	0.4253				
SEMANTIC UNDERSTANDING & LOGICAL CONSISTENCY	9th	0.9315	0.9315	0.9315	0.9315	Semantic similarity score is high while entailment score is low	Stylistically the agent's response is very different from the expected response	Prompt engineering and structured reasoning steps or implement logic checks like having an option longer-term
	median	0.9344	0.9344	0.9344	0.9344			
	25th	0.9302	0.9302	0.9302	0.9302			
	75th	0.9365	0.9365	0.9365	0.9365			
SEMANTIC UNDERSTANDING & LOGICAL CONSISTENCY	9th	0.9344	0.9344	0.9344	0.9344	Semantic similarity score is high while entailment score is low	Stylistically the agent's response is very different from the expected response	Prompt engineering and structured reasoning steps or implement logic checks like having an option longer-term
	median	0.9344	0.9344	0.9344	0.9344			
	25th	0.9302	0.9302	0.9302	0.9302			
	75th	0.9365	0.9365	0.9365	0.9365			

Designing an Analytics COE for Corporate Communications

BUSINESS CHALLENGE

The Enterprise Communications team lacked structure around measurement. Leadership wanted to understand the effectiveness of brand and communication efforts and to be driven by data rather than intuition. The team sought Merkle's expertise in Analytics and Measurement to help scope and design Analytics COE within the Corporate Communications team as well assess the overall readiness of the organization for a data driven strategy.

MERKLE SOLUTION

Merkle interviewed 17 stakeholders over 3 months, uncovering 4 key gaps in Corporate Comms measurement. Recommendation: adopt a systematic approach to build analytics maturity across Corporate Affairs and Enterprise Communications. Merkle developed a revised scaled organizational design to be rolled out over a three-year time horizon inclusive of process approach to begin with a targeted team of Measurement Consultants to establish tools, data needs and end to end measurement for the Corporate Communication team. The solution was launched enabling two key communication goals to be measured by the end of the first year.

RESULTS

Identified 3 Functional Areas for Reorganization

Enabling measurement and insights to be generated in the short-term by consultant support to be migrated to internal team over three years.

Established a Centralized Analytics Data Layer

Unifying the source data for owned, earned and paid campaigns was the foundation for data democratization and harmonized insights across multi-pronged efforts

Advised on Analytics and Strategy Team Formation

Supported resourcing for analytics staff as well as developed the foundational strategic plans tied to measurement

Designing an Analytics COE Loyalty

BUSINESS CHALLENGE

A global athletic apparel retailer had a centralized database but did not have the tools, team or analytical expertise to translate the data into action.

MERKLE SOLUTION

Merkle partnered with the retailer to develop a multi-pronged approach to drive data democratization and insights to action beginning with a consultative method to determine priority needs based on business impact.

Leveraging a methodical strategy for BI and measurement, Merkle partnered with the retailer on three parallel tracks: implementing an always-on suite of dashboards, generating data-driven insights through quick-turn analytical projects, and providing ongoing strategic consulting to advance forecasting methods and establish a holistic learning agenda supporting loyalty and CRM.

RESULTS

\$104M

Opportunity Identified

In first 90 days of relationship through deep dive in Loyalty Data

60 days

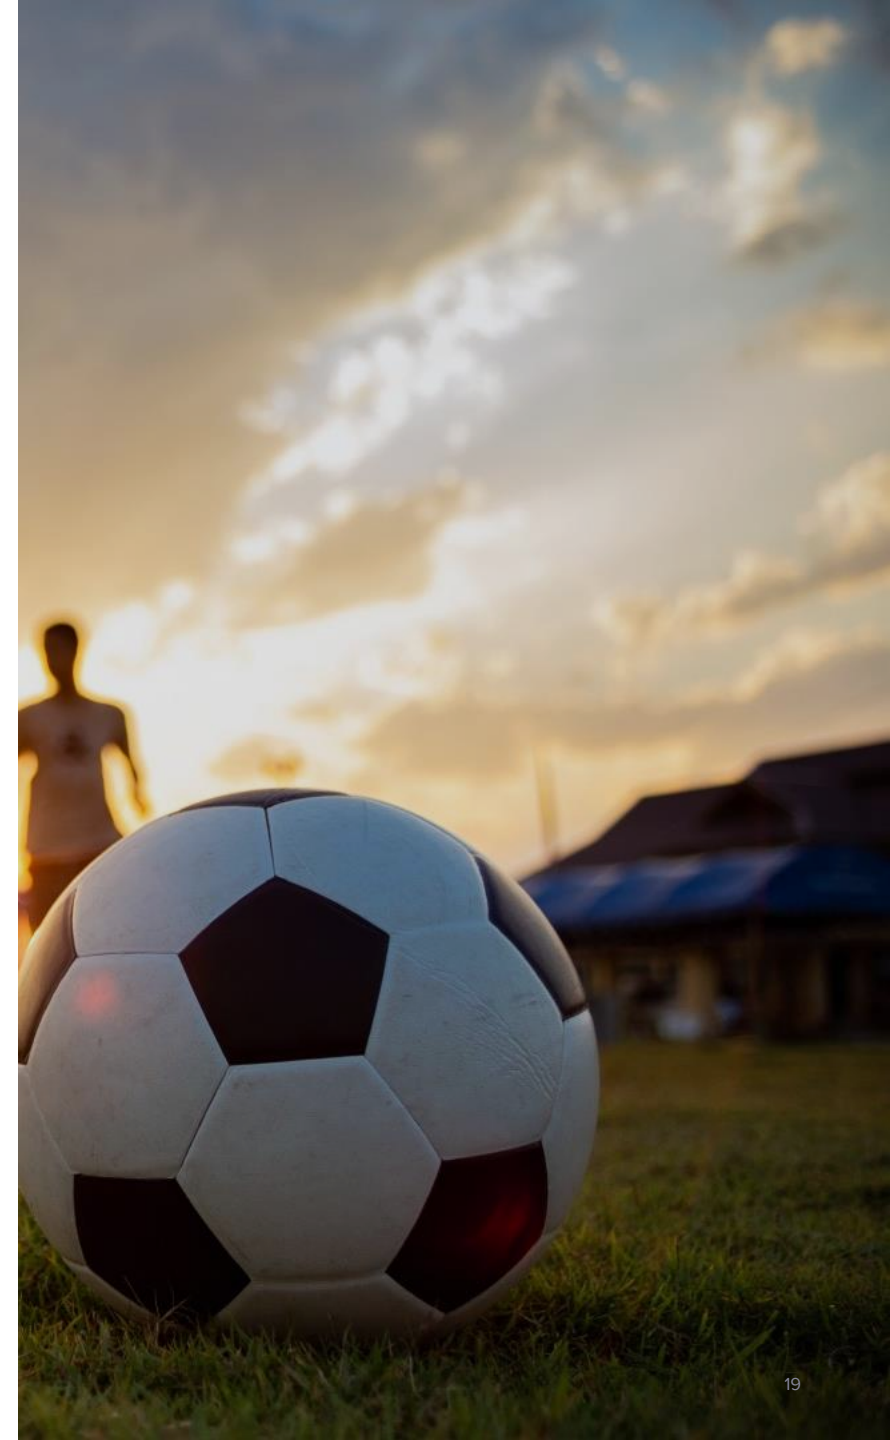

to First Dashboard

Initial dashboard available to clients – enabling data democratization

4 Dashboards

in 6 Months

Provided visibility into loyalty program health and performance trends, enabling tracking against goals and historical performance

PART 3:

Wedges and Engagements

This content outlines the various packages you can sell within this offering. The wedges, or door openers, are priced to help get the first sale. The engagements fit various needs related to the offering. Put one or a few in front of your client, based on their needs.

These slides are ready for client or prospect presentation.

Privacy-first enablement

01 Privacy-first Assessment and Roadmap

02 Data Operation Readiness

03 Activation and Measurement Readiness

04 Privacy Practice Enablement

Key Business Questions

- Have you identified the privacy legislations that will have an impact on how your organization is collecting, storing and using data for activation and measurement use cases?
- Do we have clarity on what the impacts of privacy restrictions are having on marketing technology and organizational processes?

- Do we have clarity around what data is being captured and shared within marketing tags and pixels?
- How aligned are existing data collection policies with what is being captured today?
- How are governance processes expected to evolve to ensure that we have the consent to leverage the data sets for media activation?

- How will our KPIs and benchmarks need to change?
- Does our existing data strategy and infrastructure facilitate data collaboration for activation and measurement?
- How are we to evolve activation strategies to accommodate consent, third-party cookie deprecation and first-party data usage?

- What organizational processes should be put in place to support legal/privacy working with other teams?
- Is our privacy team enabled to make informed legal decisions on martech and adtech data use cases?
- What processes should be put in place to support compliance documentation across state and international legislation?

AI Strategy Consulting

Define the path to differentiated AI maturity and value

With AI's rapid advancement and adoption, organizations are struggling to keep up with the evolving AI technology landscape. Merkle can help you find opportunities to extract value from AI.

ENGAGEMENT INCLUDES

- Overview and education of the current AI landscape and its potential impact on business
- Discovery and analysis of generative AI's opportunity areas for the organization including tech and data + people and process.
- Collaborative definition of short and longer-term use cases to prioritize for generative AI value realization
- Co-created strategic roadmap for generative AI data, technology, and solutions for near-term quick wins and longer-term innovation

EXAMPLE DELIVERABLES

AI Strategy Consulting Outcomes

Organizations implementing AI are seeing transformative benefits in accelerating revenue growth, boosting productivity and driving more efficient content creations.

Merkle will empower your team to identify the transformations required to drive value from AI.

CLIENT VALUE REALIZED

-  Training and empowering teams to leverage AI effectively, leading to innovative solutions and improved performance across the organization
-  Identify high-impact opportunities, optimizing resource allocation and where use cases can drive significant revenue growth
-  Align tech stacks with use cases, ensuring the right tools to support current and future needs, enhancing scalability and adaptability.
-  Build trust with customers and avoid costly compliance issues, enhancing your brand reputation and customer loyalty, and protect your business from legal challenges and fostering a responsible AI culture

Leveraging Merkle's AI Adoption Framework helps organization focus on what actions are needed for transformational growth

Merkle's AI framework enables organizations to reimagine decision making and value creation, not merely accelerating existing processes

Merkle | Cardinal Path services: strategy, readiness, execution, and scale

	AI USE CASE WORKSHOP	ROADMAP FOR SPEED TO VALUE	POC EXECUTION	WAYS OF WORKING
	Exploring	Planning	Building	Scaling
Readiness	Ideal for organizations who need help ideating and exploring how AI can transform their organization	Ideal for organizations who need help prioritizing where to start	Ideal for organizations who have defined use cases and are ready to test AI solutions	Ideal for clients who have begun experimenting and are ready to roll out AI solutions to the enterprise but haven't implemented the organizational shifts required for success
Purpose	- Discovery workshop designed to surface applicable use cases - Workshop deliverables include use case mapping, data readiness assessment, and high-level action plans	- Clear roadmap with executive buy-in - Aligned stakeholder priorities - Investment-ready business case	- Deliver a contained POC designed to evaluate capability value quickly, use case delivery insights, and strategic planning - Decision outcomes to inform additional testing, planning, or accelerated rollout	- Identify areas where change management is required for program success - Develop operational models to integrate processes - Platform integration, launch, and technical implementation services supported

Merkle | Cardinal Path services: strategy, readiness, execution, and scale

	AI USE CASE WORKSHOP	ROADMAP FOR SPEED TO VALUE	POC EXECUTION	WAYS OF WORKING
	Exploring	Planning	Building	Scaling
Objectives	- Discovery workshop to surface use cases and preliminary AI engagement plans - Establish buy-in on POC or capability deployment approach	- Transform recommendations into a high-level POC plan based on business impact, logical sequencing, business pacing, and complexity - Create specific, actionable initiatives to achieve the desired business outcomes	- Identify priority use cases and design a POC approach with defined success criteria - Implement, configure, and customize workflows - Advise on best practices and support client teams	- Create specific, actionable plan to implement successful POC across the enterprise - Ensure organizational readiness with people, process workflow, and operational model plan
Deliverables	- Workshop summary deliverables and walking deck - Use case prioritization mapping - POC through capability deployment recommendations	- Use case prioritization mapping - Identification of high value proofs of concept 30/60/90-day value realization playbook	- Strategic objectives defined - Use case creation and prioritization - Implementation design - Managed service support - Speed to value readout and next step recommendations	- Operational frameworks defined - Governance framework and compliance controls - Training and upskilling recommendations - Operational monitoring and support procedures - Program management, readout and next step recommendations
Effort and Investment	Low	Low	Moderate	Moderate to High

AI Use Case Workshop

Define a clear, actionable roadmap that transforms your business challenges into prioritized, high-impact AI and analytics opportunities ready for execution

Facilitator-Led Workshop

Accelerate alignment, foster focused collaboration, and ensure actionable outcomes by guiding participants through a structured, objective-driven process tailored to organizational goals.

Document AI Vision and Objectives

Align AI initiatives with clear business goals. Articulate a compelling vision and set specific, measurable objectives.

Use Case Identification and Prioritization

Map AI opportunities across the value chain to identify impactful use cases and then prioritize them by value, feasibility, data readiness, ROI, risk, and strategic alignment to select high-value candidates and a proof of concept.

PARTNERSHIPS

Roadmap For Speed To Value

Unlock a clear, actionable AI action plan that empowers your organization to deliver measurable business transformation

Build vs. Buy Decision Framework

Confidently choose the optimal solution - build, buy, or hybrid - by systematically applying decision criteria to technical readiness, rigorously evaluating vendors against proof-of-concept requirements, and objectively assessing internal versus external development capacity.

Action Plan

Empower your organization to achieve scalable AI impact with a targeted action plan that sequences high-value use cases and documents technical and organizational requirements to successfully drive value from a POC.

Business Case

Quantified value proposition demonstrating potential ROI and competitive advantages

POC Execution

See your AI idea in action with a working prototype, clear performance metrics, and an executive-ready walkthrough

AI Prototype

Rapidly demonstrate business value and technical feasibility by developing an AI prototype that brings high-priority use cases to life, accelerates stakeholder alignment, and lays the foundation for scalable enterprise adoption.

Value Realization Playbook

Accelerate measurable business impact and stakeholder confidence with a value realization playbook that delivers quick wins, drives adoption through iterative improvements, and establishes a clear path to scale supported by defined success metrics, proactive communication, and robust risk management at every stage.

Communication Plan

Drive awareness, understanding, and buy-in for AI adoption with a tailored communication plan and editorial calendar that delivers the right messages to each stakeholder group at every key milestone and change phase.

Unlocking Value: AI-Powered Marketing Use Cases

EXAMPLE USE CASES

AI-Powered Predictive Analytics and Customer Lifetime Value (CLV)

Build predictive models to forecast customer lifetime value, churn probability, and next-best-action recommendations using machine learning.

Generative AI for Content Creation and Personalization

Leverage generative AI to create personalized marketing content, product descriptions, and customer communications across multiple channels.

Marketing Mix Modeling and Attribution

Implement advanced marketing mix modeling to understand media effectiveness and optimize marketing spend.

Conversational AI and Customer Service Automation

Deploy intelligent chatbots and virtual assistants to handle customer inquiries, provide product recommendations, and escalate complex issues to human agents.

Real-Time Recommendation Engines

Build sophisticated recommendation systems that understand customer preferences, context, and behavior patterns in real-time.

Ways of Working

Empower times to embrace
AI-powered ways of working
for lasting business impact

Operating Model

Unlock sustained AI-driven business value with a prioritized action plan and operating model recommendations that streamline future-state processes, clarify roles and responsibilities, and embed agile, data-driven ways of working across your organization.

Governance Framework

Safeguard responsible AI adoption and maximize business value with a comprehensive governance framework that defines clear policies, roles, processes, and controls—ensuring every AI application is used ethically, compliantly, and effectively across your organization.

Measurement Requires Consistency

The organizational value of data and insights is based in an aligned approach to measurement

Consistency in method removes question and debate over:

Incrementality

Opportunity

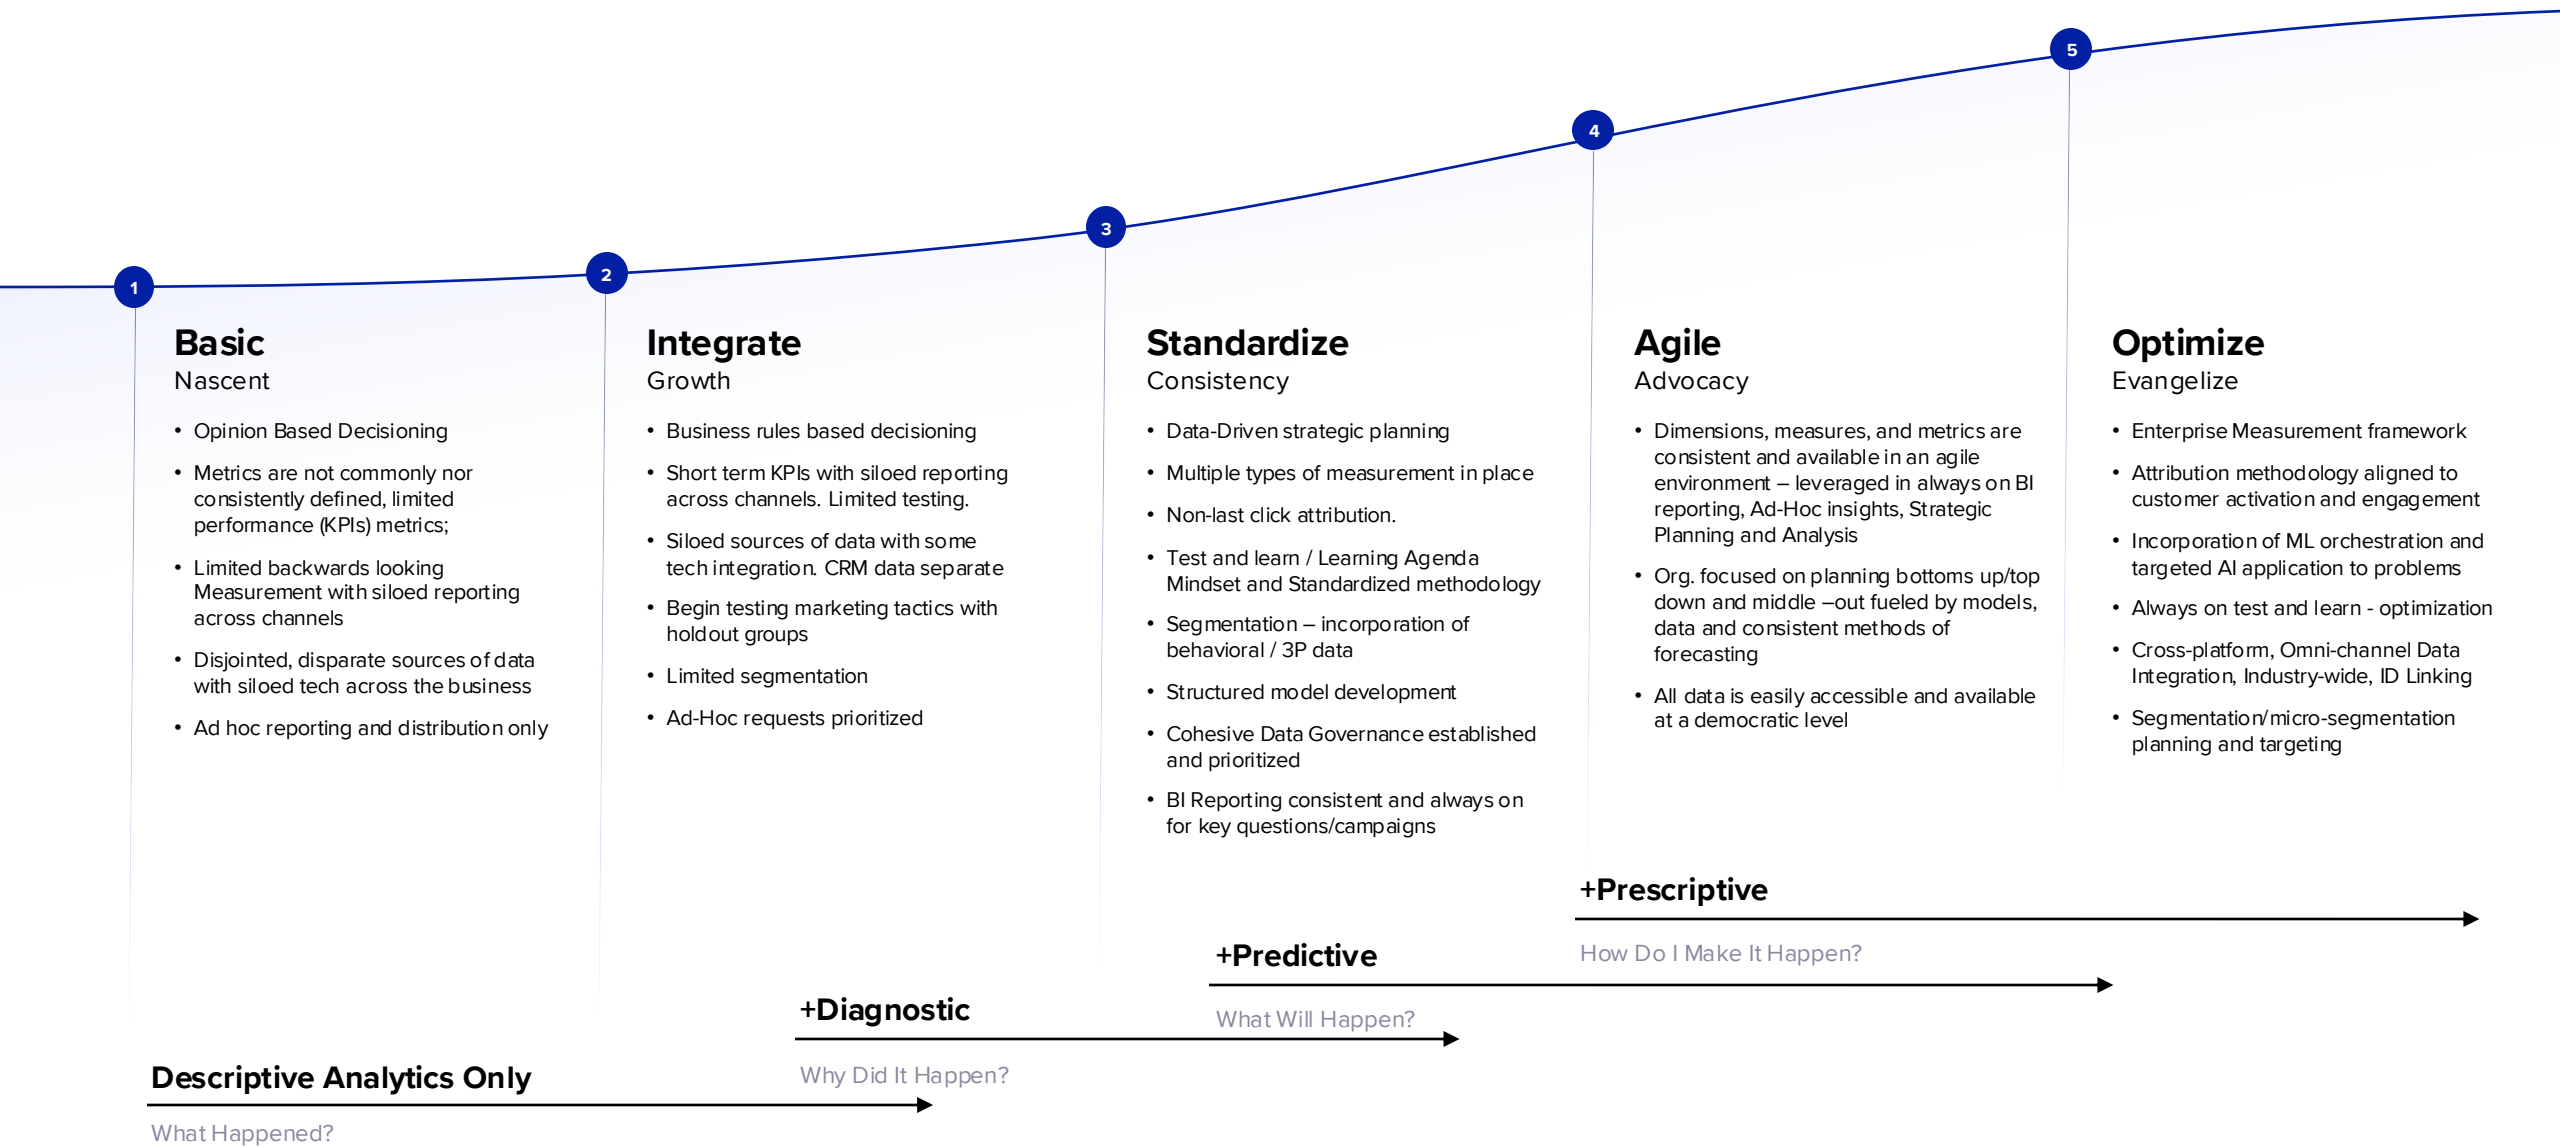

Risk

Business Value

A consistent methodology allows for the **comparison of relatively unlike measures** to drive richer insights

Measurement Maturity begins with Understanding...

MATURITY

Strategic measurement begins with goal alignment and vision for enabling holistic measurement

DISCOVERY

- Discovery drives the foundation of measurement goals for each brand
- Inputs: Data Sources, Historic Measurement Artifacts, Interviews with Key Stakeholders
- **Goal alignment and identification of gaps to goal achievement**

DEVELOPMENT

- Holistic KPI Framework focuses on key measures, dimensions and types of measurement
- Solutions for gaps to measurement and/or learning
- Measurement process designed by brand –with aligned connects, tools and measurement plans
- **Measurement Roadmap fueling a staged approach to enable holistic measurement strategy**

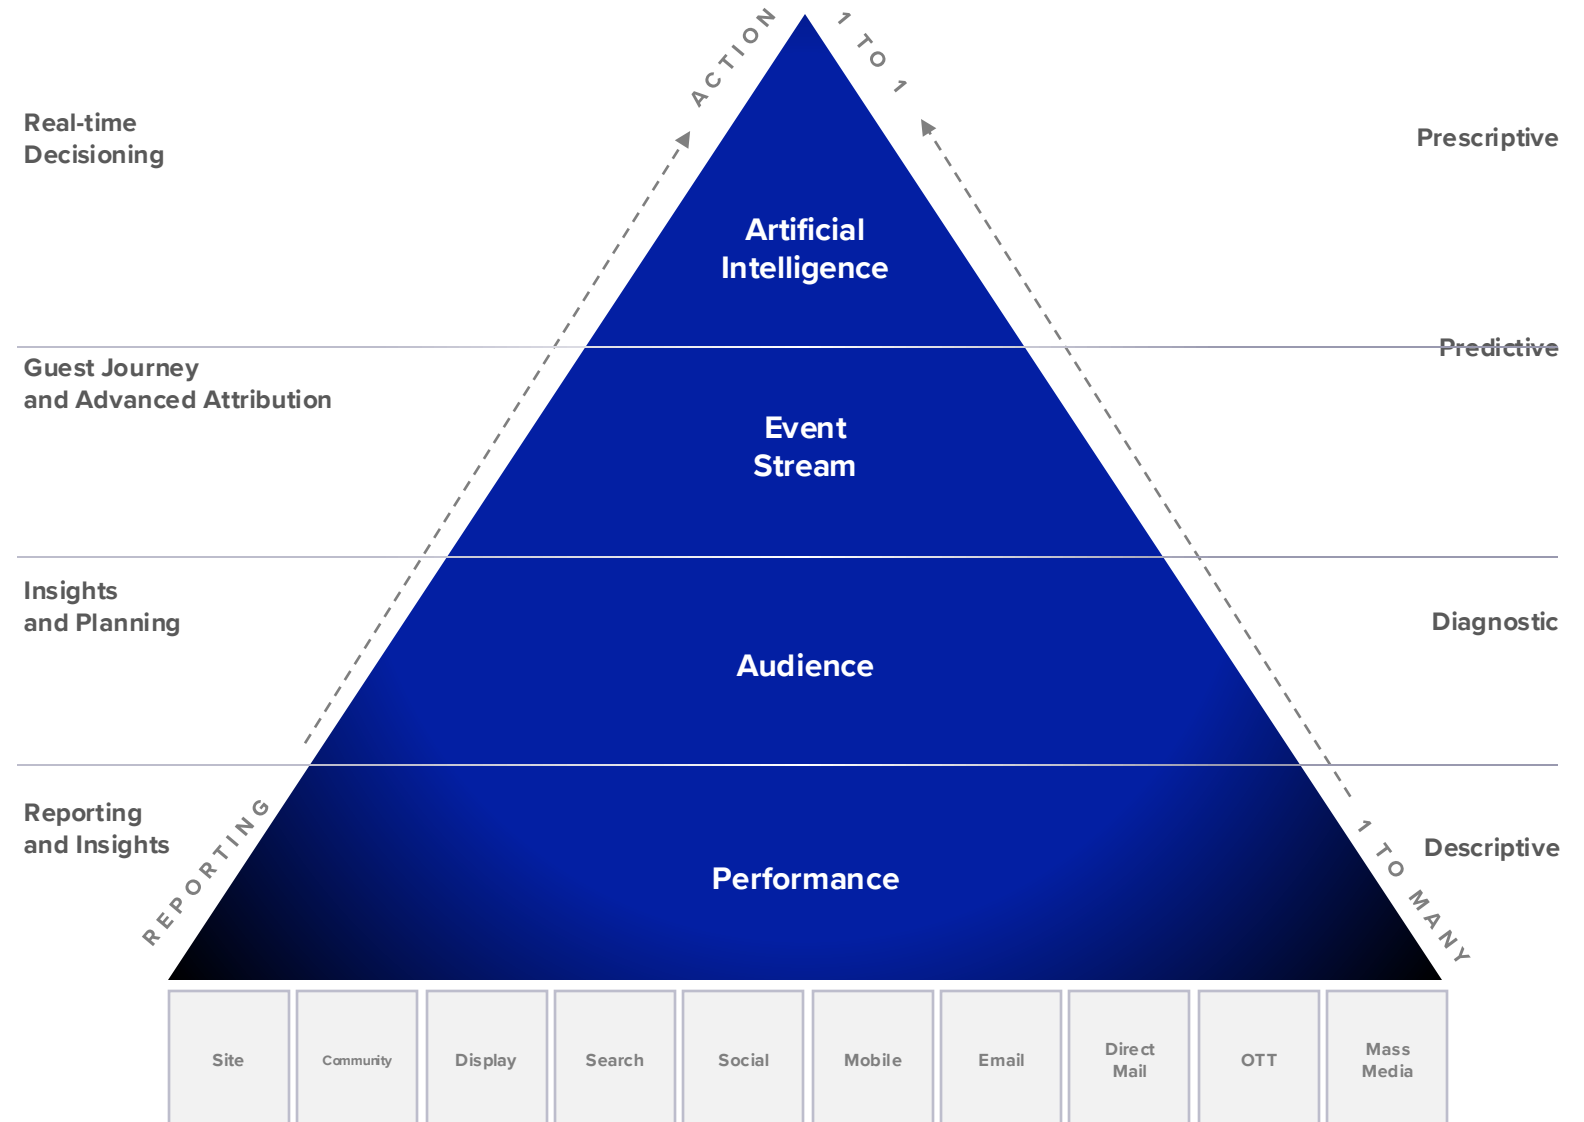

ENABLEMENT

- Learning Agenda developed with prioritized tests

Merkle's analytics philosophy and practice is grounded and fueled by strategic measurement to drive advanced analytics

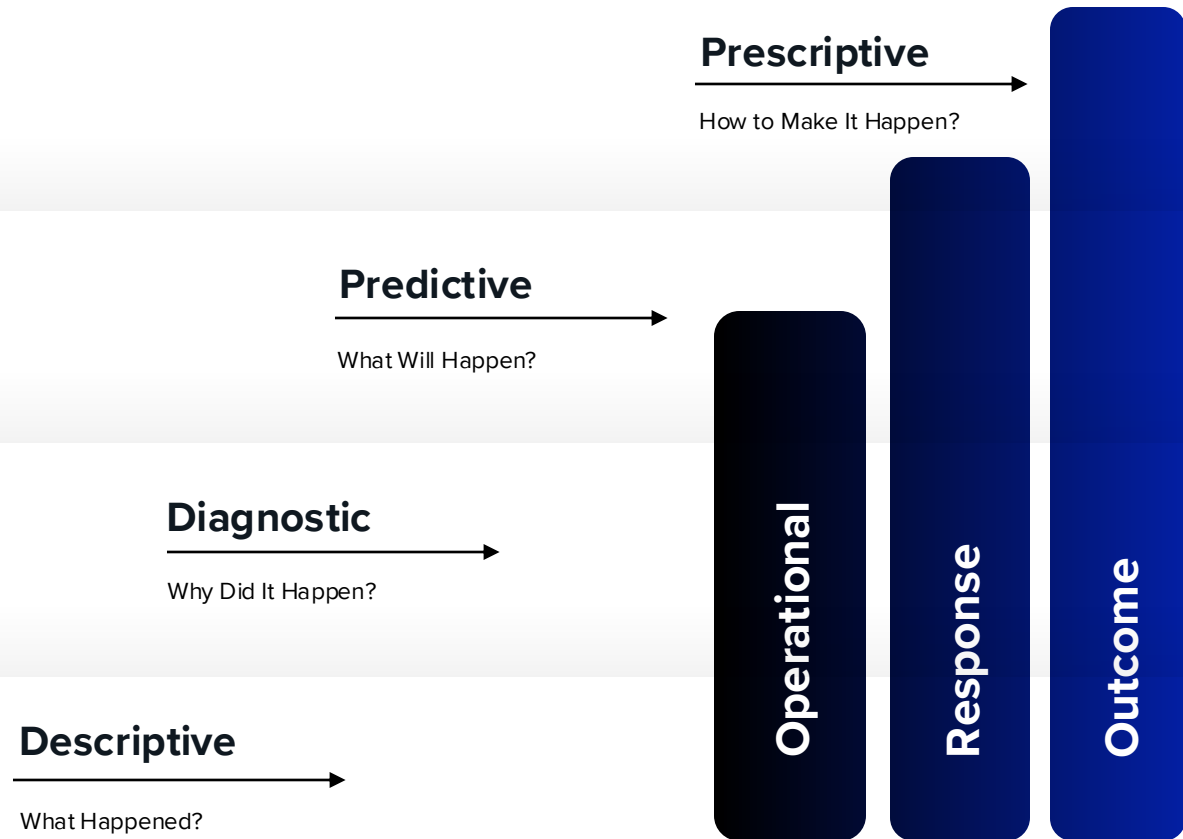

Measurement and insights build on top of each other, but the [foundation must be accurate](#) to ensure precision to inform strategic plans and quick-turn opportunities.

Beginning with “[WHAT](#)” to the “[WHY](#)” of business outcomes sets the foundation to drive the “[HOW AND WHEN](#)”

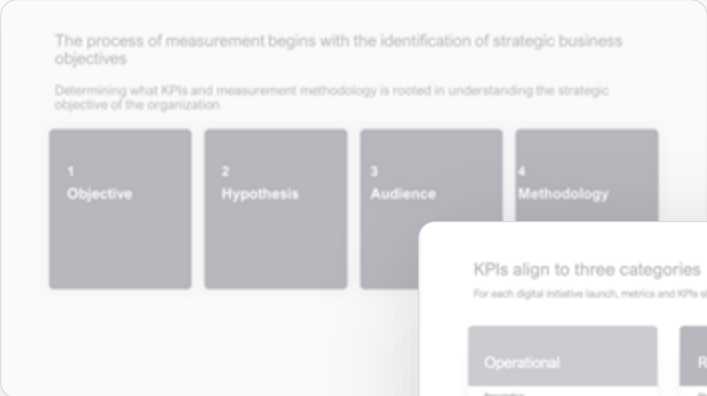

KPIs drive different decisions at different points of the measurement process

Determining at the outset what questions are to be answered at each of the measurement points (e.g. operational reporting, test analysis, model EDA, etc.) will influence the KPI selection and narrow the focus of measures and enablers to be leveraged based on the targeted action intended.

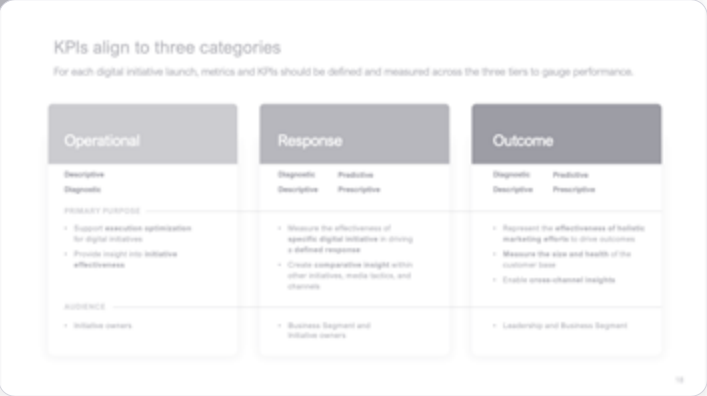

The KPI Framework is a set of three practical tools to support all stages of measurement, enabling a data driven organization

KPI MEASUREMENT ALIGNMENT PROCESS

Serves as a process to define which KPIs will be needed to support measuring progress towards business goals and objectives

KPI DETERMINATION FRAMEWORK

Guide to support determining which metrics should be prioritized as KPIs

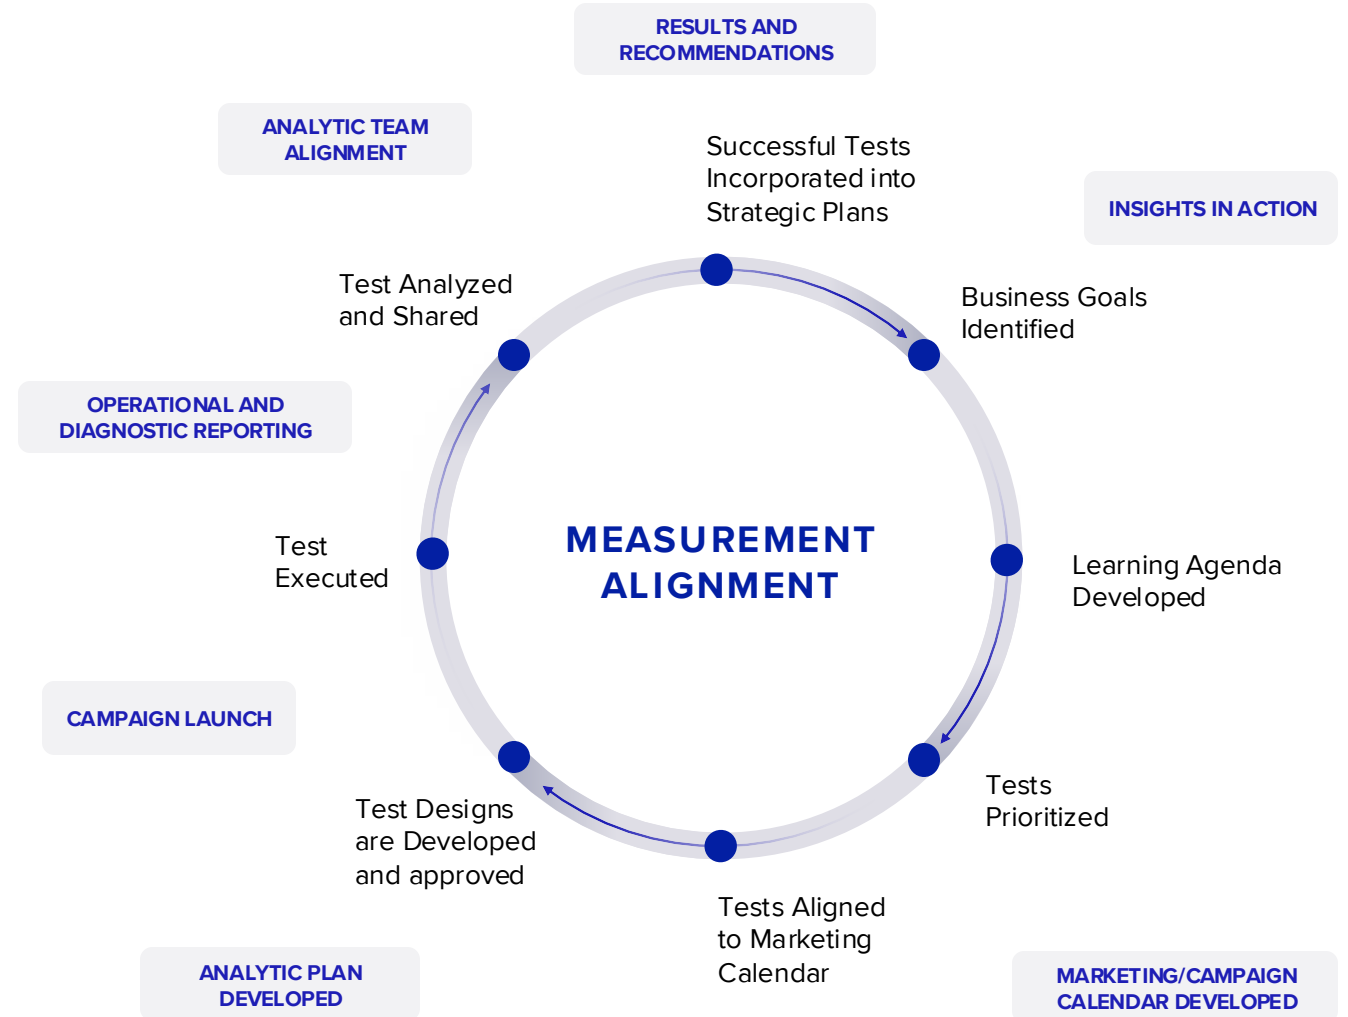

Measurement & KPIs	Strategic Objective	Strategic Initiative	Strategic Metric	Strategic KPI	Strategic Definition	Strategic Definition	Strategic Definition
Website Conversion	Strategic Objective	Strategic Initiative	Website Conversion	Website Conversion	Website Conversion	Website Conversion	Website Conversion
Engagement	Strategic Objective	Strategic Initiative	Engagement	Engagement	Engagement	Engagement	Engagement
Retention	Strategic Objective	Strategic Initiative	Retention	Retention	Retention	Retention	Retention

Data Strategy Consulting

Harnessing the Value of Data

Capitalizing on the vast, often disparate data within an organization, Data Strategy Consulting is a guide to ensuring data is actionable and insightful through well-defined use cases and recommendations supporting the utilization of organization owned data.

ENGAGEMENT INCLUDES

- Gap assessment of current state of data compared to future data utilization strategy
- 💡 Up to 10 Use Cases for Data Utilization / Analytic Utilization / Monetization of Data / Harmonization / Prioritized Reporting
- 👤 Data Use Case Story Inventory + Recommendation Catalog to prioritize and scope use case implementation
- 📊 High level project map of data utilization: providing guidance on increasing measurement sophistication, RACI to drive data usage, practice advancement, etc.

EXAMPLE DELIVERABLES

Determining How to Harness the Value of Data

Develop actionable Use Cases that identify the utilization of data to drive desired outcomes

Understanding Details

WEEKS 0-1

REVIEW

Gain a grounding of what's been done

Access to data, analytic platforms, reporting needs and current state

Discovery

WEEKS 1-3

COLLABORATE

Conduct a series of key **stakeholder interviews** to determine prioritization and current use cases, as well current state data utilization and education level

Create

WEEKS 4-8

DEVELOP

Leverage interviews, along with artifacts and discovery to **develop themes to drive use cases for data utilization and application** to advance **the business**

Vision to Action

WEEKS 8-10

PRIORITIZE

Out of the development – top **use cases would be prioritized** to develop project and action plans to support a **go forward data utilization roadmap**

IDENTIFICATION OF DATA VALUE

Discovery

Use Case Creation

Data Utilization Use Case Development

Identify the prioritized use cases and data use themes to enable the utilization of data

Approach	Deliverables	Value
• Evaluate current state artifacts, tools and methodologies • Collaborate with key business and analytics partners to determine pain points • Develop a broad section of use cases for data utilization • Prioritize and plan out use case needs for enablement	• Up to 10 data and/or analytic use cases • Identification of estimated impact by use case • High level project plans for use cases to determine prioritization and LOE	• Use cases leveraged to fuel Data-Led insights and both internal and external action • Prioritization for a data utilization roadmap

Use Cases support a larger story

Data & Insights Persona Use Case 4

USE CASE BUSINESS OUTCOME
Efficiently deliver product level reporting to drive site level action

USE CASES EXPLAIN HOW AND USERS ARE INTERACTING WITH DATA. THEY ENSURE THAT OUR GOALS REMAIN CUSTOMER-ORIENTED AND FOCUSED.

Weekly Business Review
Taylor reviews destination business health reporting tool as a destination level to understand performance across the business. Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business.

Diagnostics for Cause
Taylor investigates a destination site that fell in the benchmark and wanted to understand the reasons behind it. Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business.

Prescriptive Action
Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business. Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business.

Because Use Cases are customer focused, they are aligned to one part of the business or one team's responsibility. This makes it necessary to develop User Stories that can reframe the Customer's journey from the E2E perspective to make it actionable.

Data Use Case (DUC) Story

Understanding what the opportunity for data is at the core of the development process. Within each use case a data utilization story is compiled

Use Case – DT4

DESCRIPTION
User wants to diagnose how to improve collecting business at a localized level

GOAL
To efficiently provide manageable data to a streamlined and time sensitive manner to make operational decisions

USE CASE STORY
Taylor wants to diagnose how to improve collecting business at a localized level. Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business.

DIAGNOSTICS FOR CAUSE
Taylor investigates a destination site that fell in the benchmark and wanted to understand the reasons behind it. Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business.

PREScriptive ACTION
Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business. Taylor uses the tool to identify areas for improvement and to track and optimize performance across the business.

Because Use Cases are customer focused, they are aligned to one part of the business or one team's responsibility. This makes it necessary to develop User Stories that can reframe the Customer's journey from the E2E perspective to make it actionable.

Data Use Case Wireframe

The DUC is supported by a wireframe including action, technical and process needs to bring each part of the data use case to life

User Story Inventory

Use Case 1 (DT-4)

ID	USER STORY	Recommendation	USE CASES
1	As a marketer, I want to capture the individual's STUFF login ID, the unique STUFF device ID, the SW Account ID, and the UPID, so that I can build an identity graph.	ID Graph	DT4-1
2	As a marketer, I want to track and capture a user's in-game STUFF activities and related media data, mapped to an identity signal in the ID graph, so that I can better understand my customers, analyze their behavior, and deliver relevant experiences.	Event Stream	DT4-1 DT4-4
3	As a marketer, I want to integrate browsing data and assign identifiers to it so that it's available for alignment to a user.	Event Stream	DT4-1
4	As a marketer, I want to capture a user's web browsing activities on SW owned websites, mapped to an identity signal in the ID graph, to understand how these activities affect their purchasing behavior.	ID Graph	DT4-2
5	As a marketer, when a user sets up their BRAVIA TV, I want to capture their Google ID, TV Device ID, SW Account and UPID, so that I can build an identity graph.	Consent	DT4-2
6	As a marketer, for a known user, data from all sources and channels should reconcile to the SW Account ID both in batch and real-time exercises so there can be one view of the customer across all sources.	ID Graph	DT4-2
7	As a marketer, when a customer logs in to the STUFF Direct Store, I want to capture a customer's PSN ID, the device ID, the SW Account ID and UPID, so that I can link a user across STUFF and their preferred shopping/browsing device.	ID Graph	DT4-3
8	As a marketer, when a customer accepts cookies to a site I want to bring in that data to begin building out the activity across sessions.	Event Stream	DT4-3
9	As a marketer, I want to track and capture users' ecommerce transactions and associated meta data such as product details, transaction amount, etc. so that I can build a more complete user profile.	Event Stream	DT4-3

DUC Story Inventory

The DUC is then vetted through the user and data applications to determine what additional data utilizations ladder into the DUC

From Use Cases to Recommendations

Use Cases informed the development and prioritization of recommendations. Recommendations have been optimized to align to as many use cases as possible. See the below table to cross reference use cases against recommendations.

USE CASES	RECOMMENDATIONS															
	SW Account ID	UPID	TV Device ID	Google ID	STUFF Device ID	STUFF Account ID	STUFF PSN ID	STUFF UPID	STUFF Device ID	STUFF Account ID	STUFF PSN ID	STUFF UPID	STUFF Device ID	STUFF Account ID	STUFF PSN ID	STUFF UPID

UC-9	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X
UC-10	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X

DUC + Recommendation Catalogue

All DUC's are catalogued against the recommendations for themed solutions, technology, and standardizations proposed through data theme prioritization assessment

EXAMPLE

Persona Use Case 4

USE CASE BUSINESS OUTCOME

Efficiently support a local body shop with the optimal suite of tools

Taylor is a divisional manager for a group of collision auto body shops who is trying to improve his inventory management while also adapting to the varied color needs of his growing clientele. He is currently using Collision Core Color but is unfamiliar with the other

USER EXPERIENCE

1

Weekly Reorders

Taylor reviews standardized weekly inventory reporting and realizes they are once again running short compared to their book of work, so he places a rush order.

NBA

With the 2nd 'rush order' delivery Taylor places, a NBA to trial **Collision Core Inventory** is triggered

ACTIVATION

An email is triggered to Taylor offering a free trial of **Collision Core Inventory**

NBA is surfaced as a free trial offer for Collision Core Inventory while he is doing research

2

Research

Taylor logs-in to Collision Core Color to do research on the color formula of a specific repair that week.

With the research for a specific color, a NBA to trial **Collision Core Pronto** is triggered

Within the Collision Core Color App a CTA with a NBA connecting Taylor to **Collision Core Pronto PDP**

3

Prescriptive Action

Taylor signs up to have Collision Core Inventory as an added service

With the sign-up of Collision Core Inventory, a NBA for **Collision Core Pronto demo** is offered with an online sign-up

Use Cases explain how end users are interacting with data. They ensure that our goals remain user-oriented and focused.

Because **Use Cases** are user focused, they're not siloed to one part of the business or one team's responsibility. This makes it necessary to develop **User Stories** that can reframe the User's journey from the NBA and product path

EXAMPLE

Use Case – DT4

DESCRIPTION

Driving greater awareness of the benefits of the suite of Collision Core tools

GOAL

Efficiently support a local body shop with the optimal suite of tools

EXPERIENCE PLANNING

USE CASE STEP

WEEKLY REORDERS

Taylor reviews standardized weekly inventory reporting and realizes they are once again running short compared to their book of work, so he places a rush order

Use Case Development

Current Unanswered Business Questions	Feedback/Discussion	Measure/Analysis	Next Steps
- What is the definition of an engaged customer? - How does that definition extend to digital experience?	Priority to gain cross-functional alignment on definition	Measure Analysis	- Develop recommendations for definition of measure(s) - Recommend method of on-going analysis / report - Evaluate the approach to OMNI (Customer centric view) as well as by channel (on/offline) engagement
- Is Digital Engagement Driving overall Customer Reliance on S-W? - What is the relationship between the 4 key reliance variable – Tool usage, Customer Type, Value of the Customer, Customer Satisfaction? - How do we measure Loyalty in a tangible / meaningful way?	- Proposed reliance measures may be challenging for data availability (e.g. NPS, Opinion Lab, etc.) - Reliance is trying to measure customer loyalty	Measure Analysis	- Identify current data availability - Propose approach(es) to measuring reliance – for OMNI and how does it ladder to in-store and digital - Determine if there is a “near term” solution and a recommended “long term” solution based on data - Recommend analysis timing and method
- How do we understand and measure the rate of SOW? - How is digital influencing?	- Existing data quality may not be high due to imputation - Ideal state: understand where the customer is in their relationship and the size of the opportunity	Measure Analysis	- Determine how upcoming “Relationship Ladder” project can be leveraged to answer these questions - Recommend “low-hanging fruit” opportunities related to SOW
- What activities along the customer life cycle that can increase customer lifetime value? - How do we better understand the overall customer experience (across multiple touchpoints and tools) and what drives greatest value?	- Currently do not have the platform / space to stitch the customer journey together - App data and microsites data and tracking sources in addition to low self-identification pose challenges for understanding value of touchpoints - Need alignment on definition of customer value	Measure Analysis	- Propose method to quantify the value of individual touchpoints - Develop recommendation on definition and approach for customer value

Business Goal	What does success LOOK like?	Org. Identified KPI	Open Discovery Questions	Next Steps
Deepen Customer Relationship	- Improved single customer ID to customers’ multi-device usage - Increased adoption across new/reengaged device/channels - Increased \$ per Customer for multi-device customers - Increased # of Customers with multi-device/channel usage	- DX: # of devices per user - DX: Utilization of device IDs (up time, online status, etc.) - SPE: # days since Device was captured (Recency)	- Data availability at a User ID/ Customer ID level - What level of data is available at a customer level? - What is the anticipated go live for identify graph? What potential alternatives for customer ID - What minimum measure of sales success / profitability is applied?	- Confirm level of customer to device level of data - Develop recommendations for definition of engagement measure(s) - Recommend method of on-going analysis / report - Evaluate level of engagement - Evaluate the approach to OMNI (Customer centric) well as by channel (on/offline) - Develop test & learn approach across activation channels to ensure optimization at a customer level

Rider Personalization

Example Use Case

Incremental Impact of Personalization

RI1 Incremental Measurement

LEAD

Data Science & Marketing Analytics

HYPOTHESES

A more personalized, data driven experience with increase frequency of riders translating to incremental spend per customer

DEPENDENCIES

Alignment on points of personalization; connected customer ID; testing methodology; holistic learning agenda

LOE

Medium – High

COLLABORATIVE TEAMS

Analytics
Lifecycle Marketing
Operations

KPI

RFM Score

Spend per Rider

PRIORITY

DETAILS

DESCRIPTION

A personalized connection to CRUISE will drive an increased frequency of trips and ultimately greater LTV per rider. By developing a testing strategy to pilot alternative personalized methods by customer segment, CRUISE will understand which key points of contact require the greatest personalized communication.

KEY ACTIVITIES / DEPENDENCIES

- Connected Customer ID to enable measurements at all touchpoints in a centralized database/platform
- Consistent testing methodology
- Learning agenda to prioritize efforts
- Tagging strategy for site, app and all media activity
- Customer segmentation
- RFM score development
- Standardized reporting method across channels & activities

OUTCOME

- Aligned testing plan
- Consistent measure of success for personalized efforts

TIMING

- Dependent for balance of Personalization Measurement enablement

14

Advancing Data Usage

Four gap categories were identified as impeding the advancement of measuring personalization and achieving the measurement goals of personalization (Holistic Incremental, Tactic Effectiveness, Always on Test & Learn and Program KPIs)

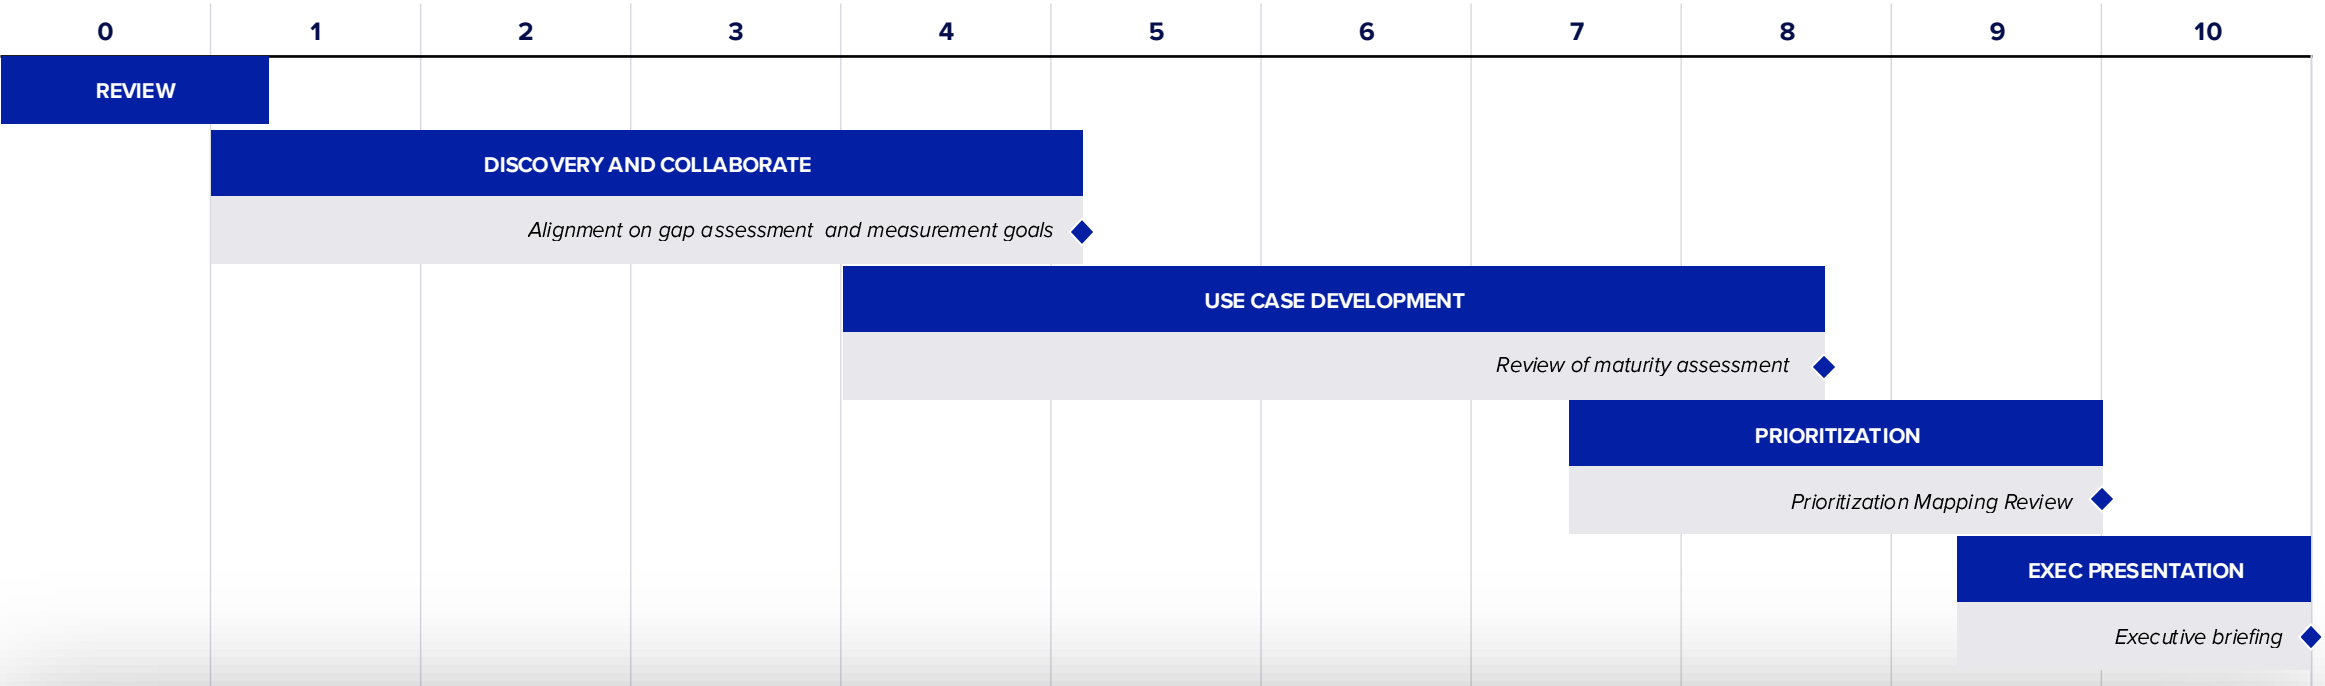

- Out of the **Personalization Operating Model** developed in 2021, five key focus areas emerged (Planning, Creative, Insights, Mindsets & Collaboration). The recommendations for enabling personalization measurement drive forward **INSIGHTS** and **COLLABORATION**.
- The personalization measurement resolutions identified will require a targeted project plan and task force to ensure a timely execution of key steps to enable measurement of personalization efforts and customer level marketing efforts at a tactic and program level

8-10 Week Use Case Engagement Timeline

REVIEW	DISCOVERY	USE CASE DEVELOPMENT	PRIORITIZATION	EXEC SUMMARY
- Stakeholder Prep - Scheduling and Logistics - Artifact Collection	- Stakeholder Interviews and Workshops - Gaps and roadblocks to data utilization identified - Collaboration on Use Case Ideation - Key Data Usage Themes	- Use case development based on - High level plans scoping use case benefits and dependencies developed	Prioritize highest potential use cases for road mapping and tactical plan development	- Executive Reviews and Final Use Case Presentation - Solution Discussions to support enablement of data utilization use cases

Data Strategy Consulting Project Pricing

Pricing	Timeline	Resources	Data Use Cases
\$75K+ Includes discovery sessions, use case development and catalogue for prioritization of uses cases	8-12 Weeks Timelines are estimated and will vary dependent on the number of stakeholder teams engaged	2+ Analytics Director, Lead Analyst, and SMEs based on prioritized business needs (e.g. BI, Data Science, etc.)	Up to 10 Including a log of deprioritized use cases and catalogue to support ongoing development

- Delivery timeline is dependent on scheduling stakeholder discovery sessions with relevant teams
- SME's will be pulled in as necessary based on need (not included)
- Pricing does not include Travel and expense costs, est. to be 10% of total cost
- Any additional items or tasks may need to be assessed, scoped and may require additional costs

Analytics Audit and Readiness Assessment

YOUR CLIENT-FACING 1-PAGE SUMMARIES LOOK LIKE THESE

GTM team to add slide thumbnails

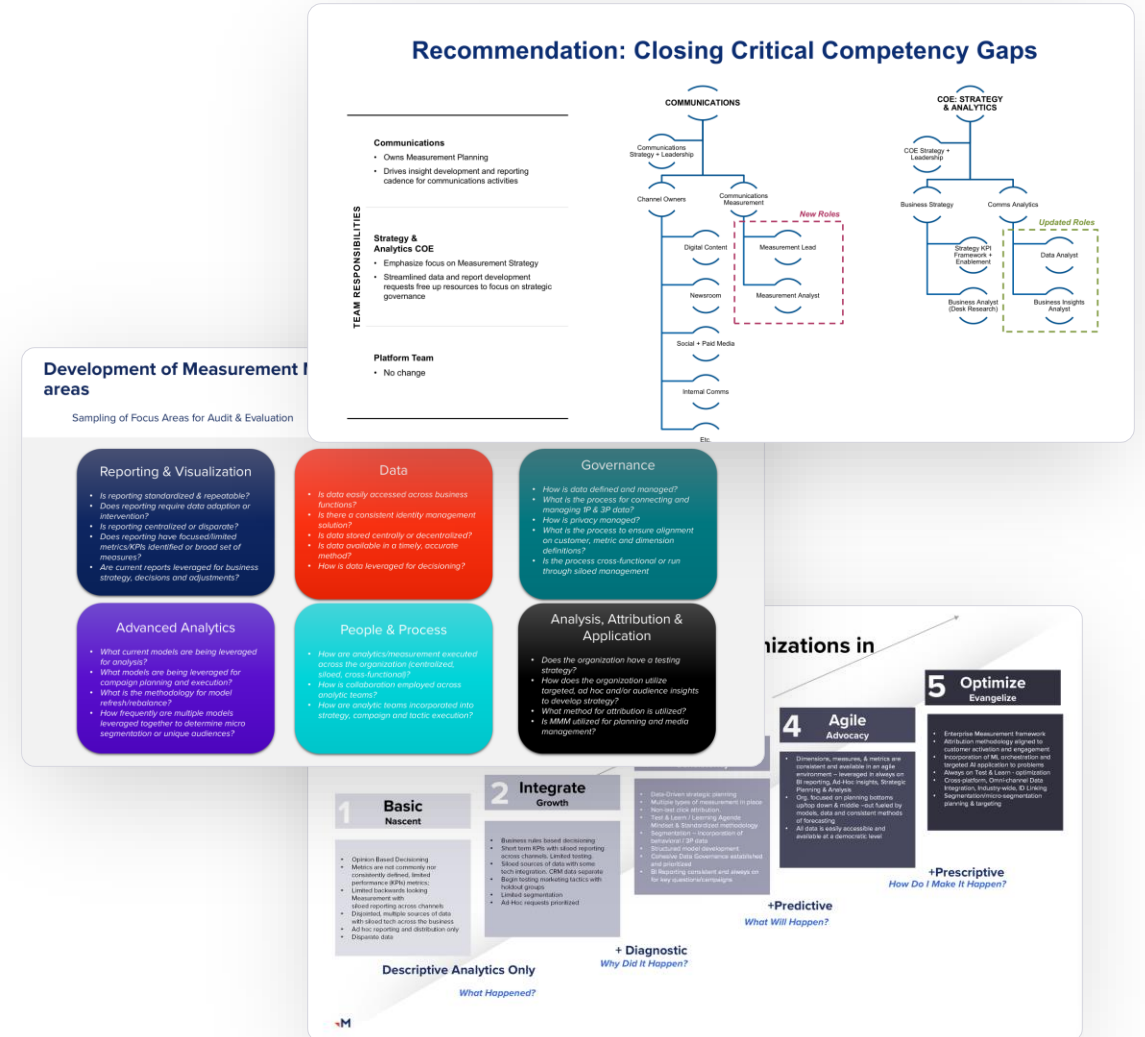

Analytics Readiness and Org. Assessments

To know where you are going, you must know where you are starting.

Understand the current state of your analytics discipline to assess gaps to future vision for measurement enabling insight based, data backed actions. Develop a customized analytics organization assessment, tool and platform recommendations and data plan to support brand managed measurement and analytics

ENGAGEMENT INCLUDES

-  Pain Point analysis identifying current state challenges in achieving short and long-term vision
-  Measurement and Analytics Maturity scorecard
-  Capability Gap analysis across technology and data components, measurement/analytics and capabilities
-  High level recommendation of analytics organization and mix of in-house with outsource support

EXAMPLE DELIVERABLES

Current state analytics audit and discovery

- Full Team Kickoff for Engagement Alignment
- First two - three weeks for Discovery meetings
- Artifacts gathered to review
- Weekly Status reports on progress

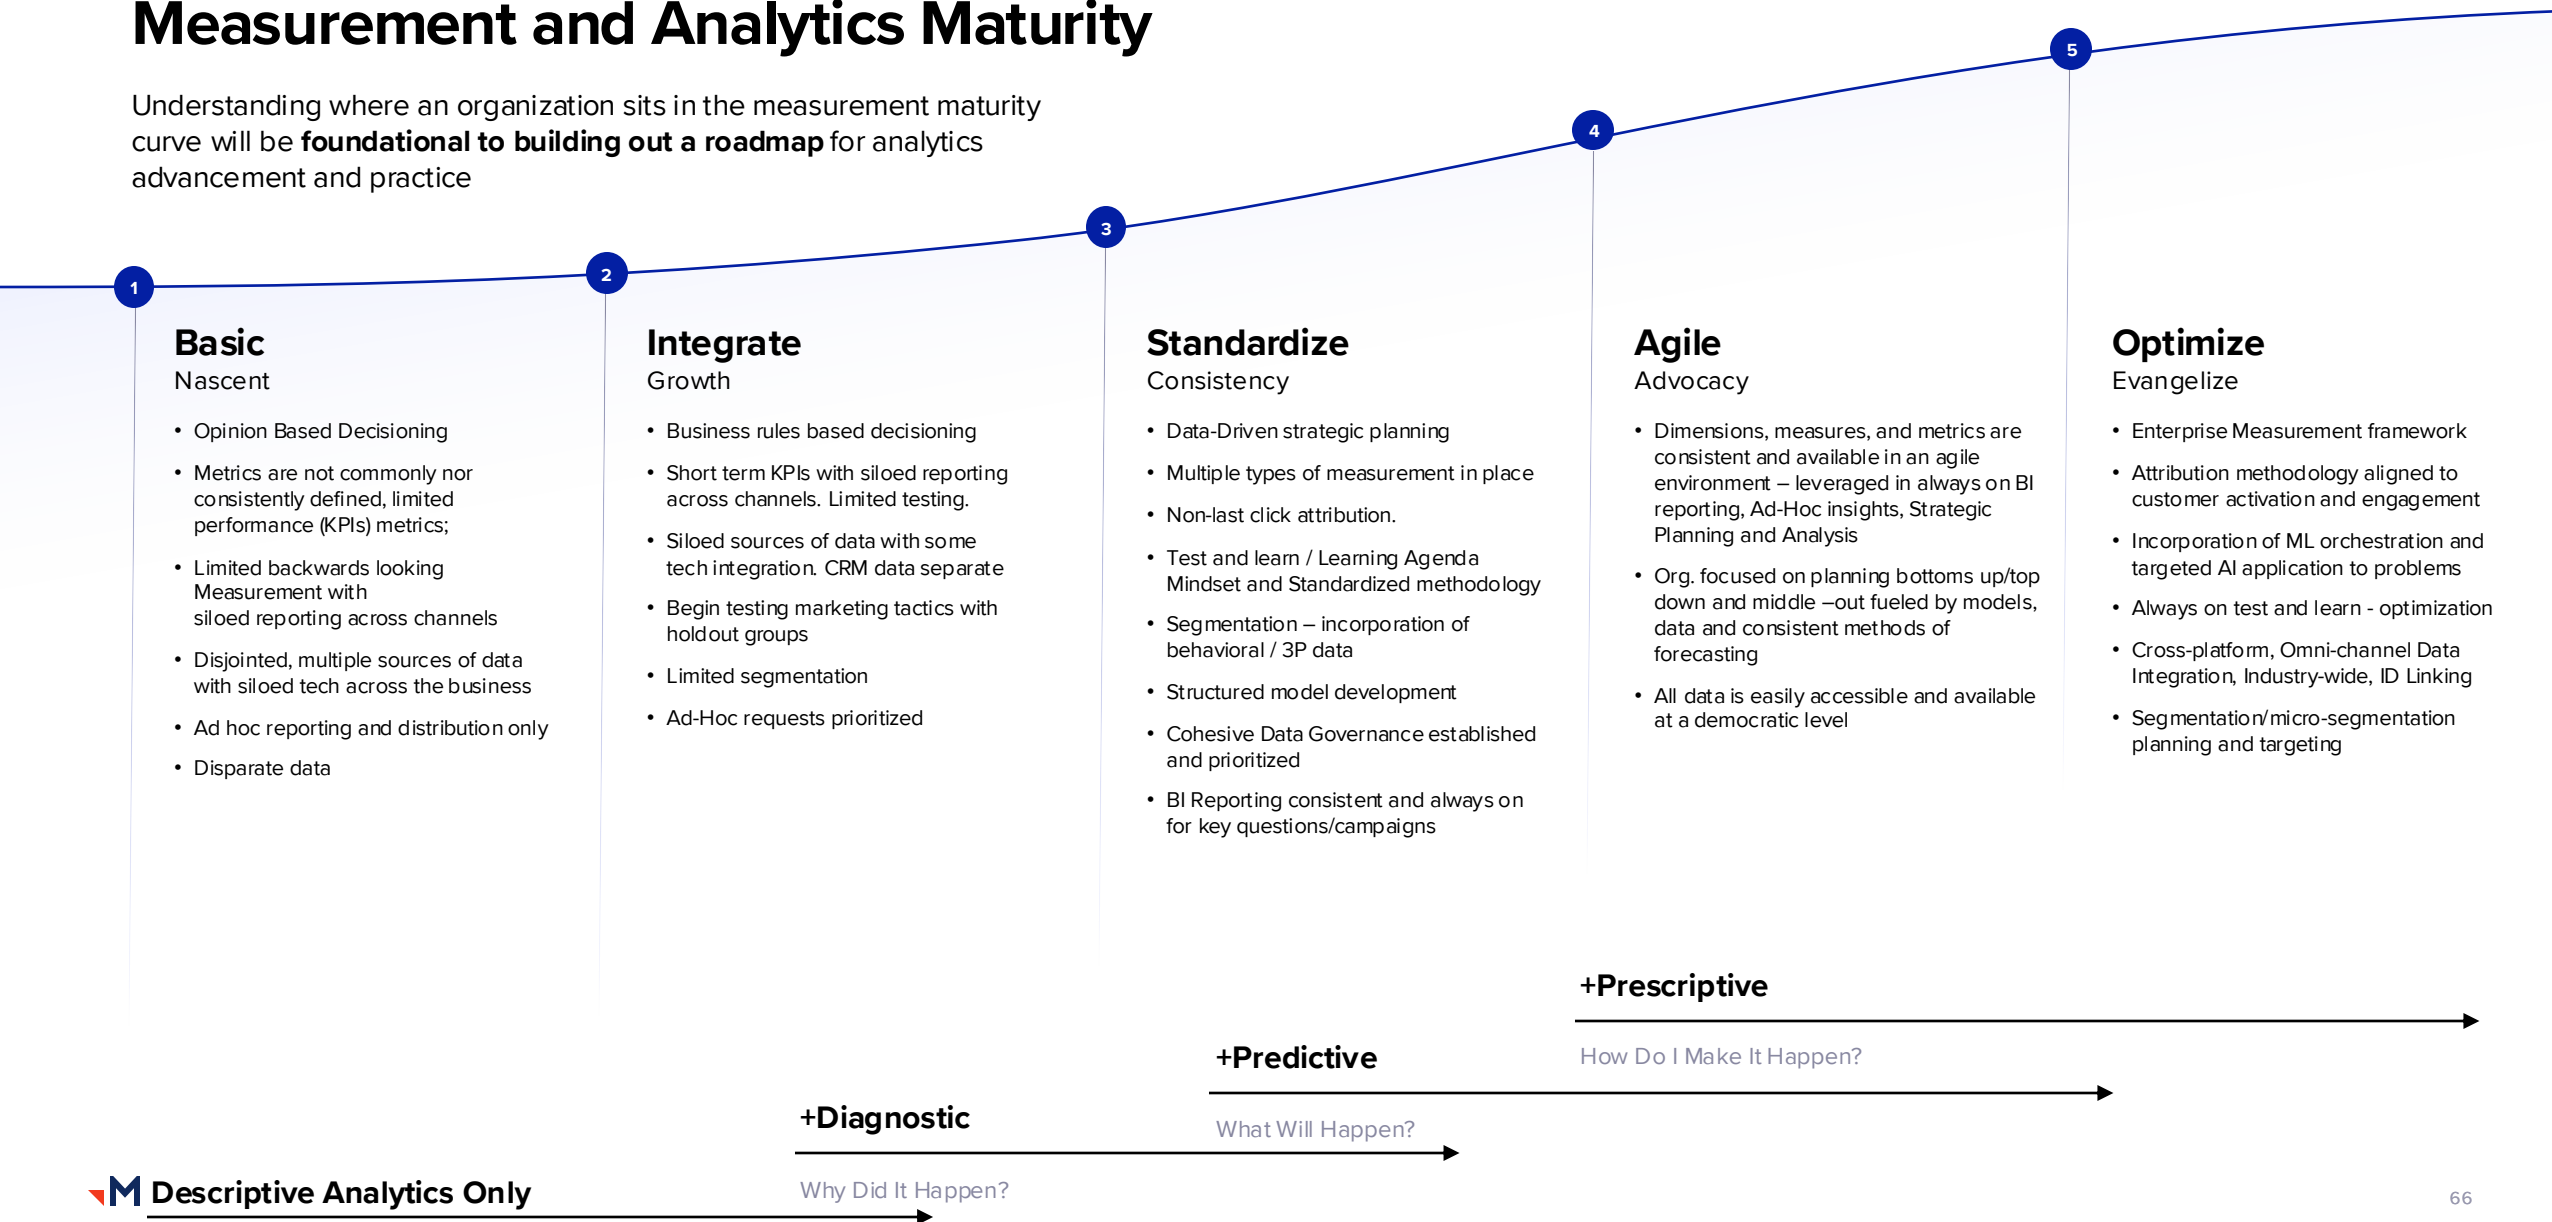

AUDITING PROCESS

Artifact Request and Review	Virtual Interviews and Survey	Evaluation	Current State Analysis
COMPRENSIVE EXPLORATION			
- Merkle will provide a detailed list of artifacts it would like to review Access to data, analytic platforms and team structure will be shared with Merkle Aligned current state survey will be finalized for deployment	- Merkle will conduct a series of virtual key stakeholder interviews to gain insight into short and long-term business goals, gaps and opportunities - These sessions will focus on measurement, technology enablers and analytics strategy	- Merkle will leverage interview and survey outputs – along with artifacts and data discovery to evaluate the analytics practice maturity - The deep dive evaluation will fuel the analytics assessment and Analytics/ Measurement Scorecard	Out of the evaluation, a pain point analysis, gap assessment and analytics maturity scorecard will be developed to inform next step recommendations for measurement roadmap to support personalization goals
Weeks 0-1 Understanding Details	Weeks 1-3 Discovery	Weeks 3-6 Deep Dive	Weeks 6-8 Vision to Action

We understand how to help advance organizations in Measurement and Analytics Maturity

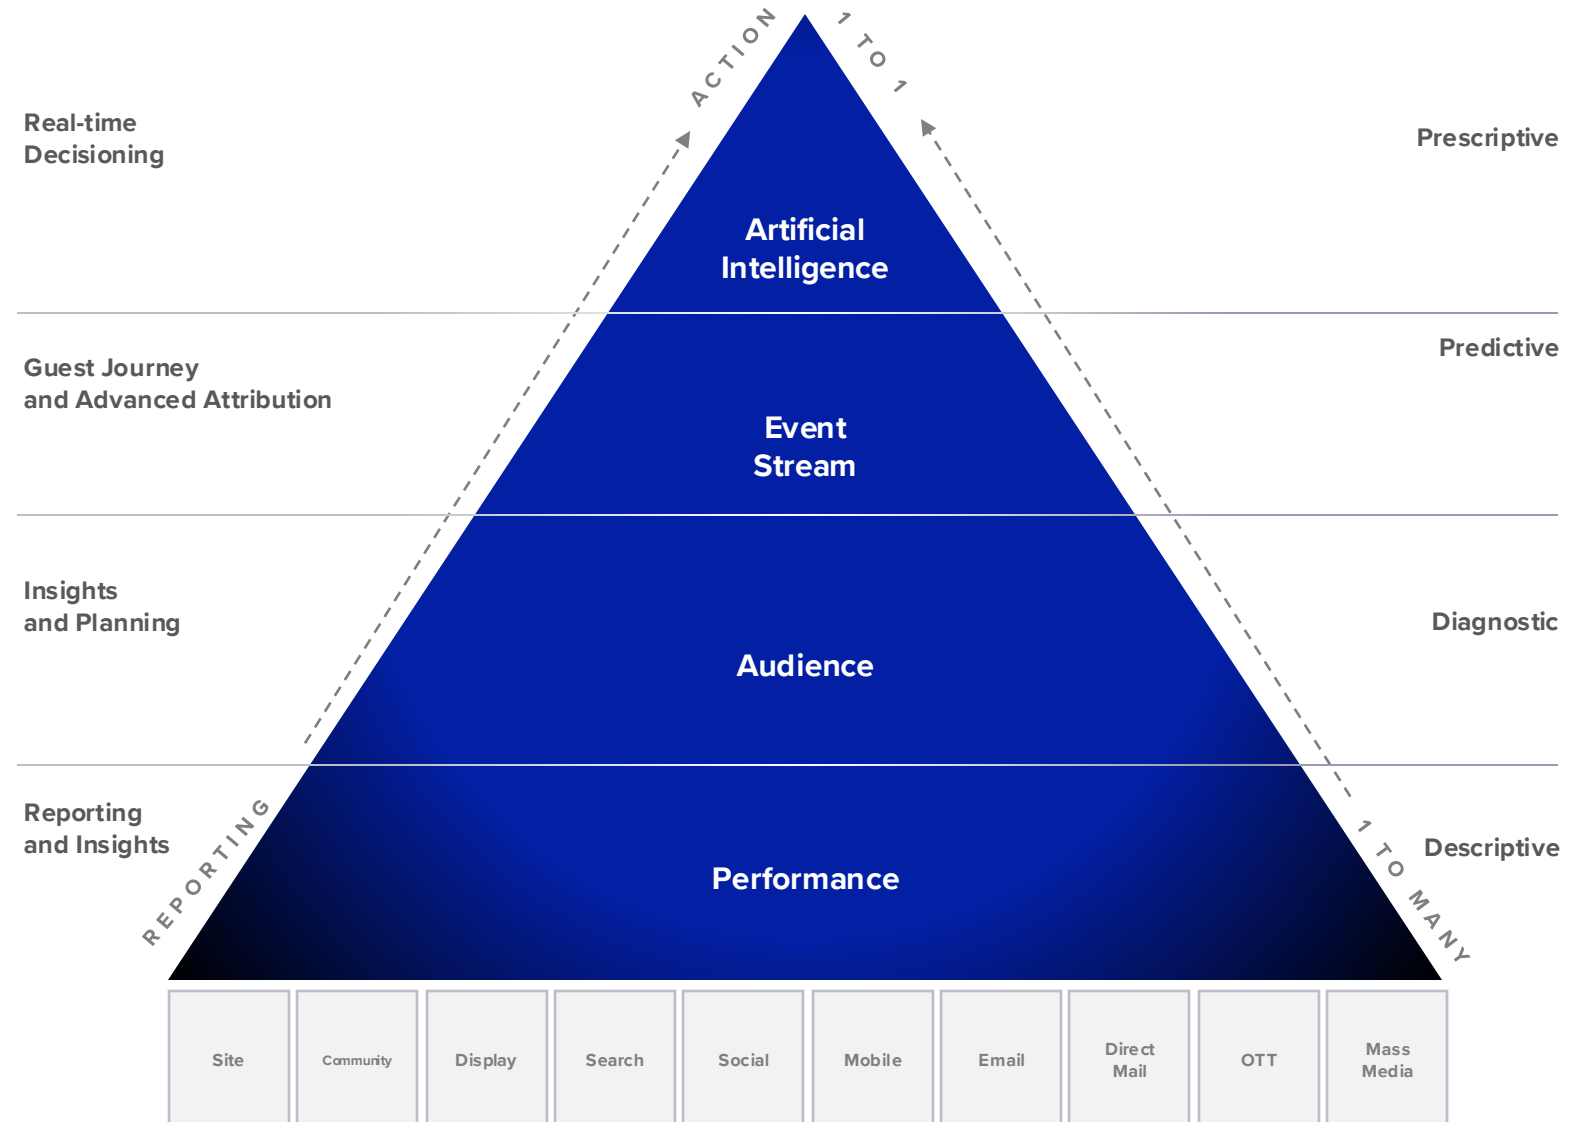

MATURITY

Understanding where an organization sits in the measurement maturity curve will be **foundational to building out a roadmap** for analytics advancement and practice

We have philosophy and practice that is grounded and fueled by strategic measurement to drive advanced analytics

Measurement is multi-dimensional and the type of analytics leveraged is based on [the objective](#) or [the question](#) being asked

Development of Measurement Maturity Scorecard will focus on up to six key areas

Sampling of Focus Areas for Audit and Evaluation

Reporting and Visualization

- Is reporting standardized and repeatable?
- Does reporting require data adaption or intervention?
- Is reporting centralized or disparate?
- Does reporting have focused/limited metrics/KPIs identified or broad set of measures?
- Are current reports leveraged for business strategy, decisions and adjustments?

Data

- Is data easily accessed across business functions?
- Is there a consistent identity management solution?
- Is data stored centrally or decentralized?
- Is data available in a timely, accurate method?
- How is data leveraged for decisioning?

Governance

- How is data defined and managed?
- What is the process for connecting and managing 1P and 3P data?
- How is privacy managed?
- What is the process to ensure alignment on customer, metric and dimension definitions?
- Is the process cross-functional or run through siloed management

Advanced Analytics

- What current models are being leveraged for analysis?
- What models are being leveraged for campaign planning and execution?
- What is the methodology for model refresh/rebalance?
- How frequently are multiple models leveraged together to determine micro segmentation or unique audiences?

People and Process

- How are analytics/measurement executed across the organization (centralized, siloed, cross-functional)?
- How is collaboration employed across analytic teams?
- How are analytic teams incorporated into strategy, campaign and tactic execution?

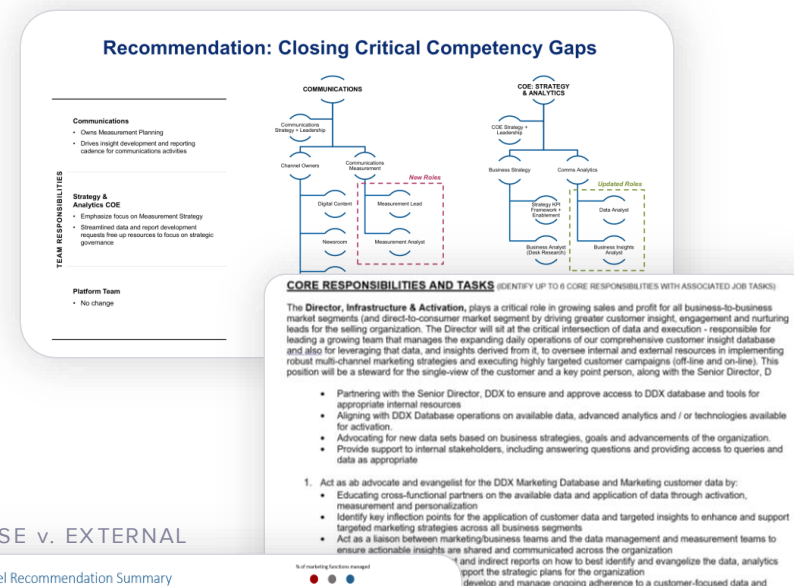

Analysis, Attribution and Application

- Does the organization have a testing strategy?
- How does the organization utilize targeted, ad hoc and/or audience insights to develop strategy?
- What method for attribution is utilized?
- Is MMM utilized for planning and media management?

ASSESSMENT AND STRATEGY

Google platform assessments and roadmaps

Assess the current state of Google media and measurement technology, understand business objectives, and identify opportunities to increase efficiency and maximize return on investment

OUTCOMES

- Media and tech goal alignment and action plan
- Integrated Google platform strategy
- Activation and measurement optimizations

The future of **customer experience is being rewritten** by the dynamic forces of AI and Privacy, creating complex landscape for advertising and data ecosystems

Marketers are challenged to keep pace

The dynamic interplay of internal and external forces creates a complex and ever-shifting landscape for marketers, requiring them to constantly refine their skills, adapt their strategies, and invest in continuous learning to navigate these challenges and capitalize on emerging opportunities.

Privacy-first marketing mandates a shift towards transparent, user-centric data collection and usage

Elevated customer expectations drive expected personalization, seamless and valuable experiences across all touchpoints

Evolving commerce landscape requires agility and data-driven approaches in integrating traditional, digital and social store fronts

Rise of streaming and media fragmentation is challenging cross-screen measurement and attribution

Strong UX is no longer a nice-to-have; it's a critical driver of conversions, loyalty and maximizing ROI

Market forces are driving organizations to seek ways to simplify the changing marketing landscape

01

Centralized Platform

Consolidated and integrated tools streamlines media buying and measurement workflows, reducing manual effort, and providing unified source of campaign performance.

02

AI and ML

Apply advanced models to provide valuable insights into audience behavior, campaign performance, and market trends in real-time, and achieve better ROI

03

Automation and Efficiency

Automated bidding, audience targeting, and campaign optimization frees up marketers' time to focus on strategic initiatives while ensuring campaigns are running efficiently and effectively

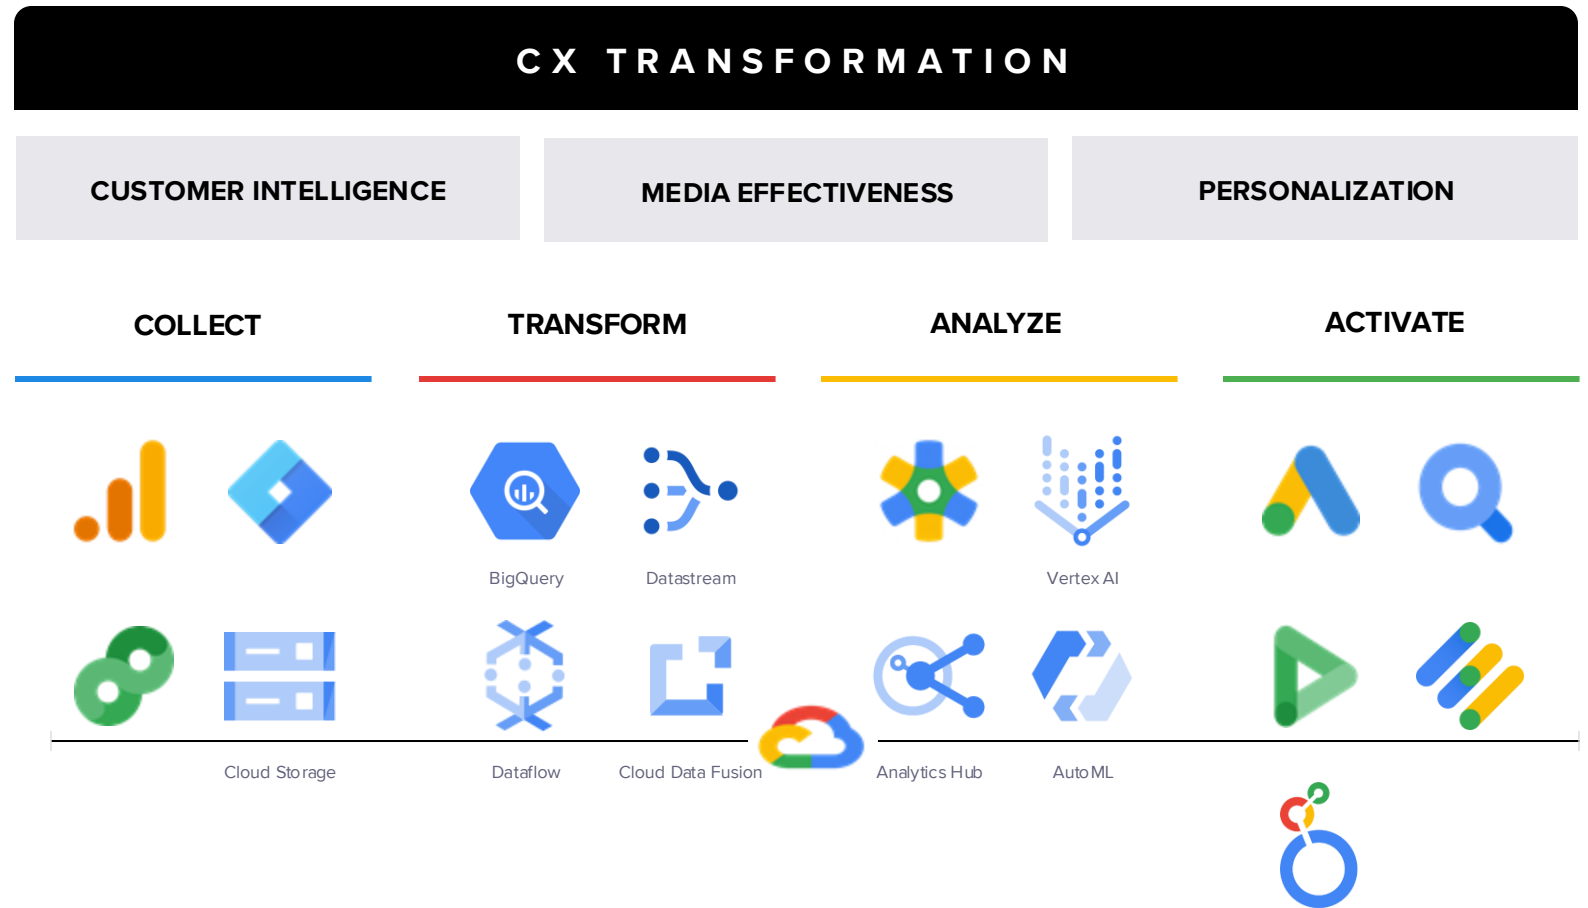

04

Reach and Inventory

Reach and engage with relevant customers who are likely to convert across search, display, online video, CTV, TV and audio

Transform with Google

Through a unified Google Strategy, Merkle empowers brands to transform customer experiences with data, technology, and organizational alignment

Connected Activation Stack

Building on a best-of-breed platform can **unlock data-driven insights** to optimize media performance, drive campaign effectiveness, and **deliver superior customer experiences**.

Deep Native Integrations

Seamless Google Marketing Platform integration streamlines data flow, enabling deeper insights and optimized marketing campaigns for better ROI.

Analytics Powerhouse

Google's AI/ML powers predictive modeling, audience segmentation, and campaign optimization. Real-time data processing enables faster insights and agile decision-making.

Campaign Reach and Automation

Google AI drives lightning-fast campaign execution, expanding reach across devices and formats. This synergy unleashes exponential campaign impact and fuels unprecedented media performance.

Privacy-Centric

GMP's multi-signal strategy unlocks deeper audience insights, nuanced campaign execution, and privacy-aligned solutions.

Brands who can effectively integrate technology and agile test-and-learn processes are able to influence buying behavior across the customer lifecycle

DEFINITION

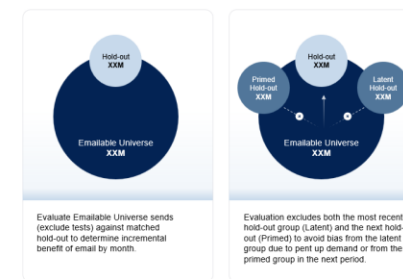

Hold-Out

A matched subset of a targeted audience who **does not receive** a marketing treatment/campaign content for the purposes of **determining the impact of the marketing effort**.

Determination of Hold-Out Volume is based on response metrics, length of test period and number of segments to achieve statistical significance.

Note: Test sends are recommended to have unique matched controls that run the BAU/Split & Blast

Operationally measuring the impact of email is best executed through a universal hold-out

Analytics and Measurement Strategic Consultancy

Pricing

\$10K+per month

Includes strategic support and advisory on all analytics, measurement and strategic planning

Timeline

6+ months

Timing is dependent on the needs of leadership. Engagement may include support of tactical leadership.

GTM team to add slide thumbnails

A culture of experimentation is good business

Testing is not just meant to validate if an idea is successful—testing is the means to developing successful ideas. Continuous performance improvements driven by a culture of in-market testing can deliver measurable ROI by answering strategic and tactical marketing questions.

TESTING GUIDING PRINCIPALS

- Fail fast / learn fast
- Focus on big lessons
- Start with the right questions
- Plan next steps for each possible outcome
- Win big or lose big

Test and learn at scale requires structure

● **Develop a hypothesis,** based on previous learnings or industry standards

● **Establish a methodology** for testing or backwards-looking analysis with a focus on actionable outcomes

● **Deploy the test and/or analysis,** gather learnings and implement in future planning

ORGANIZED ITERATION

Learning Agendas: Turning Data Into Actionable Results

Identify which brands should support which learnings, and add additional brand-specific learning pillars

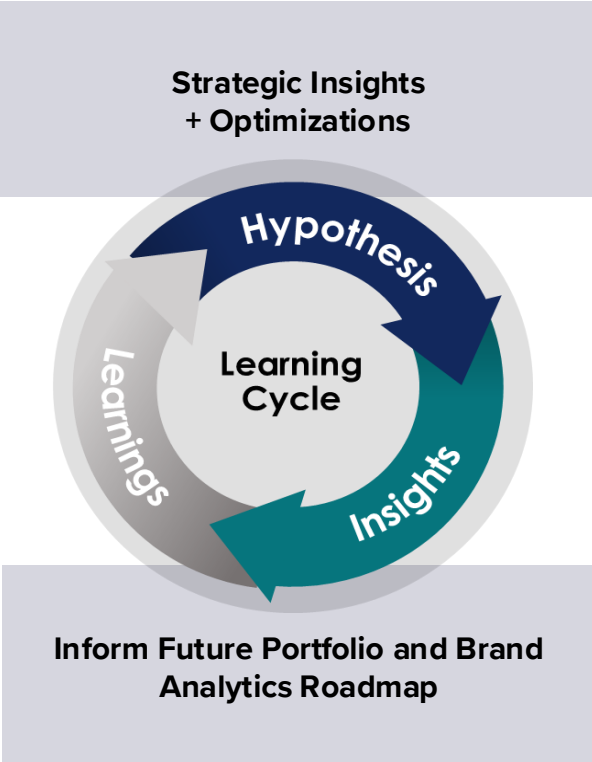

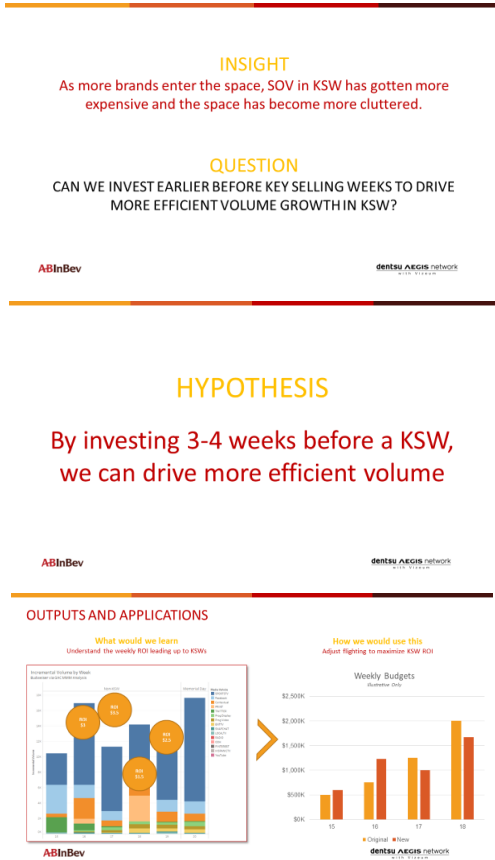

Halo
If we prioritize investing in media for new products, will a halo effect sufficiently maintain brand awareness for established brands?

Key Selling Weeks
Will investing earlier before key selling weeks drive more efficient volume growth during the Key selling weeks (MDW, July 4th)?

Premium
What premium inventory is worth the additional cost based on improved efficacy and impact?

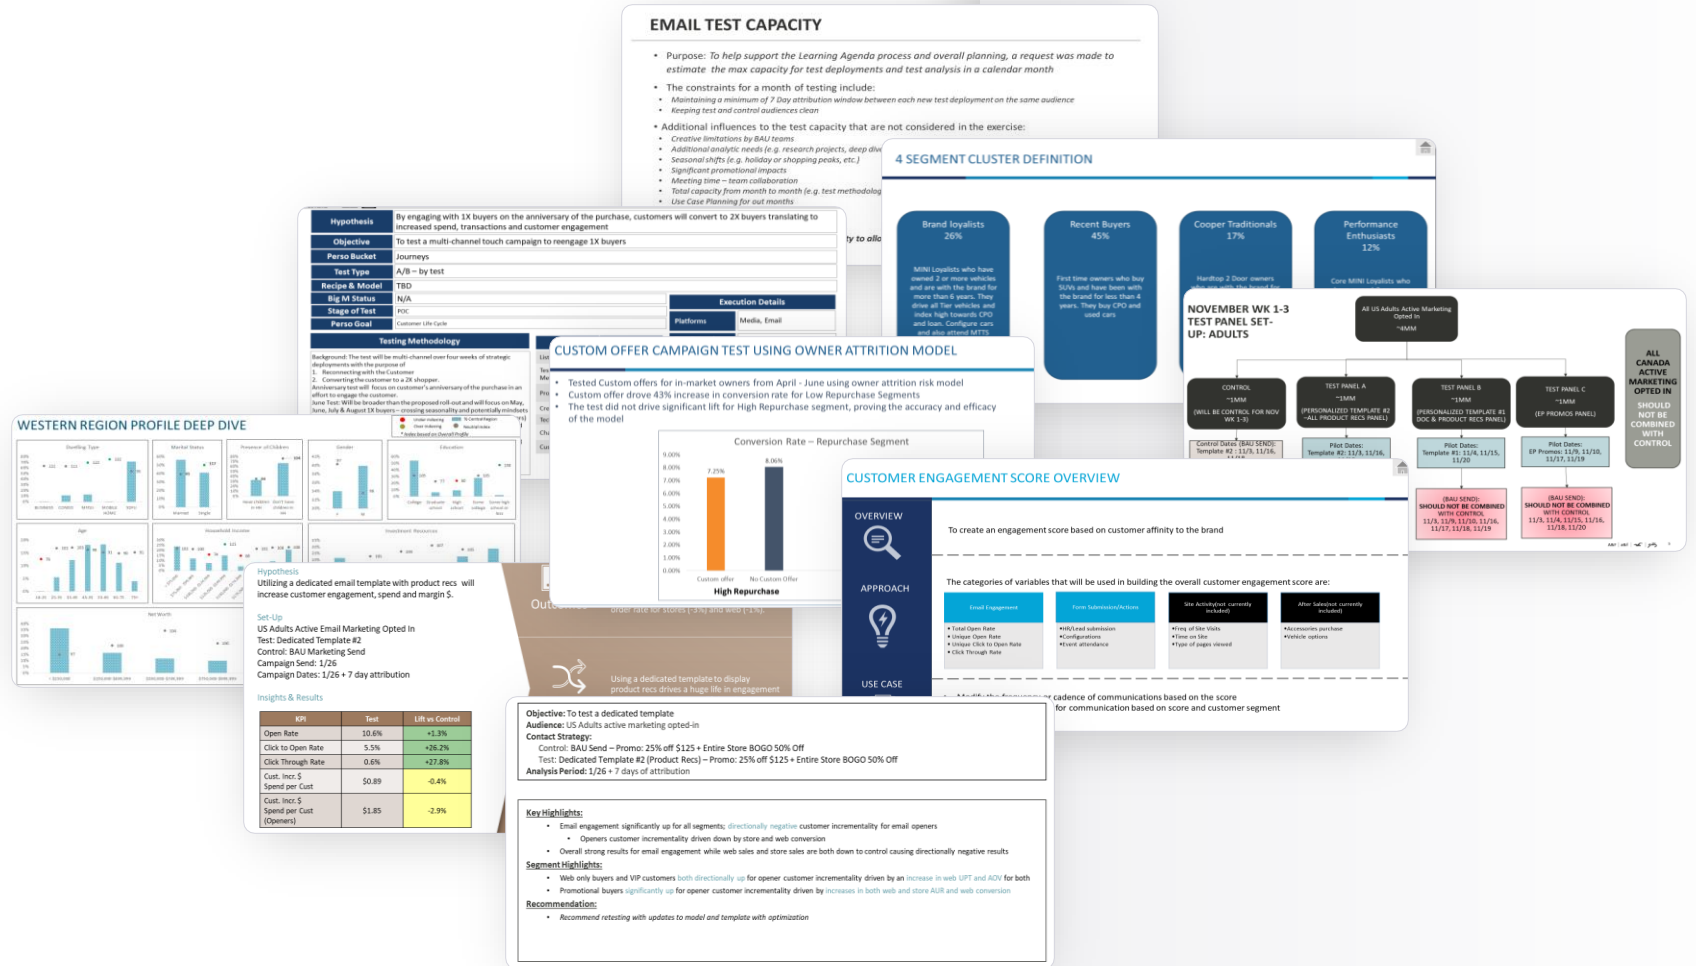

Frequency
Does additional frequency drive awareness or just lower level metrics (consideration, purchase) in our current audience?

Influencer
How does the influencer/creator content impact brand health? Does it help us reach new audiences?

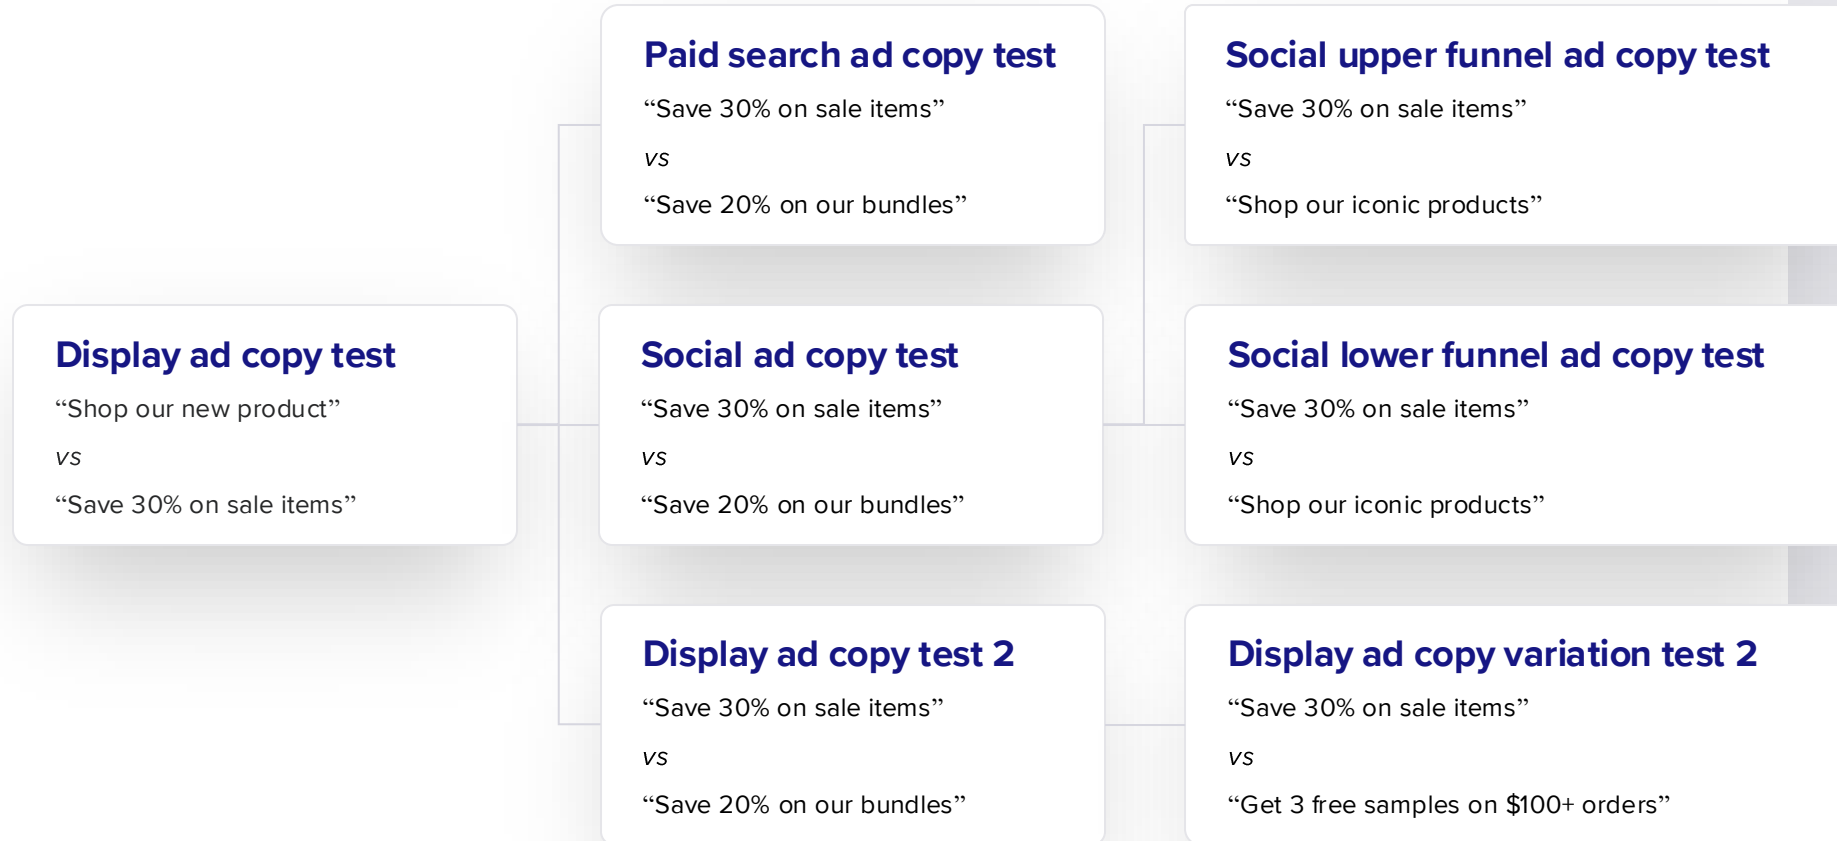

Learning Library

Maintaining a history of testing activity and action will **enable the development of more robust learning agendas** to inform continuous, profitable growth as well as building a set of benchmarks for success

Testing is iterative.

How 1 test can generate 7 more

Insights from one test lead to more questions.

Iterative structured testing enables insights to build on each other and scale.

In the case of this ad copy test, 7 tests span across channels, platforms, and funnel stages.

An example of a testing menu

Creative Focus		Platform	Media	
Global vs Local creative Test Global vs Local creative within audience, platform, etc.	Creative to Audience alignment Test creatives with audiences	eComm Platform Personalization Test multiple platforms to determine where each audience responds best	Retargeting Refinement Test retargeting audiences against each other in various conditions (platforms, channels, etc)	Ad Feature Test In any channel, test variations of ad copy or ad features to see which one leads to the highest engagement
Creative endurance Compare performance after creative has been in market for set times	Dynamic Creative Optimization (DCO) Compare DCO with BAU creative	Landing Page Test Compare LPs to determine which elements work best in general, and for certain campaign types	Frequency Test Test frequency settings to determine at what point higher frequency return wanes	Capability Testing As platforms develop new capabilities, A/B test their usage and results
			Brand Lift Question Alignment Align brand lift questions to other campaigns or other regions to gain longevity of learnings	Burst Utilization Compare performance when a campaign has pre and post support vs a campaign without

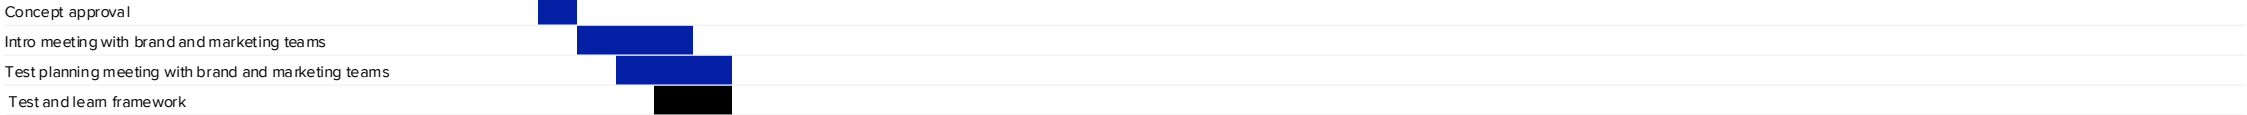

Examples of variables to experiment with

Brand	→	Brand A, B, C, etc
Market	→	Country, DMA, etc.
Channel	→	Display, Search, Social
Media strategy	→	Acquisition, Awareness, Consideration, etc
Category	→	Product category A, B, C, etc.
Media platform	→	Meta, TikTok, YouTube, Google Search, etc

Device	→	Mobile, desktop, CTV, OOH, etc
Targeting	→	Retargeting, lookalike, prospecting, geographic, broad match, etc
Audience	→	As per local definition
Ad format	→	Platform-specific formats, size
Creative	→	Global, Local, adapted; format
Language	→	Identify local vs standardised language usage

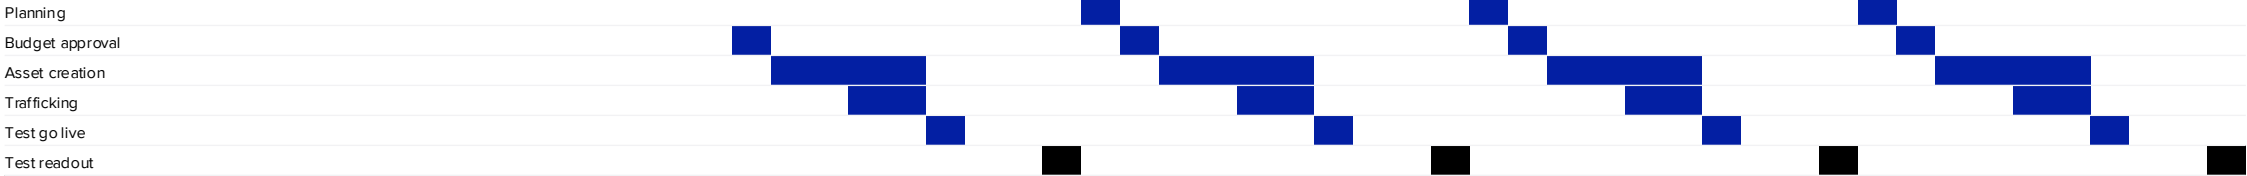

Example of a Test and Learn Framework + Analytics Co-Pilot Timeline

TEST AND LEARN FRAMEWORK

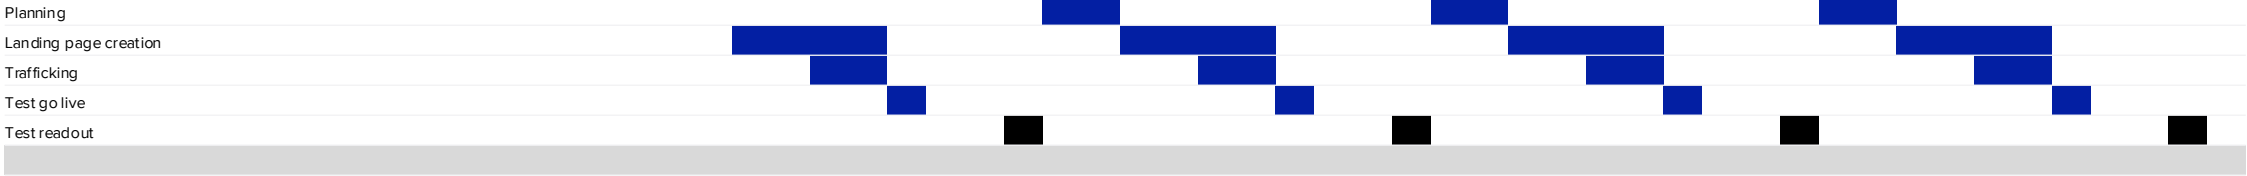

ANALYTICS CO-PILOT

Creative Versioning Test

Landing Page Test

Buyers and Industries

Understand our buyer and their motivation as well as the outcomes we deliver that help them meet their goals. Dive into industry-specific considerations.

PRIMARY AUDIENCE

CEO/CTO/CMO/CAO/STRATEGIC PLANNING

The audience for Analytics Advisory and Consulting are senior leaders who are unable to easily or effectively answer the question “Is the work working?”. They are leaders who have a strong desire to be rooted in data.

Concern #1

Are my strategies driving my outcome goals?

Concern #2

Do I have the right resourcing and readiness to be holistically data driven?

Concern #3

Are my data and resources AI ready?

PRIMARY OUTCOMES

Outcome	Why it Matters
Revenue / Brand Health	Translate results to Board of Directors
Efficiency	Effectively be able to invest or reinvest based on tangible results
Engagement	Data democratization across all areas of the business – not just analytics
Profit	Infuse data and outcomes against all objectives

Buyers and Industries

Understand our buyer and their motivation as well as the outcomes we deliver that help them meet their goals. Dive into industry-specific considerations.

TARGET INDUSTRIES

Analytics advisory and consulting service outcomes apply across all verticals, industries, and client maturity levels. We find that every organization can benefit from these services to unlock new outcomes and ROI.

Industry	Why it Matters	Do we have vertical-specific content?
Pharma/Financial Services	Organizations that embed privacy-by-design principles into marketing operations are better positioned to deliver on CX objectives	Privacy Transformation
Retail	Understanding the data strategy needed to conform across RMN, DTC and Marketplace is dynamic and ever-evolving. Having a partner with deep industry and practice area knowledge to know what questions will be asked by each of the concerned parties is paramount to a successful launch and expansion while driving profitability.	Data Strategy Consulting

Why Merkle

Merkle is uniquely positioned to help our clients thrive and win in the current landscape. Understand how the Merkle story resonates in this context and grab relevant case studies.

OUR STORY: KEY DIFFERENTIATORS

At Merkle, we don't just understand data—we know how to transform it into bottom-line results. Your challenges deserve more than off-the-shelf solutions.

Merkle's Analytics Advisory and Consulting team brings real-world experience from every corner of the business landscape—Fortune 10 enterprises, emerging brands, and everything in between.

We speak both languages: advanced analytics and practical business sense. Our consultants assess where you are today, then build clear roadmaps to get you where you need to be tomorrow, ensuring your team can drive results. We cut through the noise, matching sophisticated analytics with your organization's reality.

From foundational data needs to cutting-edge solutions, we provide the strategic clarity and hands-on expertise that turns insights into revenue.

- 15+ Dedicated Consultants and Advisors focused on driving excellence.
- 200+ years of analytics and data experience across both business and agency.
- 300+ SMEs to partner with across every discipline and vertical to ensure each client's solution not only meets their needs but is best in class

OUR WORK

Client	Project	Market	Description	Link to case
Chevron	Analytics Readiness Assessment	Oil and Gas	Merkle developed a revised scaled organizational design to be rolled out over a three-year time horizon inclusive of process approach to begin with a targeted team of Measurement Consultants to establish tools, data needs and end to end measurement for the Corporate Communication team. The solution was launched enabling two key communication goals to be measured by the end of the first year.	LINK
Sherwin-Williams	Measurement and Analytics Strategic Consultancy	Retail	With the focus of the brand's vision to drive data-driven customer experiences and coupled with the objective of creating a center of analytics excellence Merkle had a three phased approach that evolved to an ongoing engagement	LINK
Amgen	Privacy Transformation Strategy	Biotech	Copy	LINK

Analytics Advisory and Consulting

Sales Guidance

Help selling through the offering, from handling objections to understanding similar/competitive offerings where they exist.

GUIDANCE AND GUIDELINES

Include other information as needed.

- Every wedge and solution is built at an “enterprise level” and can be adapted based on a specific industry or need
- The key stakeholder is generally not the “analytics” person – but a strategic leader who is seeking a simplified answer to a complex question

WHAT TO LISTEN FOR

Include other information as needed.

- Challenges on showing the value of the business, organization or project
- Unclear how to apply data or insights and how to determine what is to be measured
- Wanting a better understanding of how to utilize, monetize, operationalize, democratize or optimize data

QUALIFYING QUESTIONS

- How are you making strategic decisions today?
- What data and insights do you leverage?

Privacy Transformation Advisory

WHAT IT IS

Data privacy is no longer just an ethical consideration; it is a business imperative

With 80%+ of the world's population now covered by data privacy laws, organizations are navigating an increasingly complex marketing ecosystem. Merkle can help you understand how data privacy considerations will impact your operations to build a durable, privacy-conscious foundation for continued marketing success

- A broad assessment of your company's current data, media and analytical capabilities, processes, and operating model
- Identification of areas of risk posed by data privacy changes and areas of opportunity to transform for improved business outcomes
- Detailed recommendations to successfully navigate privacy-related data deprecation across measurement and activation initiatives
- Strategic roadmap for marketing data, technology, and capabilities for near-term quick wins and long-term flexibility in a changing ecosystem

DELIVERABLES

Privacy Transformation Roadmap
Activation and Measurement Readiness

ANALYTICS ADVISORY

Measurement Strategy Consulting

WHAT IT IS

Guide to ensuring analytics are actionable and insightful through well-defined recommendations supporting the optimization of marketing efforts, with a clear view into the steps needed to advance analytics.

- What areas of analytics should I focus on?
- What are my current analytic gaps compared to my business needs today and in the future?
- What measurement tactics and tools do I need to facilitate growth and advance data driven decisions and actions?

DELIVERABLES

- Mapping of recommendations based on effort and business impact
- KPI Framework
- Analytics Roadmap – providing guidance on recommendations such as resourcing, increasing measurement sophistication, RACI to drive measurement practice advancement, etc.

FOLLOW-ON ENGAGEMENTS

Implementation through other MMO engagements, including Media and CRM Dashboards, Marketing Mix Modeling, and other more advanced tactics.

Investment: See market commercial guidance

Timing: 8-16 weeks

Outcomes:

- Consistent language, taxonomy, KPIs and success methodology for use across the business
- Alignment on go-forward plans

OFFERING SUMMARY

Measurement Strategy Consulting

Each Measurement and Analytics challenge is unique to the business

We begin with our proprietary approach to measurement with customizable deliverables inclusive of KPI Framework, Measurement Maturity and Strategic Planning.

But each measurement and analytics plan is customized based on the targeted needs of the business ensuring that data, analytics and measurement are leveraged and optimized to meet the needs and goals of the business.

Enterprise Holistic All areas of the business aligned on data definitions, success measures and methods ensures a data driven organization	Experience Digital Focused on ensuring an optimized measurement and value realization framework is established	Marketing ROI The effectiveness of marketing is wholly determined by the return on investment and building measurement to support	Digital Product Determining the impact of new products on the customer – both internal and external – is vital to optimizing digital properties
Media Impact Focus on relative acquisition metrics and measurement evolution across media channel to ensure optimized marketing spend tied to goals	Customer Personalization Driving an optimized customer experience requires a prescriptive method to understanding what, who and how efforts are meeting expectations	RMN Audience Growth Expansion of monetization and customer nurture requires a focused data, measurement and analytics plan	Vertical / Industry SMEs The type of measurement is highly impacted by the industry. The practice requires SMEs at an industry level will be engaged

ANALYTICS ADVISORY

Analytics Audit and Organizational Readiness Assessment

WHAT IT IS

With a focus on ‘in-sourcing’ analytics, organizations need to understand what is needed to establish and grow their analytics organization to meet the goals of the business.

- How mature is my measurement?
- What is the current state of my analytics organization?
- What does the mix of in-house and outsource resourcing look like to enable my business goals?
- What actions can be taken leveraging my data?
- What user journeys do I need to understand?

DELIVERABLES

- Pain Point analysis identifying current state challenges in achieving short and long-term vision
- Capability Gap analysis across technology and data components, measurement/analytics and capabilities
- Measurement and Analytics Maturity scorecard
- High level recommendation of analytics organization and mix of in-house with outsource support
- Potential job descriptions for new or open roles

Investment: starting at \$90K

Timing: 6-10 weeks

Outcomes:

- Holistic understanding of gaps in current data to support future vision
- Agnostic evaluation of analytics practice with guidance next steps
- Foundation to fuel measurement roadmap and blueprint

OFFERING SUMMARY

Analytics Readiness Consulting

WHAT IT IS

Understand current state analytics discipline to assess gaps to future vision for measurement enabling insight based, data backed actions. Develop a customized analytics organization assessment, tool and platform recommendations and data plan to support brand managed measurement and analytics

BUSINESS OUTCOMES

- Holistic understanding of gaps in current data to support future vision
- Agnostic evaluation of analytics practice with guidance next steps
- Foundation to fuel measurement roadmap and blueprint
- Ensure talent needs match long term goals
