

# Digital Shelf and Commerce Intelligence Offering Toolkit

UPDATED: JANUARY 2026

YOUR 1-PAGE SUMMARY

# Digital Shelf and Commerce Intelligence Offering Toolkit

## WHAT IT IS

Digital Shelf Analytics is an AI-powered platform helping brands take a data-driven approach to measuring, benchmarking and improving channel performance across retailers, markets, competitors

Commerce Intelligence enables retailers to make optimal merchandising, pricing and supply chain decisions by combining the power of competitive intelligence with advanced analytics and data science solutions.

## KEY BUSINESS OUTCOMES

### Digital Shelf Analytics:

- **Increased customer satisfaction** with consistent brand representation across retailer platforms
- Data-driven decisions impacting sales and savings in cost
- Coherent commerce and media strategies to create winning brands

### Commerce Intelligence:

- **Increased Revenue** - Drive growth through optimized assortments powered by real-time sales and market visibility
- **Margin Protection** - Safeguard profitability with pricing based on competitive intelligence
- **Enhanced Customer Experience** - Build loyalty through reliable on-time delivery and consistent fulfillment

## WEDGE

Can be delivered at ~~less than \$100k~~ USD, to 'open the door'.

## ENGAGEMENTS

Are ~~over \$100k~~ USD that you can sell individually or together.

Competitive Intelligence for Retailers

\$50-100 K USD

Digital Shelf Analytics for Brands

\$50-100K USD

Assortment Intelligence

\$75 K USD per 5 categories

Pricing Analytics

\$250K USD

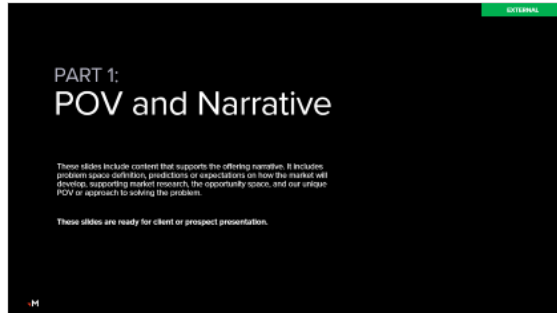

Supply Chain Analytics

>\$100K USD

Intelligence

# Retail's Changing Reality

## MARKET TRENDS AND SHIFTS

## CONSUMERS

## RETAILERS

### Tariffs, Government Policy Changes

are switching to more affordable brands, seeking out private label products

are urged to adopt more dynamic assortment strategies based on what is trending in the market

### Persistent Inflation

to continue shopping with smaller basket sizes, with a focus on necessities  
seek more “value” from every purchase, leaning towards discount retailers

are struggling to balance the need to raise prices with the risk of losing price-sensitive customers

### Ongoing Supply Chain Issues

expect consistent availability of products across channels

face challenges in sourcing products at a low cost and maintaining inventory levels in line with consumer demand

# Challenges that Retailers need to solve for...

Limited visibility into competitors' real-time strategies leads to reactive market approach

**Deliver near real-time competitive insights** that enable agile decision making on assortment, pricing, promotions & delivery times

Assortment decisions often rely on internal sales patterns, with limited alignment to market trends

**Optimize assortment breadth, rationalize SKUs, and strengthen private brand strategies** by integrating sales trends with competitive assortment benchmarking.

Product content inconsistencies impact customer buying experience

**Improve buying experience by optimizing product titles, descriptions, images, and attributes** to ensure consistency across touchpoints.

Rising costs & competition pricing, reduces margin opportunities

**Enable localized and competitive pricing decisions** that maximizes revenue & margins through AI powered pricing scenario simulations

Unavailable, Late, missed, or cancelled products erode customer trust and increase operational costs

**Drive operational efficiency in on time delivery** by tracking and predicting fulfillment issues before they happen.

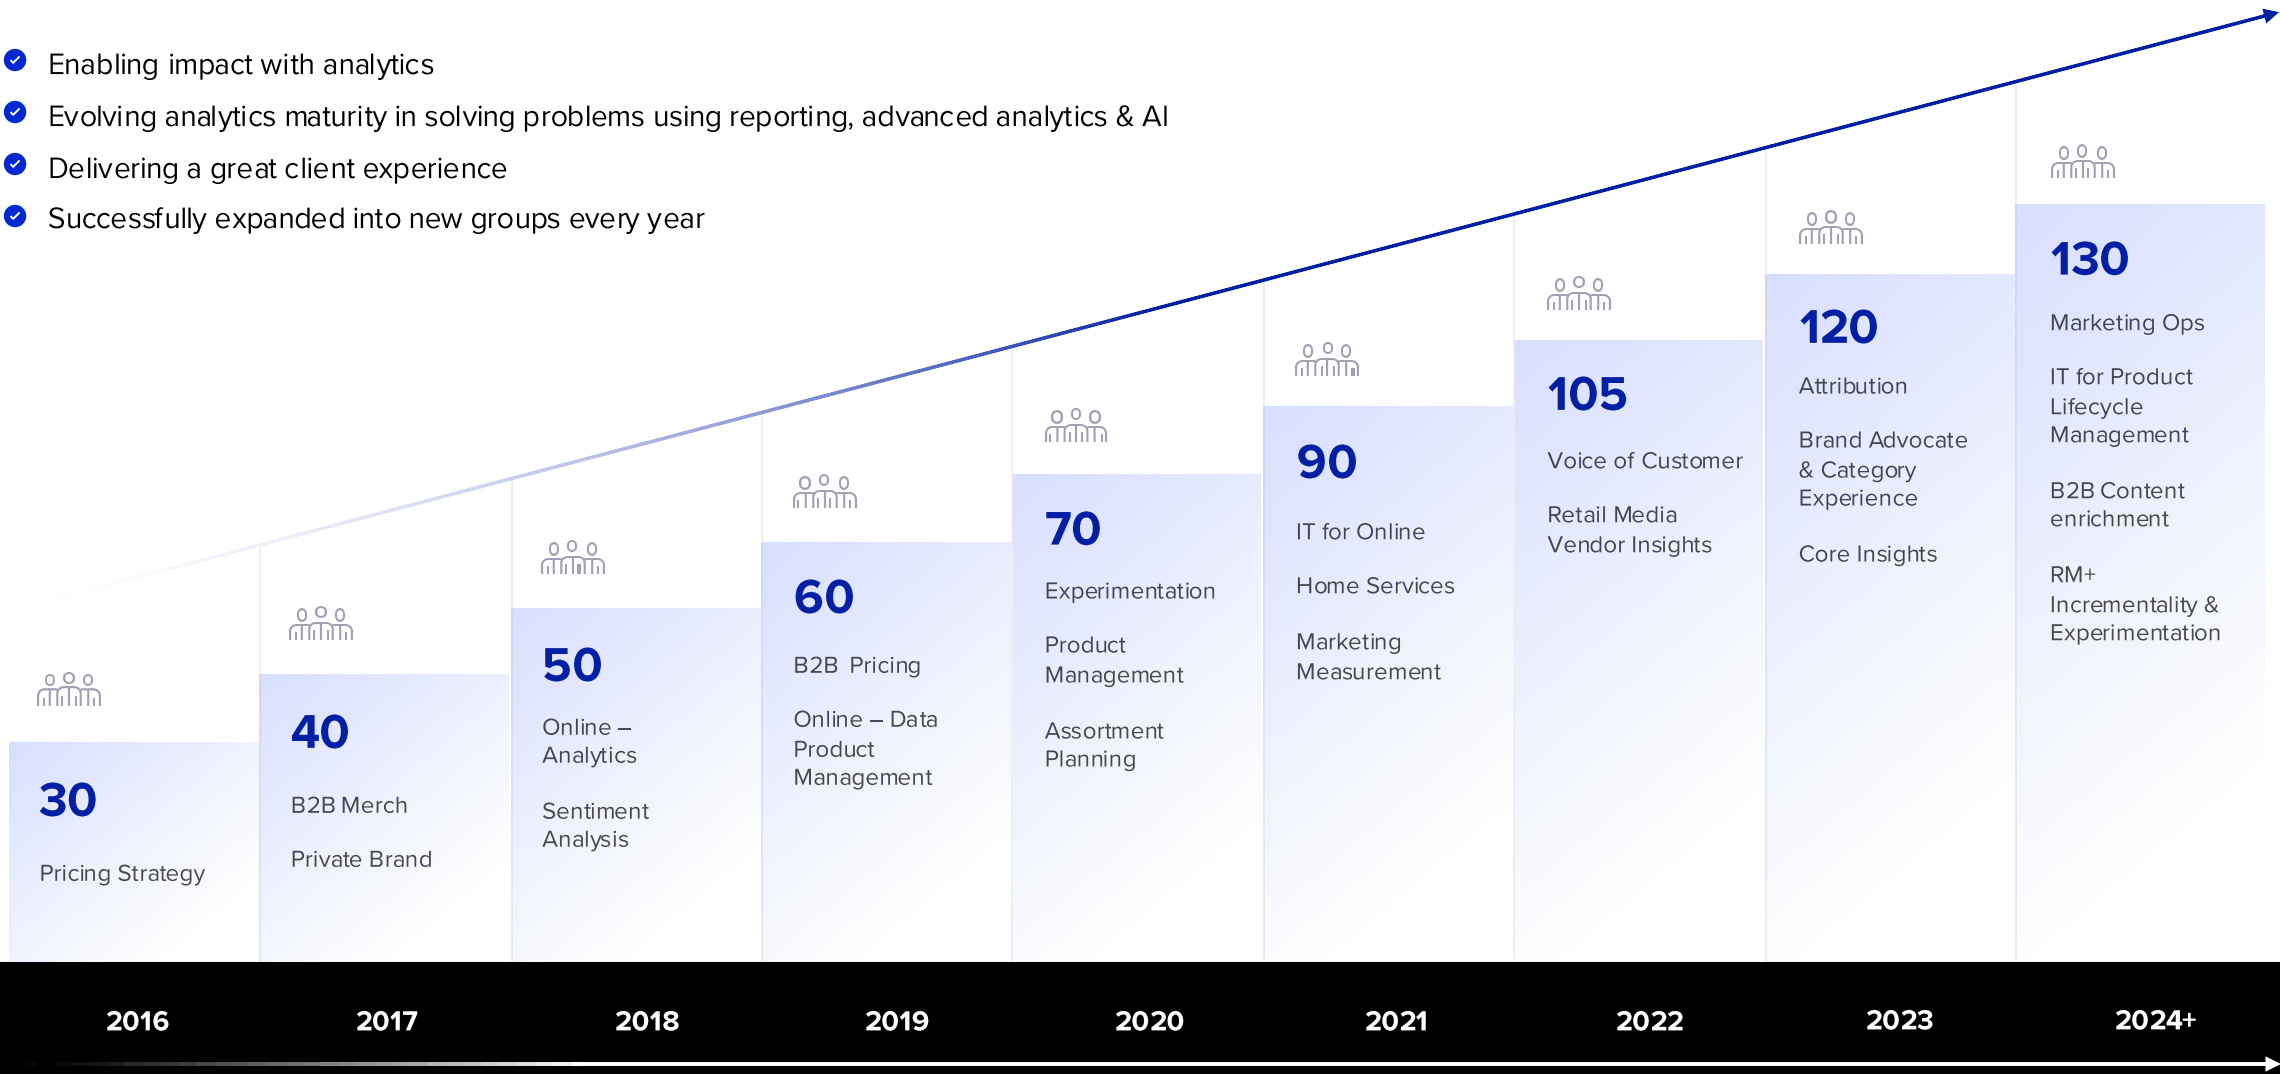

Inaccurate demand forecasting, leading to stockouts or overstock situations

**Accurate demand forecasts** that ensure the right quantity of assortments are available to meet evolving customer demand.

# Client Journeys

# Helping the world's largest Home Improvement Retailer make an Impact

- ✓ Enabling impact with analytics
- ✓ Evolving analytics maturity in solving problems using reporting, advanced analytics & AI
- ✓ Delivering a great client experience
- ✓ Successfully expanded into new groups every year

# Merkle helps drive impact across various groups for the world's largest Home Improvement Retailer

# Developing next-gen analytics capabilities for a specialty retailer

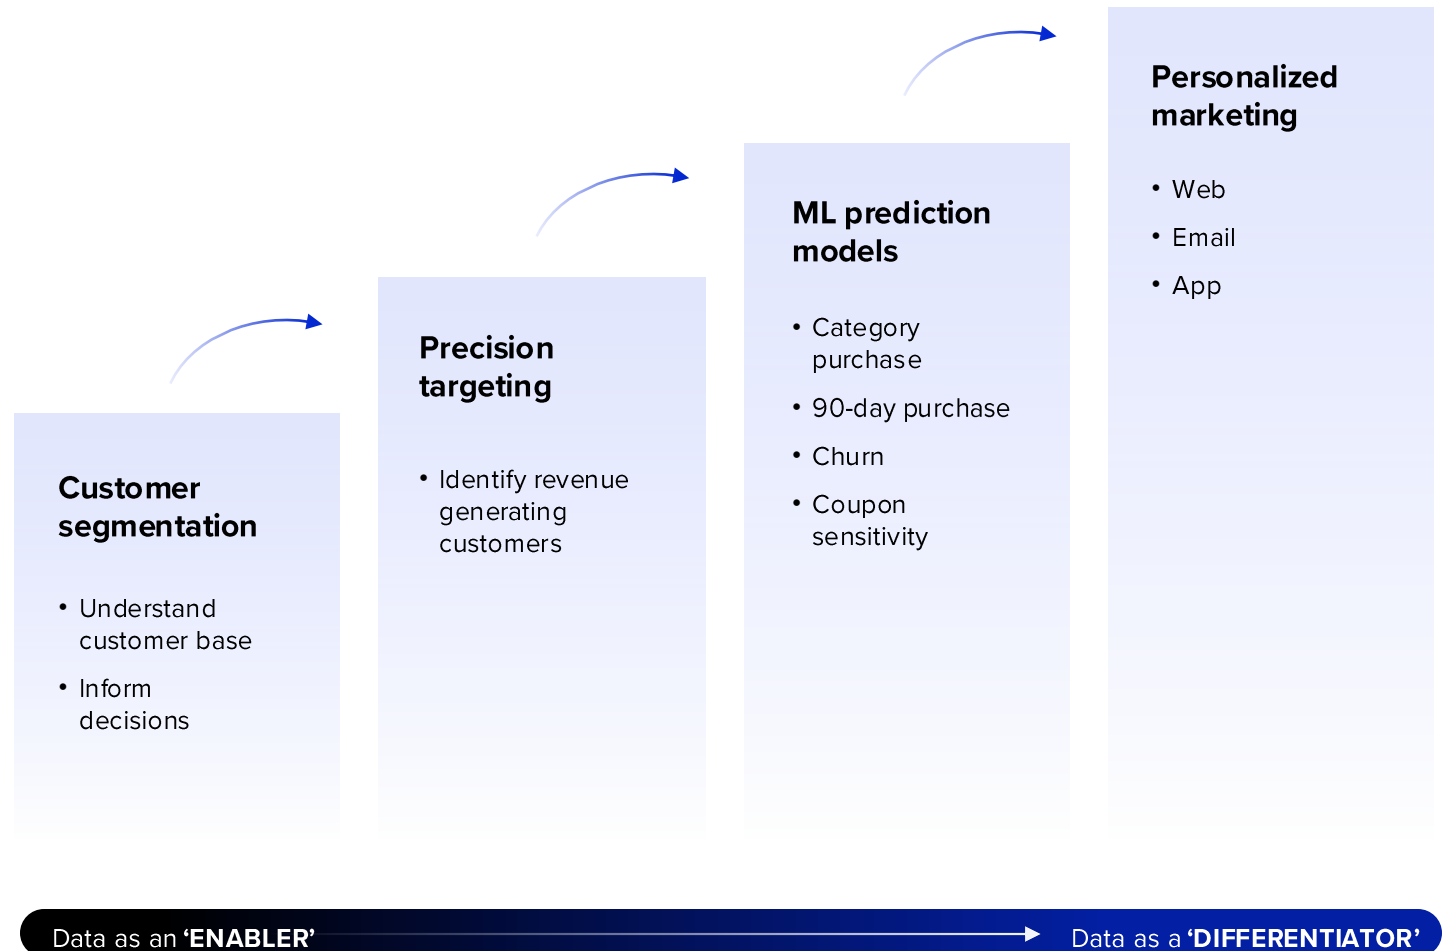

Building new capabilities to help the Customer & Marketing team mature in their journey to leverage data as a 'differentiator'

## BENEFITS DELIVERED

**Improved** customer understanding

**70%** accuracy in purchase prediction

**11%** increase in open rates

## PART 2:

# Case Studies and Why Merkle

This content provides reasons to believe that we are uniquely qualified to solve the client challenge presented in the preceding narrative.

Case studies should only be presented under NDA. If no NDA exists, the case studies should be blinded.

**These slides are ready for client or prospect presentation.**

# Assortment Gap Analysis Case Studies

# Analytics for range expansion for better category decisions

A U.S.-based retailer was looking to expand their range of home décor online. But their merchandising decisions were inward looking. Merkle combined competitive data with transaction data and search data to undertake a holistic analysis to: Identify trending products and product preferences, Analyze price competitiveness, Benchmark against product features and Analyze customer reviews and ratings.

**15%**

increase in overall  
operational efficiency

ASSORTMENT GAP ANALYSIS

“WHAT” are consumers buying?

Provides a comparison of assortment (at a feature level) to inform assortment gaps across private and national brands

WHAT IT TELLS US

- Gaps in our assortment vs competition
- Over or under assorted categories
- Star ratings of private and national brands
- Products and brands sales \$\$\$ contribution
- Trending products across all retailers
- Google search trends

DATA SOURCE

Retailer websites

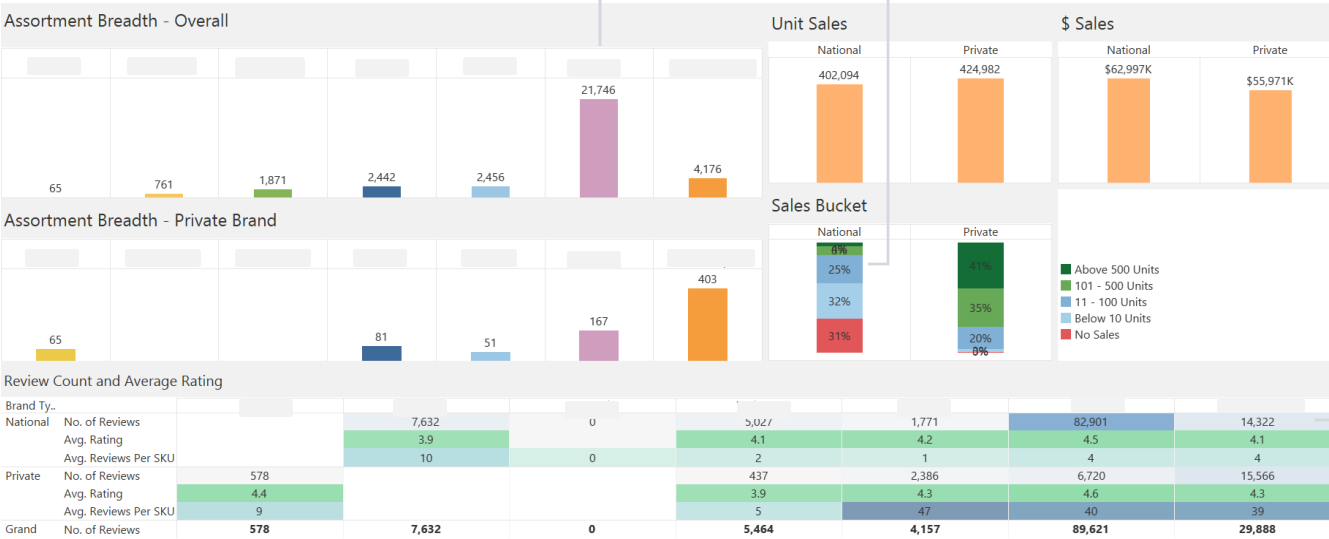

Retailer5

carries the **highest** assortment in the category  
~5X vs. Retailer6

Retailer6

carries the **maximum** assortment on Private brands  
~2.5X vs. Retailer5

~30% of the national brand assortment on Retailer6 had no sales in 1 year

Retailer5

gets highest reviews and ratings on national brands

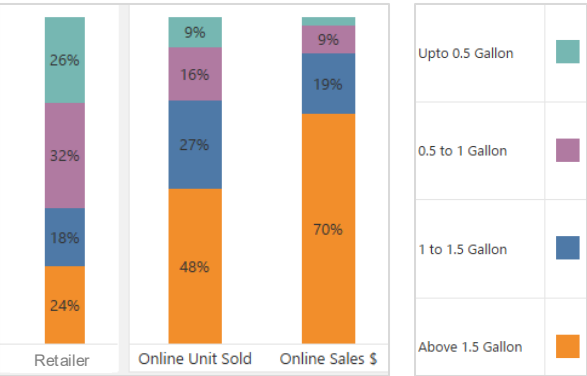

Retailer6

generates highest reviews but lower rating on private brands

# Assortment and product development actions – Humidifiers

## Recommendations

Humidifiers with a **larger capacity** seem to have a higher conversion into unit and dollar sales for Retailer

**Ultrasonic humidifiers that are top fill** is the top trending attribute combination that we can introduce as a private brand SKU

Humidifier Type - Ultrasonic  
Capacity - 0.5 to 1 Gallon  
Room Size - Small  
Speed - 2  
Run Time - 24 Hrs

## Actions Taken

Introduced 4 new humidifiers.

### PRODUCT 1

**Low price point**, top fill Ultrasonic Humidifier

### PRODUCT 2

**Mid price point**, top fill Ultrasonic Humidifier with increased capacity, dual direction nozzle, and a water level indicator

### PRODUCT 3

**Mid price point**, increased capacity and more features while keeping the price constant

### PRODUCT 4

**High price point**, combination of all trending features from competitor SKUs

# Pricing Intelligence Case Studies

# Strengthening foundation and enabling price actions for a rural lifestyle retail

A Rural Lifestyle Retailer wanted to grow digital revenue by 2x in 5 years through strategic pricing, tackling unsold products and adapting to online price transparency. Barriers included lack of active management of digital pricing, store-based pricing being ineffective online, comparative pricing across retailers influencing customer decisions, etc. Merkle implemented a clustering and testing approach to understand the retailers current state of pricing and recommended 3 test and learn objectives and drove data driven price actions to support digital growth. This scalable solution provided the client with real-time test result visibility of the outcomes through self serve dashboards and clear recommendations on price actions.

**\$3MM**

# Driving price optimization for a workplace distributor

A distributor of workplace essentials needed to validate whether its pricing strategy aligned with customer expectations on key value items, amid concerns raised by sales teams about price sensitivity. Initial attempts to gather pricing insights manually were slow and cumbersome. Merkle deployed an analytics-led, systematic approach to collect accurate, timely pricing data on key value items. This scalable solution provided the client with a clear and objective view of their price position, enabling them to make informed pricing decisions and optimize value without sacrificing competitiveness.

# Analytics-led pricing optimization for a QSR

A Fortune 200 QSR chain sought to improve operating margins but struggled with low franchisee confidence due to inconsistent pricing across stores and outdated forecasting models.

Merkle deployed an analytics-led pricing transformation by segmenting stores using observable traits, conducting conjoint studies to capture willingness to pay, synthesizing competitor and internal sales data, and recommending analytics-backed item-level pricing strategies that drove consistency and confidence at scale.

**90%**

franchisee adoption

# Last Mile Case Studies

## LAST MILE

# Retail company reduces cancellations with data-driven insights

## BUSINESS CHALLENGE

A leading Australian, retail company, aimed to enhance their fulfillment rate by addressing product cancellations. Client lacked granular data to identify specific products and reason behind increased cancellations, affecting inventory management and overall operational efficiency.

## MERKLE SOLUTION

Merkle extracted cancellation data, utilized Snowflake, Power BI to build a dashboard providing insights into products with higher cancellations, identifying departments facing inventory issues.

- Performed deep dive analysis to highlight key SKUs, department contributing to the cancellation, along with the reason for cancellation both from store and customer perspective
- Created a scorecard to keep track of store and customer cancellation across departments, RBUs

**48%**

decline in cancelled \$ value

# Enhance CX & build brand loyalty by pre-emptively identifying 'At-Risk orders'

Harnessed the power of GenAI and LLMs to identify orders with compounding issues using customer conversations. Stitched together conversational data from 5 different contact center sources: customer chats, call transcripts, IVR interactions, agent notes, and even system generated order notes. By extracting sensitive markers and predicting potential customer escalations, we focus our efforts on resolving the most critical "At Risk" orders. Implicit markers like negative sentiment and explicit markers like threats of direct escalations, social media defamation and legal threats were analyzed. Powers of LLMs when combined with machine learning to evaluate operational signals, the insights allowed us to determine top At-Risk orders and promote prioritized resolution- keeping customers happy, from taking to Twitter.

# Retailer optimizes delivery with GenAI-powered route intelligence

BUSINESS CHALLENGE

US home improvement retailer faced high costs due to missed deliveries, inability to pre-emptively flag orders with delivery risks, and outdated information about job site conditions. These issues impacted customer satisfaction and operational efficiency. Merkle implemented a GenAI-powered solution to optimize delivery routes and enhance job site understanding.

MERKLE SOLUTION

Merkle implemented Route Intelligence to generate actionable insights on customer job sites from Google Maps images, analyze delivery preferences, and flag orders with delivery risks.

- Utilized Google Maps images and API to understand job site conditions, combining street view images captured at 0°, 90°, 180°, and 270°, and marking job site locations using satellite images.
- Analyzed customer delivery preferences to tailor routes.
- Used ML-based delivery risk scores to identify high-risk orders, employing Vertex AI & XGBoost for risk scoring.
- Identified potential delivery problems using natural language processing (NLP) and integrated AccuWeather data for weather-related delivery risks.

# DSA Case Studies

# Elevating market share and driving revenue through paid and organic actions

## BUSINESS CHALLENGE

A French luxury conglomerate wanted to increase their revenue and share of market. This was difficult to do as they owned multiple brands which were available across retailers, and they didn't have a consolidated view of all the related metrics to meet their goals.

## MERKLE SOLUTION

Merkle deployed our in-house digital shelf analytics solution which helped us monitor all metrics against set KPIs and landing pages. Focused negotiation competitors:

- We found that we had a low share of shelf compared to the best and average competition. We had low positions for perfume-related keywords. Additionally, we had significantly lower banner exposure than best competitor. Based on this insight we:
- Negotiated paid exposure and sponsored listings across beauty and fragrance s on pages, keywords and banners where share was low to none.

**2**

Ranks movement  
of market share

**#1**

Position in cyber  
week exposures

**\$5mm**

Incremental revenue delivered within a year  
through better negotiated digital exposure

# A playbook for new product launches and driving early engagement

## BUSINESS CHALLENGE

A skincare brand was launching a new product which received average page position in the moisturizer category across retailers and average rank on keywords search results. Low visibility impacted customer acceptance and sales.

## MERKLE SOLUTION

Merkle's digital shelf analytics solution helped us get detailed insights into the product launch so we could drive engagement:

- **Negotiated hard ranking** for initial 8 weeks with 2 of its retail partners for its moisturizer and face cream launches
- **Negotiated paid exposures** on skincare landing and category pages, through focused banner placements in "just arrived" and "editors pick" carousels

# Optimizing margins with competitive price intelligence at scale

## BUSINESS CHALLENGE

A multinational technology company wanted to boost their margins. Their pricing team wanted competitive price intelligence to optimize daily price position across markets. However, scaling for multiple geographies and languages, was difficult. Additionally, their previous vendor took 15 days to provide insights, delaying client's decision-making and response to market.

## MERKLE SOLUTION

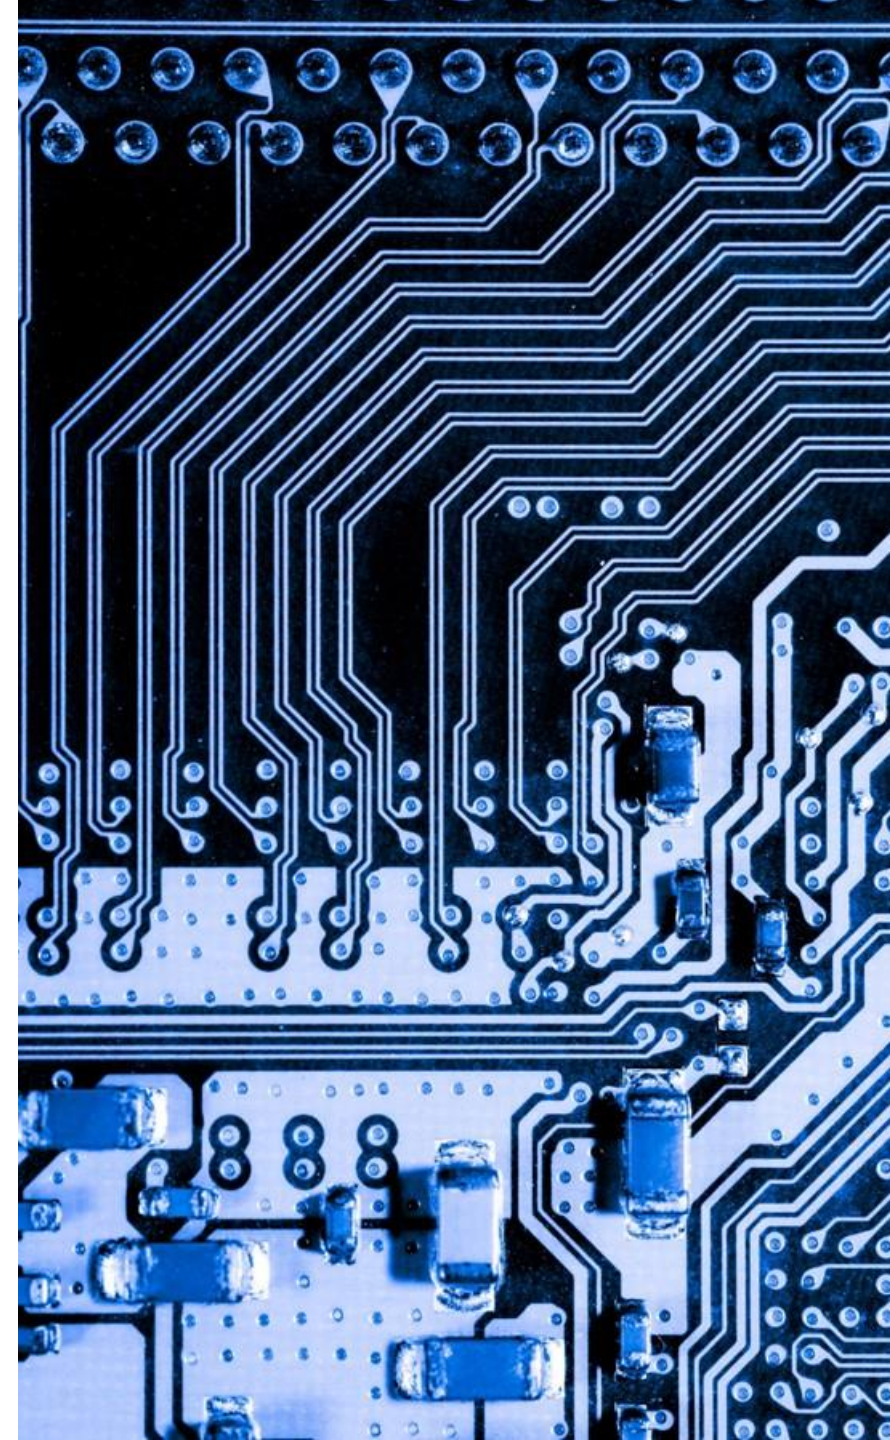

- Digital shelf analytics was leveraged to provided daily competitive price intelligence for 42 brands across 46 retailers, in 13 countries.
- Drastically improved competitiveness with price changes and insights delivered in 4 hours from the previous benchmark of 15 days.
- The complex and scalable process helped us get competitive price intelligence, helping boost our margins.

## Increased

Brand agility in addressing a highly price elastic market, leading to improved margins and revenue

## 98%

Improvement in speed, with 4 hours taken to provide competitive intelligence and insights

# Driving eCommerce growth through better channel content interventions

## BUSINESS CHALLENGE

A global technology manufacturer wanted to improve their digital presence across channel partners. This would level up their online presence and improve the global business. They needed a systematic approach to improve product content, performance, production and stocking.

## MERKLE SOLUTION

We set-up infrastructure and capabilities to track client partners' websites globally across 39 countries which helped:

- Track 80+ content elements including keyword position, product description, image quality, product ratings.
- Regularly monitor and deliver automated reports on KPIs such as, digital shelf, product content compliance, stock status.

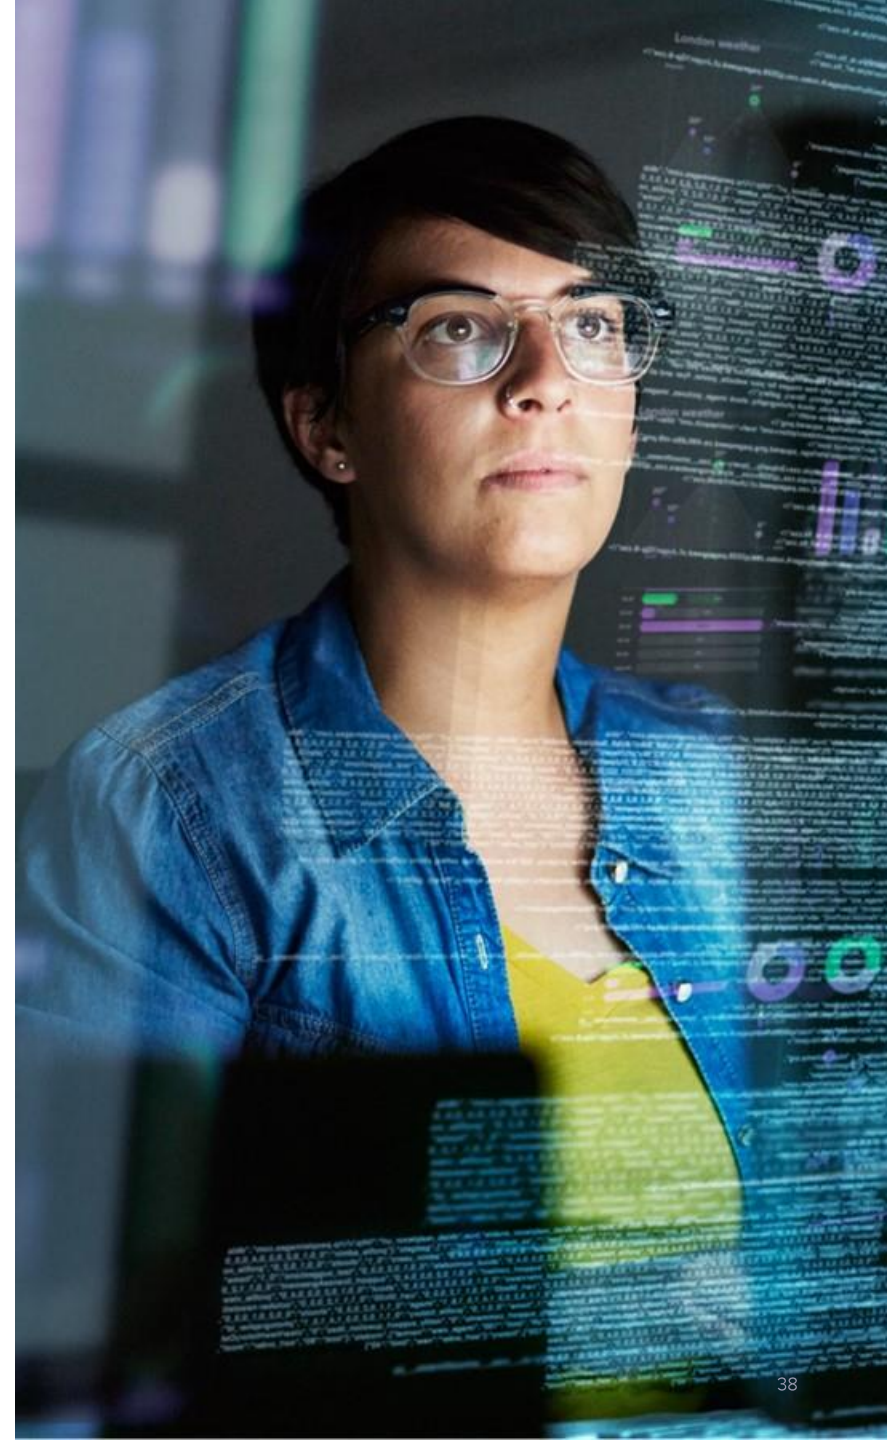

This helped us fix gaps in product content to enable confident purchases. We were able to incentivize good performance with better deals, promotions, etc. and have better production and stocking to reduce lost sales

## 20M

Data points monitored daily

## Reduced

Lost sales with better production and stocking insights spanning across 800 retailers, over 5k products

DSA

# Pricing program management for a quick service restaurant (QSR)

## BUSINESS CHALLENGE

A large QSR chain wanted to improve its operating margins by transforming its current pricing strategy and processes. Its pricing strategy relied excessively on historical data and inadequate forecasting models to predict demand and consumers' willingness to pay. There was limited adoption by franchisees of the price recommendations, which meant that the pricing methodology was a black box. The price inconsistency across stores and channel-mix led to low confidence.

## MERKLE SOLUTION

We devised a 5-pronged solution to transform pricing:

- Created a collaborative approach to enable implementation recommended price changes in local markets
- Understood store segments and tied restaurants to observable traits for better pricing consistency
- Understood consumer willingness to pay through conjoint study
- Synthesized data from competitors, internal sales, and promotions
- Recommended item-level prices backed by analytics

This collaborative approach increased client visibility into its stores and Increased trust and adoption within franchisees.

DSA

# Leveraging consumer sentiments to build customer-centric products

## BUSINESS CHALLENGE

A leading omnichannel US retailer wanted to understand consumer sentiments from various data sources. They needed a scalable solution to analyze these sentiments and derive pragmatic insights to aid private label product development.

## MERKLE SOLUTION

- Developed a framework to analyze context, category, competitors, and attributes.
- Got customer sentiment from reviews and internal sales data and converted it into pragmatic insights.
- Institutionalized the method and extended it to more categories for a technology-led scalable solution.
- Benchmarked testing points for product engineering team and aided private label product development.

**30%**

Faster insights

**25%**

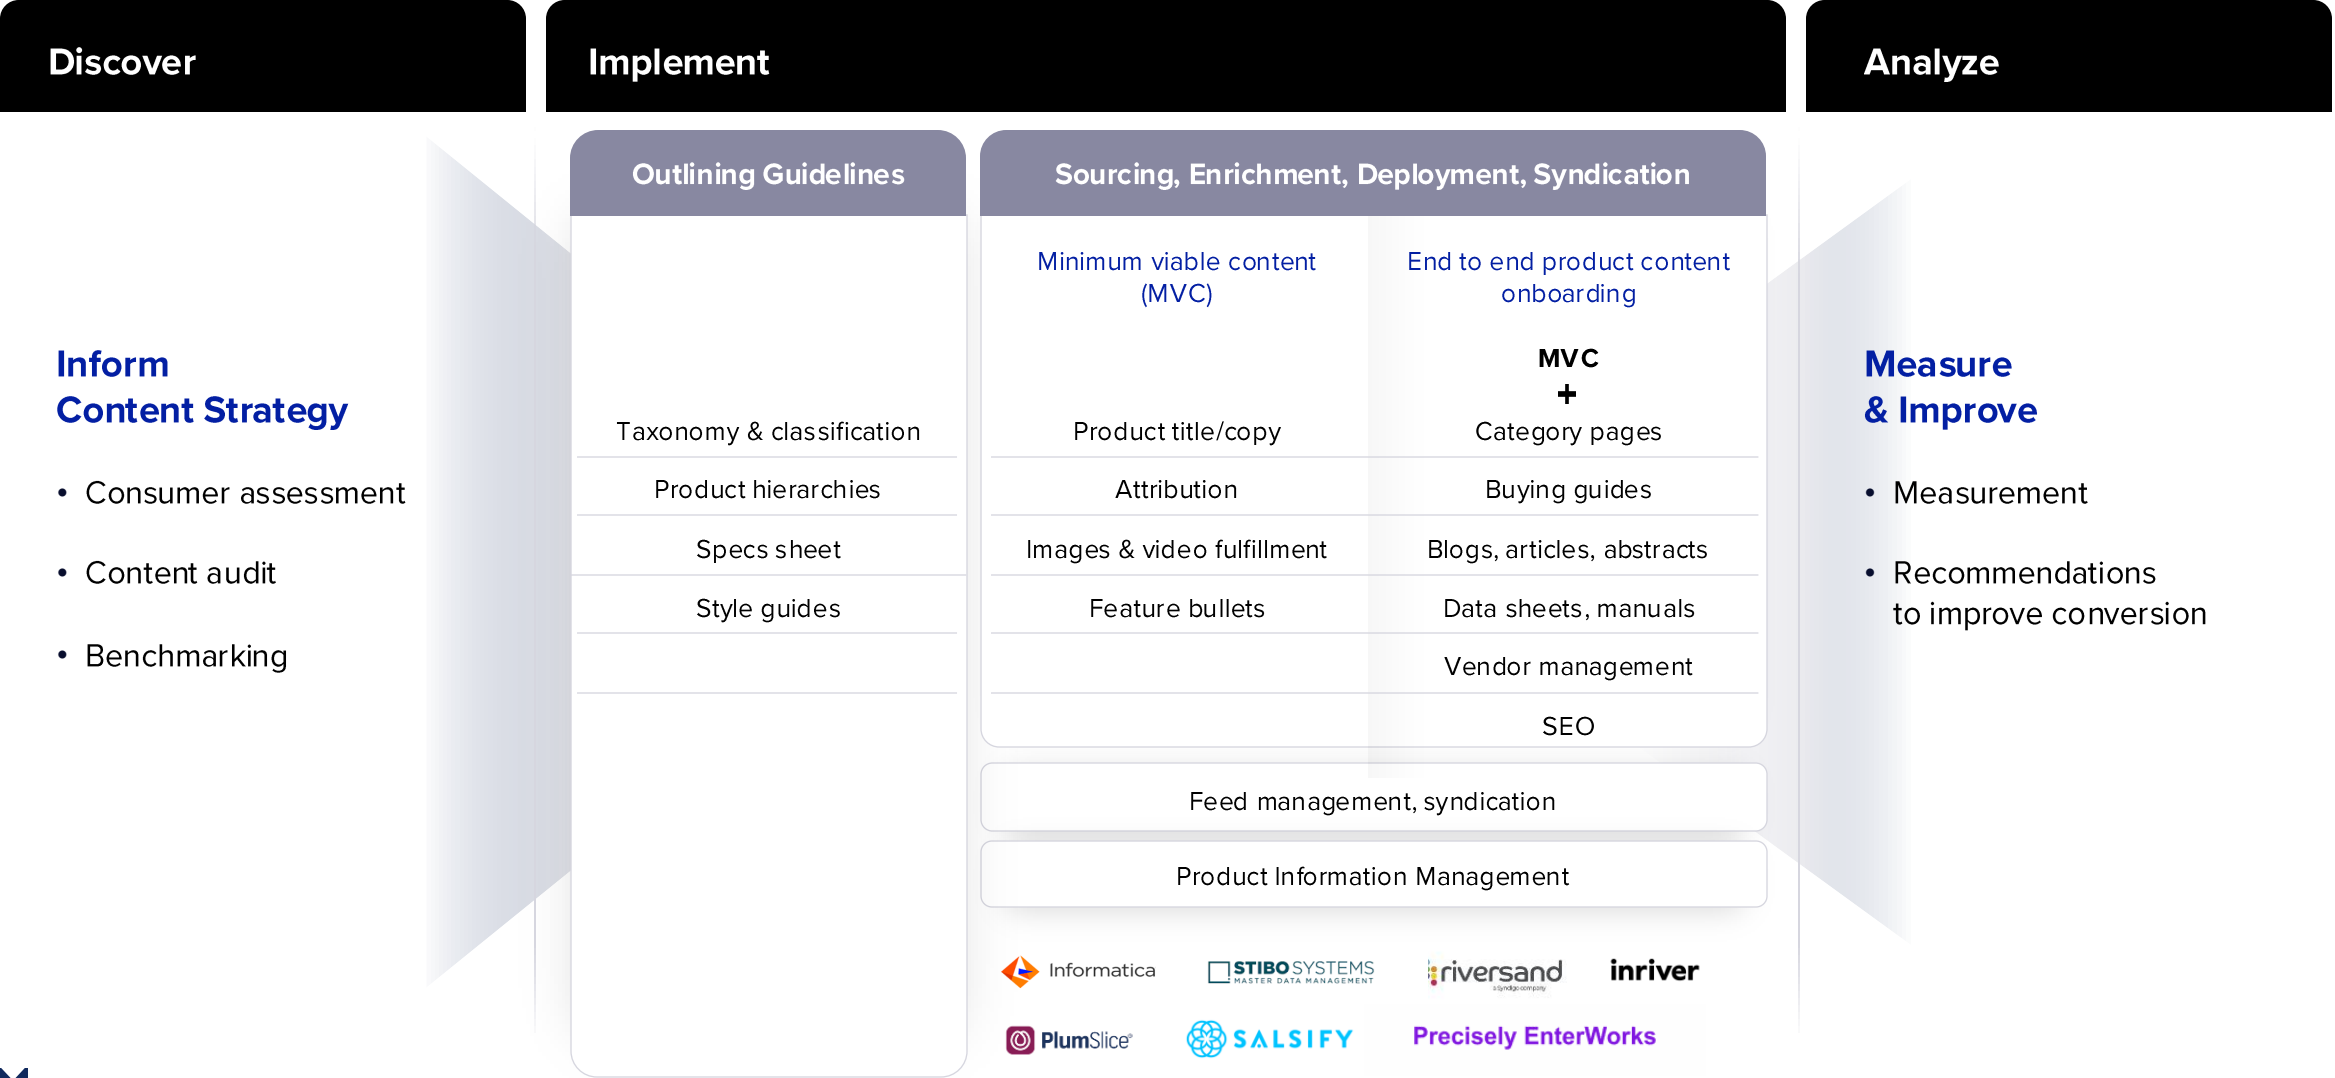

Cost reduction in getting customer feedback analysis

Fenty Treatz Hydrating + Strengthening Lip Oil — Kalahari ...

Web Fenty Beauty by Rihanna was created with promise of inclusion for all women. With an unmatched offering of shades and colors for ALL skin tones, you'll never look elsewhere for your beauty staples. Browse our foundation line, lip colors, and so much more.

Brand: Fenty Skin Availability: In stock

## DETAILS

### PLUMP N JUICY LIPS

#### STRAIGHT UP:

Your moisture barrier is your lips' first line of defense against the elements—keep it strong and it'll stay more hydrated, smoother-looking and flake-free. This ultra-hydrating, non-sticky lip oil goes on clear and keeps lips' moisture barrier on lock.

#### THE LOWDOWN:

- Hydrates and strengthens the lips' moisture barrier for fuller-looking lips
- Antioxidant-rich formula defends lips against environmental stressors
- Instantly conditions and softens lips, improving lips' texture over time
- Nourishes dry, chapped lips + plumps with hydration
- Jojoba Seed and Rosehip Fruit Oils bind moisture to lips
- Clear, non-sticky formula
- Ultra-plush doe-foot applicator

#### WHAT ELSE?!

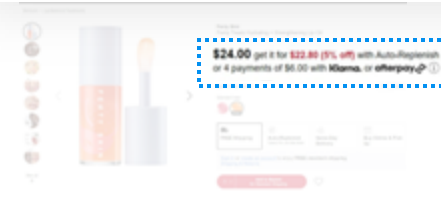

For all skin types. Vegan, cruelty-free, gluten-free, & earth-conscious.

# Competitive Intelligence

RETAIL MARKET INTELLIGENCE

OCTOBER 2025

# Merkle's Digital Shelf for Retailers

is an AI powered Market Intelligence solution that enables retailers improve online store performance across product categories through actionable insights on

Pricing,  
Assortment and  
Consumer Sentiments

# It enables retailers to make agile decisions on Assortment, Pricing and Promotions

## HOW?

**Category Intelligence:** allows the retailers

- to stock brands and SKUs with attributes that consumers value when purchasing a category

**Competitive Intelligence:** allows the retailer to

- dynamically adapt by adding, removing and retaining SKUs in line with competitors' assortments
- offer discounts and allocate promotion budgets based on competitors' promotion strategies

# Tactics, Strategies and Questions the solution answers

What is selling in the market for a category?

What attributes matter to consumers while choosing a product?

Are my private label brands designed with features that consumer want?

How am I fairing on the range of products I am offering in a category?

Is it too less or too much or optimal?

What discounts are competition offering on my top selling and other products?

Am I at risk of revenue or margin loss?

Am I carrying the right brands for a category?

Where do I have Price advantage?

Where can I cut down or offer more discounts for better returns on my promotion budgets?

# So What?

## What's the Business Impact?

### **SALES**

Increase in sales through assortments and pricing strategies optimized with competitor intelligence and category trends

### **STRATEGIC BUSINESS GROWTH**

Increase in business growth through identification of opportunities viable for category growth, category expansion, new launches and private label penetration

### **MARGINS**

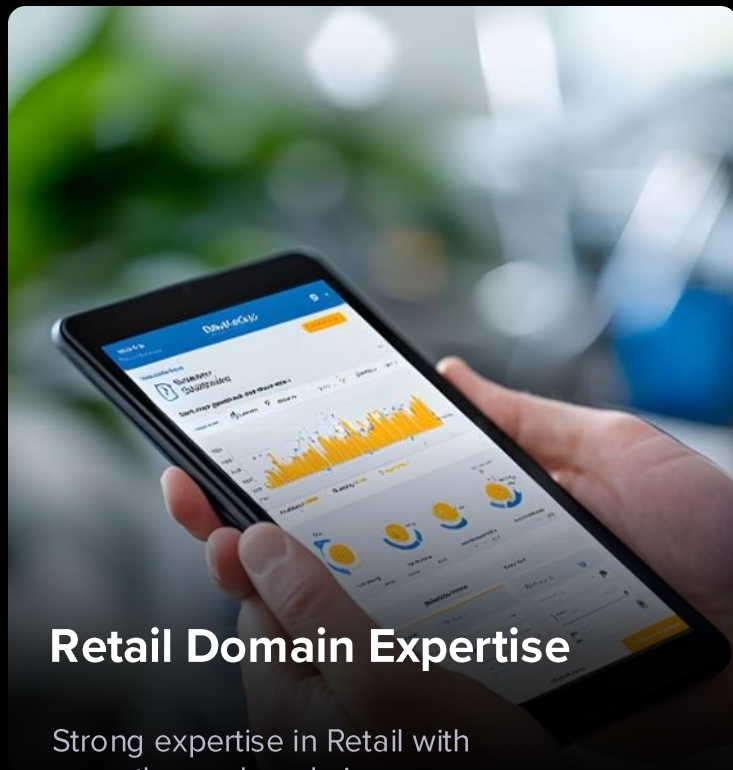

Increased margins through real time intelligence on price changes by competition  
Increase in ROI on promotions

### **OPERATIONAL EFFICIENCY**

Reduction in costs with improvements in operational efficiencies on inventory and sourcing

# Why Merkle?

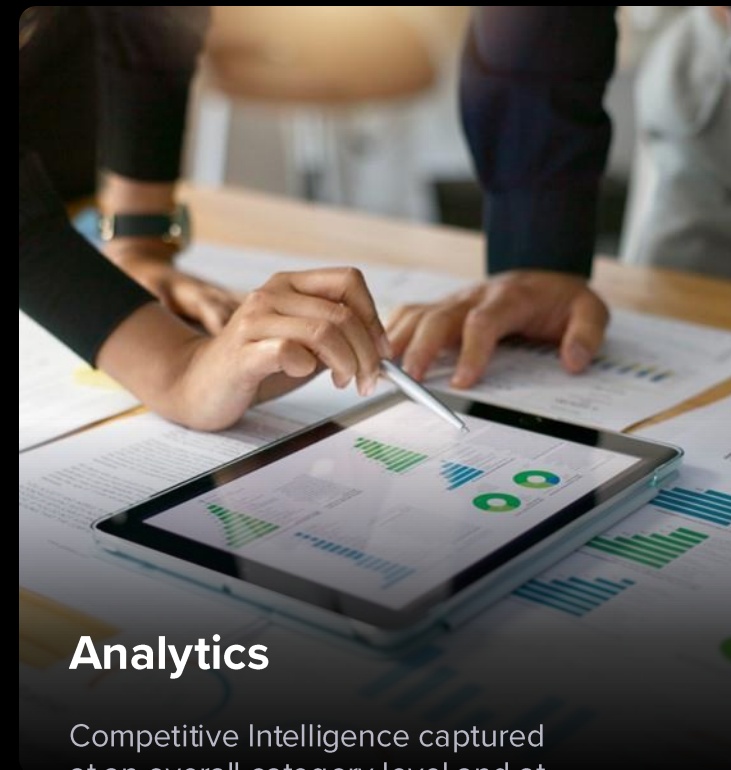

## Retail Domain Expertise

Strong expertise in Retail with more than a decade in enabling clientele across Big Box, niche and specialty retailers

## Technology

A powerful & advanced web scraping platform to collect competitive prices frequently. The platform has a suite of products built on python, RPA, and Selenium

## Analytics

Competitive Intelligence captured at an overall category level and at a granular SKU level

Actionable analysis that brings agility to your decisions and market responsiveness

# Enhancing competitiveness with commerce intelligence

### BUSINESS CHALLENGE

A large US marketplace aims to significantly increase the scale of its marketplace business leveraging 3rd party sellers. The sellers must maintain price consistency across competitors. The client needs comprehensive competitor information, particularly in price intelligence for ~3M SKUs and shipping times for 400K SKUs across 120 ZIP codes, to negotiate better deals with sellers.

### MERKLE SOLUTION

After extensive consultation, the client chose Dentsu Global Services for its advanced capabilities and scalability of digital shelf analytics. We were able to:

- Manage the large scale and seasonal volume fluctuations on time
- Accurately match client products with competitors
- Retrieve regular and promotional pricing for detailed analysis
- Get timely and accurate shipping speed data across ZIP codes

This has transformed how the client makes strategic decisions. Through **95%+** product matching accuracy and intelligent insights, they have been able to negotiate better details with sellers, improving conversion rates, sales, and customer experience.

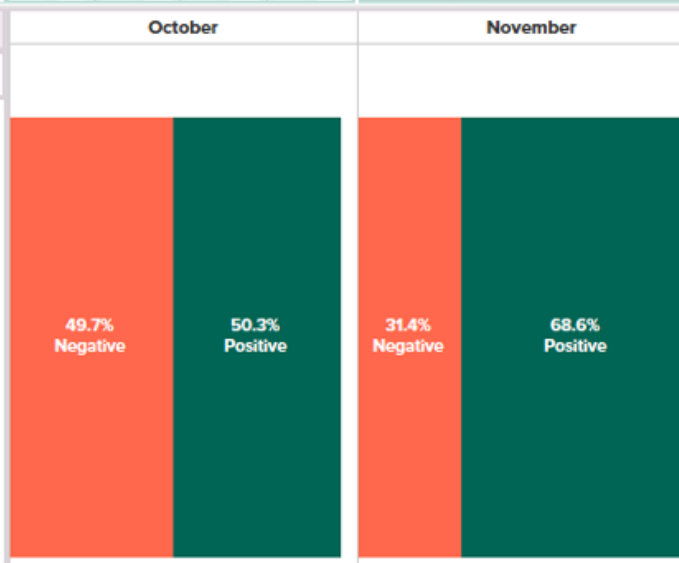

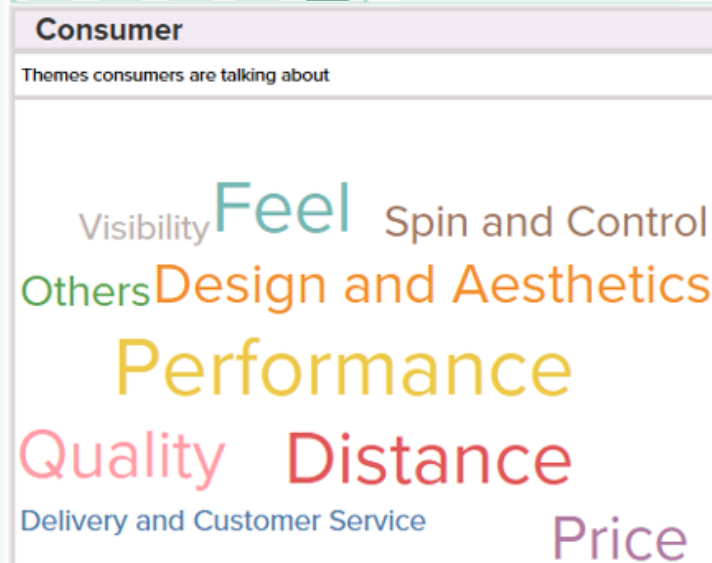

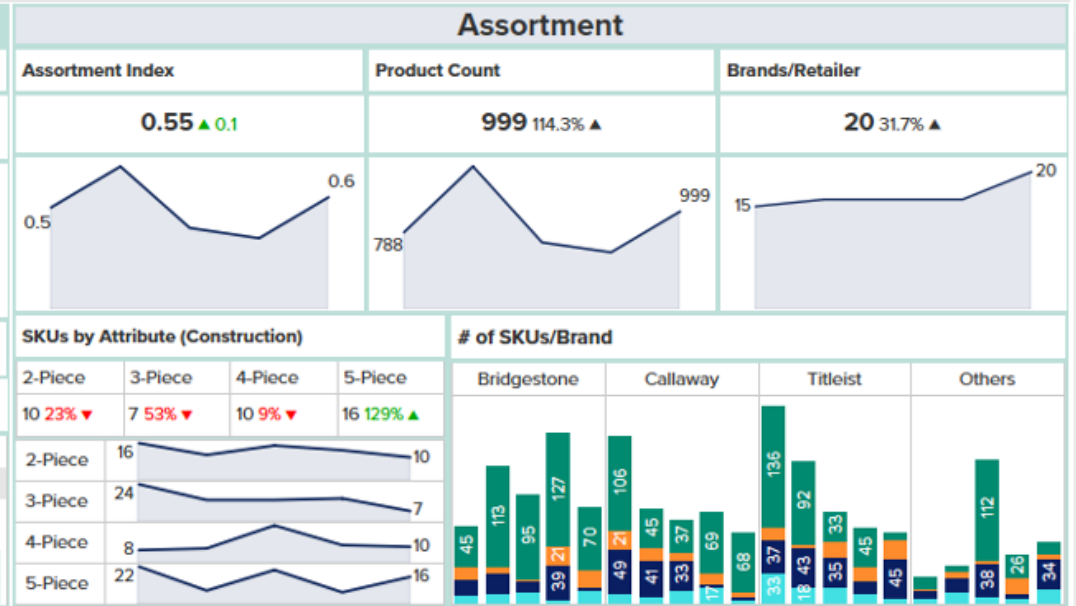

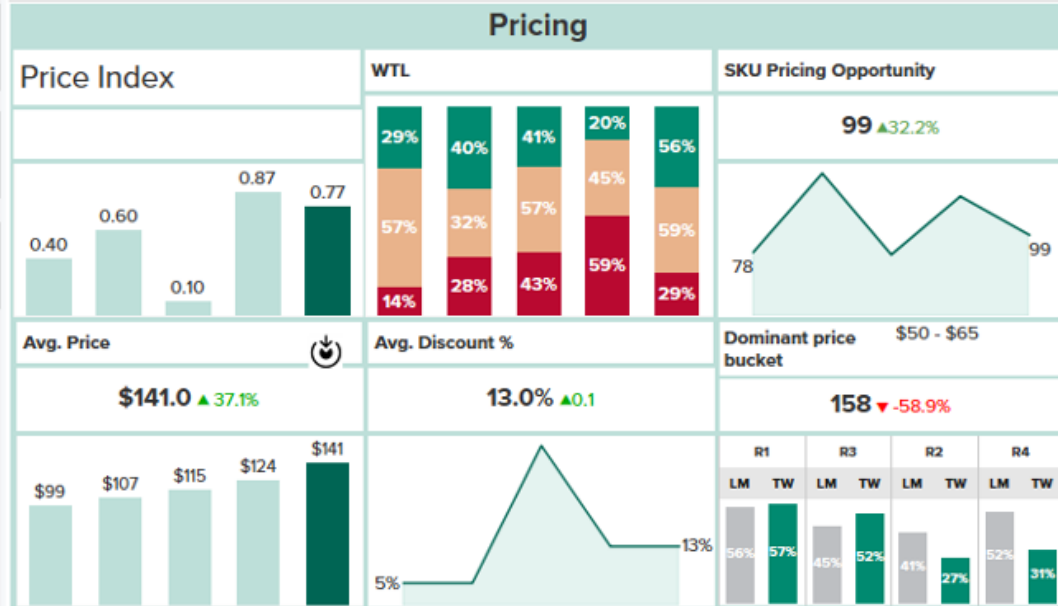

**18%**

Increase in product coverage to date

**100%**

On-time processing despite large volumes

# Sales Guidance

Help selling through the offering, from handling objections to understanding similar/competitive offerings where they exist.

## GUIDANCE AND GUIDELINES

Clients typically come to us in 3 ways:

### WAY IN #1 – Brand Equity

Client wants to set and enforce global standards for e-commerce operations. Either implement this for a house of brands or across multiple partners selling online.

### WAY IN #2 – Strategic planning

A successful e-commerce business means not only streamlining one's own operations but also closely following competition across the globe. Master both these aspects enabling data-driven strategic planning.

### WAY IN #3 – Plan media spends and evaluate impact

Media investments on retailer platforms are on the rise and lack performance & competitive insights. The tool offers insights into self and competitor positions across various retailer platforms directing effective media spends.

## PART 4: TRAINING

## Digital Shelf Analytics

# Sales Guidance

Help selling through the offering, from handling objections to understanding similar/competitive offerings where they exist.

## WHAT TO LISTEN FOR

### Operating model improvements

- “How are my products represented across retailers globally? Do they represent a coherent brand message?”
- “How can I improve inventory allocation across stores?”
- “Do reviews and ratings on my products elude customer confidence?”

### Get value from data and technology

- “How fast and accurately can I assess changes in competition that have a direct impact on my business?”
- “How can I manage a global business spanning across countries, in multiple languages and across varied retailers effectively?”

### Be more agile

- “Can my marketing strategies be more real-time, taking into account stock-outs, price hikes etc. from competitors?”
- “How do I make cross functional teams more effective?”
- “How can I assess impact of new products in a real time and take corrective actions, if needed?”

### Product improvements

- “Are we holding the right product mix? How are customers perceiving our current offerings? How does it fare with competition?”
- “How do I become leaner and nimbler to compete with new players?”
- “How do I bring together sales, service and brand?”

### Bring together channels

- “How do I take a more “omnichannel” approach?”
- “How do I bridge silos between teams under different departments? Is there a single tool that can be leveraged by all?”

### Data driven decisions

- “Where do I allocate trade media spends to drive maximum ROI?”
- “What deeper insights can I get to understand impact of media spends?”
- “Are my products competitive on aspects like pricing, delivery, range etc? Who is my closest competitor?”
- “How do I become leaner and nimbler to compete with new players?”

## PART 4: TRAINING

## YOUR 1-PAGE SUMMARY

## DIGITAL SHELF AND COMMERCE INTELLIGENCE

# Digital Shelf Analytics

## BUSINESS CHALLENGES

Inconsistent customer experience across Retailer platforms tarnishing brand image.

Low competitor visibility with strategy, pricing, promotions and availability across retailer platforms.

Model media spends on RMNs / on Retailer platforms to drive ROAS. Understanding promotion cycles across Retailer platforms and competition positioning.

## OBJECTIVE

Assess brand compliance across various KPIs like content, price, promo, ratings and reviews, visibility and more with an AI-powered platform to take a data-driven approach to measure, benchmark and improve channel performance across retailers, markets, competitors.

## CLIENT

LVMH, COTY, Intel, HP, Williams Sonoma

## APPROACH AND DELIVERABLES

- Conduct discovery sessions to understand brands business needs to spearhead e-commerce sales
- Identify retailer platforms, competitors and metrics that define a winning strategy for the team
- Collect information and trends across retailer platforms to analyse trends impacting performance
- Work with commerce and media teams to develop strategies that help win the digital shelf across markets, retailers and competitors
- Deliverables:
  - An always-on dashboard showcasing insights across key KPIs impacting performance
  - Regular cadence with client teams highlighting key changes and impact on strategy

**Investment:** 20k - \$140k

**Timing:** 6 weeks

### Outcomes:

- Increased customer satisfaction with consistent brand representation across retailer platforms
- Data-driven decisions impacting sales and savings in cost
- Coherent commerce and media strategies to create winning brands

# Buyers and Industries

Understand our buyer and their motivation as well as the outcomes we deliver that help them meet their goals. Dive into industry-specific considerations.

## PRIMARY AUDIENCE

### Retail Account Managers / Client Relationship Groups / ESLs / ISLs

Responsible for overall or focused aspects of E-commerce, Merchandising, Marketing, Pricing and Supply Chain teams across Retailers.

## TARGET INDUSTRIES

Applicable to all retailers across Department Stores, Supermarkets, Specialty Retailers, QSRs, Convenience Stores & Discount Stores

### Concern #1

Limited visibility to real-time market intelligence results in assortment decisions that are misaligned with evolving consumer preferences and competitive trends.

### Concern #2

Rising costs due to macroeconomic factors, the need for competitive pricing usually drives suboptimal pricing decisions leading to margin erosions

### Concern #3

Inadequate product availability and inaccurate demand forecasting lead to stockouts, overstock, and operational inefficiencies, eroding customer trust.

## PRIMARY OUTCOMES

| Outcome                      | Why it Matters                                                                              |
|------------------------------|---------------------------------------------------------------------------------------------|
| Improved Revenue             | Drive growth through optimized assortments powered by real-time sales and market visibility |
| Margin Protection            | Safeguard profitability with pricing based on competitive intelligence                      |
| Increased Demand             | Boost search traffic through enriched product content and catalog quality                   |
| Improved Conversion          | Enhance purchase rates by aligning assortments & pricing with customer preferences          |
| Enhanced Customer Experience | Build loyalty through reliable on-time delivery and consistent fulfillment                  |

# Commercial Guidance

Guidance on price point, market size, and competitive landscape for an offering in a given market.

Client-facing pricing slides for each engagement can be found on slides in the what we sell section of this toolkit.

Key competitors

The Global Capability Centres for all the Retailers

The Global Capability Centres (GCCs) for the Retailers are HQ extensions in India and possibly few other locations in the world. These GCCs partner very closely with their HQs teams to solve their business problems either through analytics as services or build data and analytical products.

Analytics Services Organizations (Example: Mu Sigma, Fractal Analytics, Tiger Analytics, etc.)

These companies also provide analytics services to various clients to solve their business problems. Typically, headquartered in the US, they have delivery centers in India that deliver analytical projects to the clients

Analytics Product & Solutions Organizations

Product Organizations have off the shelf AI products that would help retailers with assortment intelligence, pricing and supply chain management decisions.

Examples:

BlueYonder – Assortment Intelligence & End to end supply chain management solutions

Revionics AI – Offers AI backed solutions for pricing, promotions & clearances

Key Alliances
