

B2B Transformation

2025

The most successful businesses have
always known **how to ride waves.**

A dramatic photograph of a massive ocean wave crashing, with white foam and deep blue water. The sky is dark and stormy, adding to the sense of power and danger. The wave is the central focus, with its crest breaking into a large, white plume of foam.

**But now, the waves are crashing
down on B2B customers.**

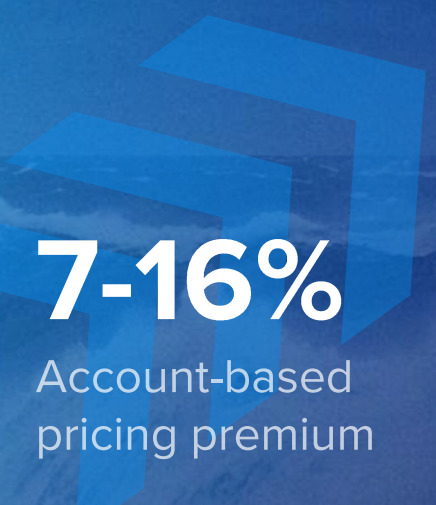

**Profitability
Pressure**

**AI
Uncertainty**

**Workforce
Fatigue**

**Geopolitical
Instability**

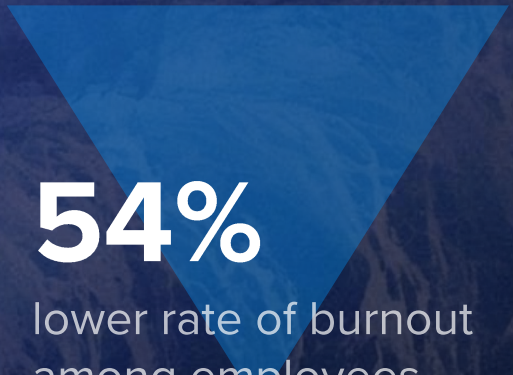

7-16%

Account-based
pricing premium

1.7x

Increase in B2B
account retention

54%

lower rate of burnout
among employees

52%

anticipate tariffs will
amplify economic
contraction

The stakes have never been higher.

B2B has never been
more competitive

+62%

increase in brands considered for the
average B2B purchase

Deal cycles have never
been **more complex**

+4.5

Increase in weeks of the average B2B
purchase lifecycle since 2022, to 379 days

And the job
has never
been harder.

B2B buyers don't feel
heard or well understood

71%

of B2B buyers say they want suppliers to
spend more time understanding and solving
their **day-to-day problems**

Buyers are more
frustrated than ever

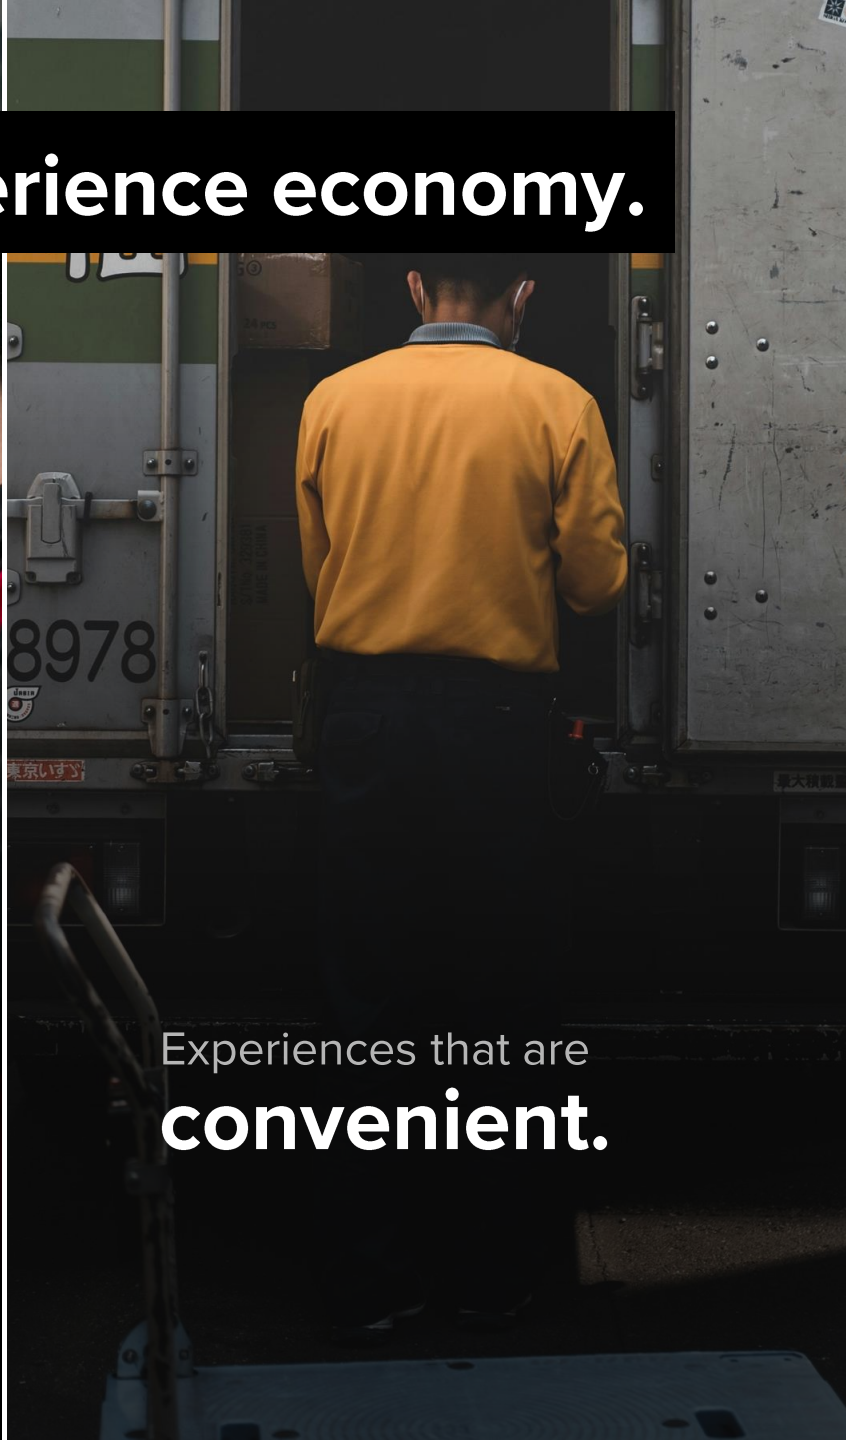

52%

of B2B buyers think it **takes far too long**
to make a purchase from their B2B suppliers

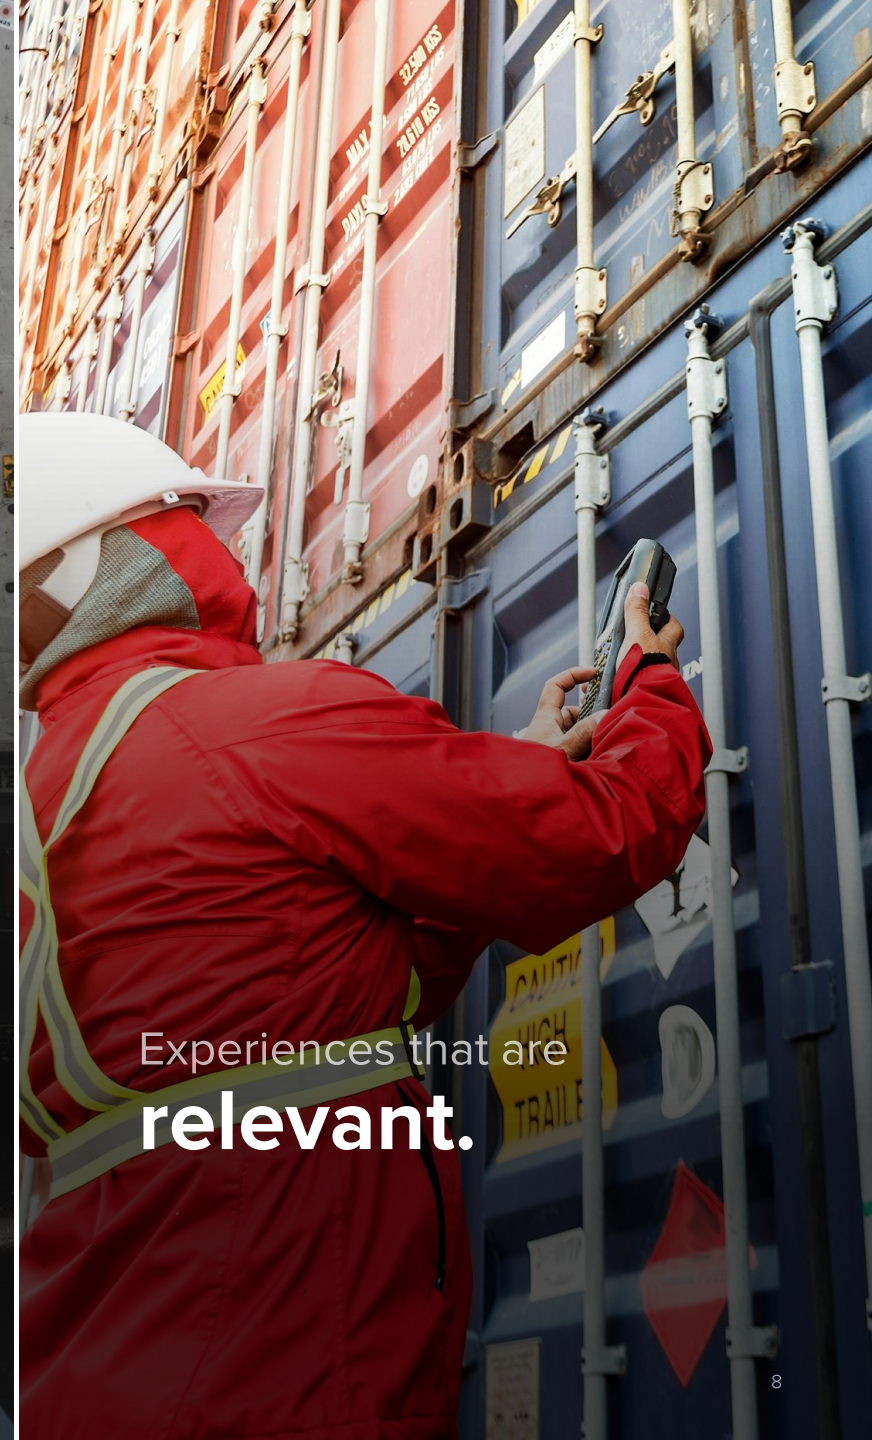

We power the experience economy.

Experiences that create
trust.

Experiences that are
convenient.

Experiences that are
relevant.

It's not how many times
you get it right.

It's how **few times**
you get it wrong.

Maximizing value across the entire B2B lifecycle requires a different approach.

“Do I feel safe signing a contract with them?”

“Are they active thought leaders?”

“Do they support us with expertise?”

“Do they offer enough variety and choice?”

“Are they there when I need them?”

“Do they offer tools to maximize value?”

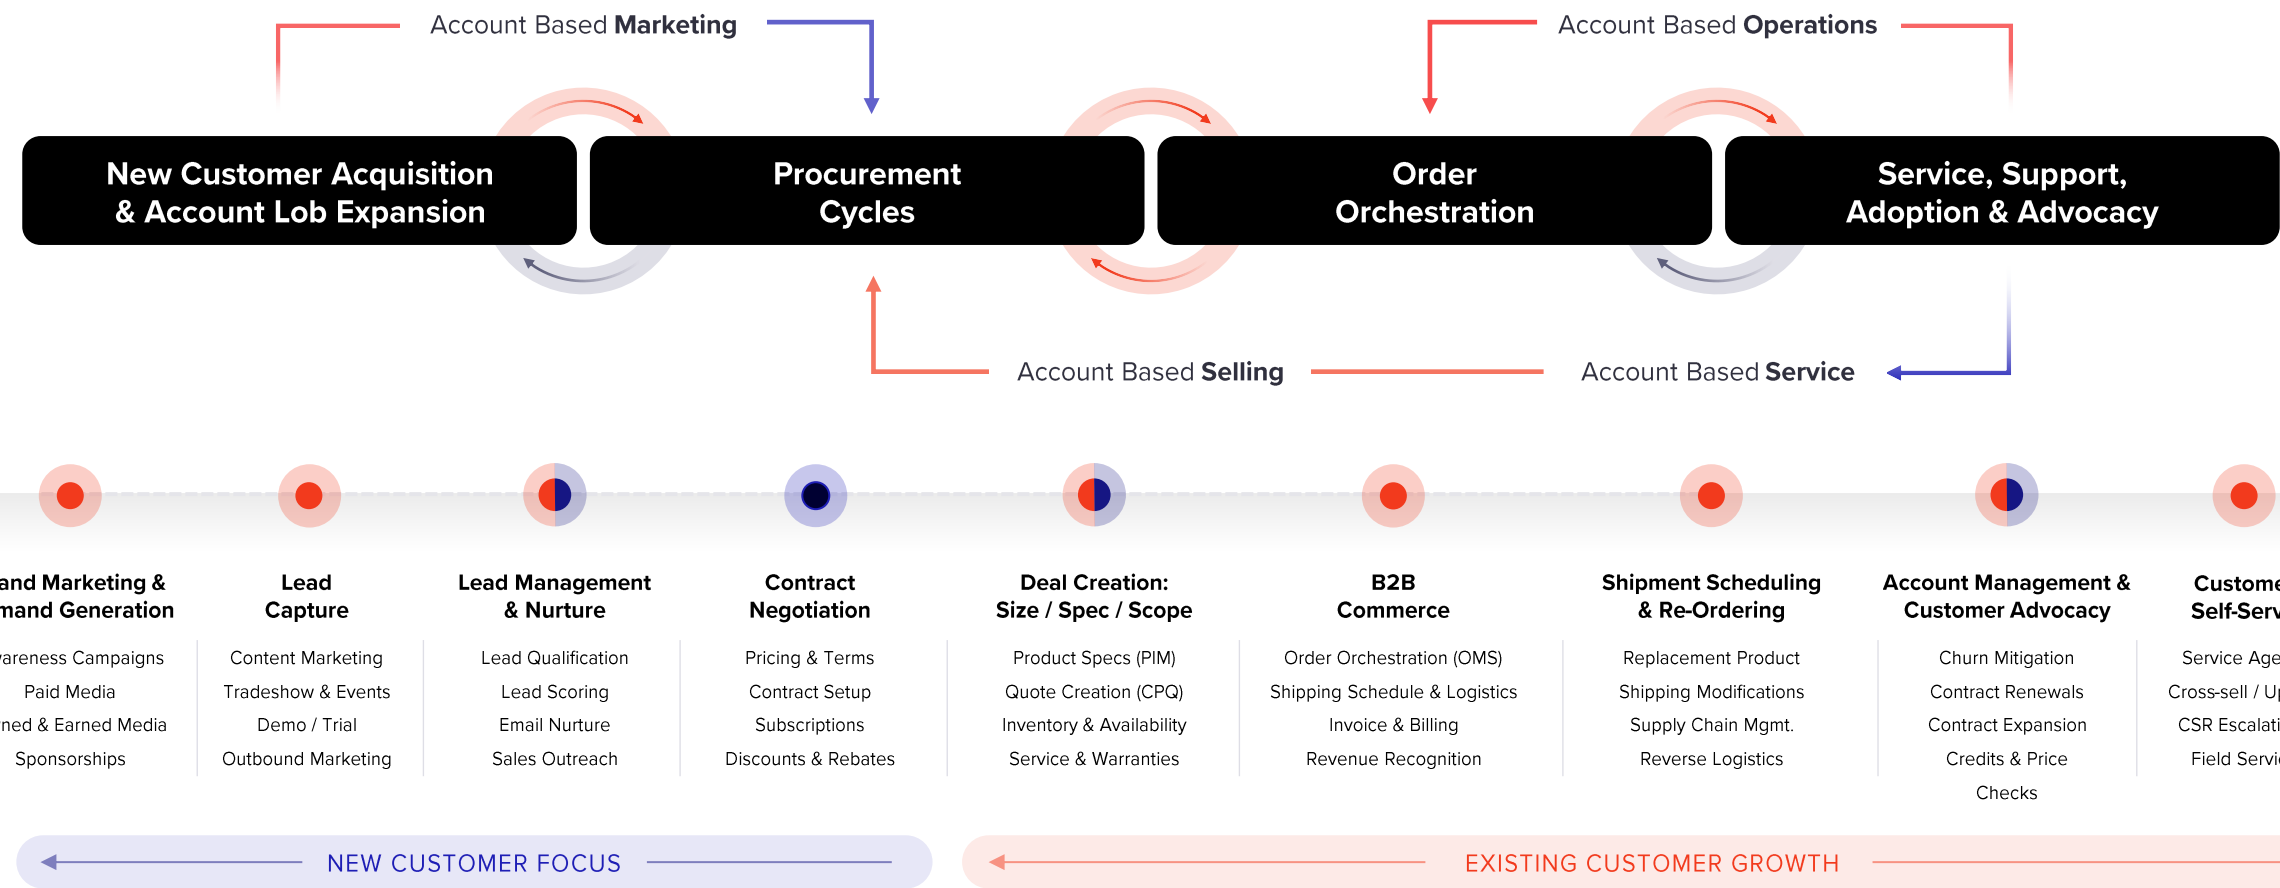

“Do they allow self-service customization?”

Account-based
everything.

Transforming your B2B Customer Experience.

The need to deliver dynamic **Account-Based Experiences** is being fueled by the **Modernization of Technologies** and the prolific **Rise of Artificial Intelligence**, creating a pivot point for many B2B industries.

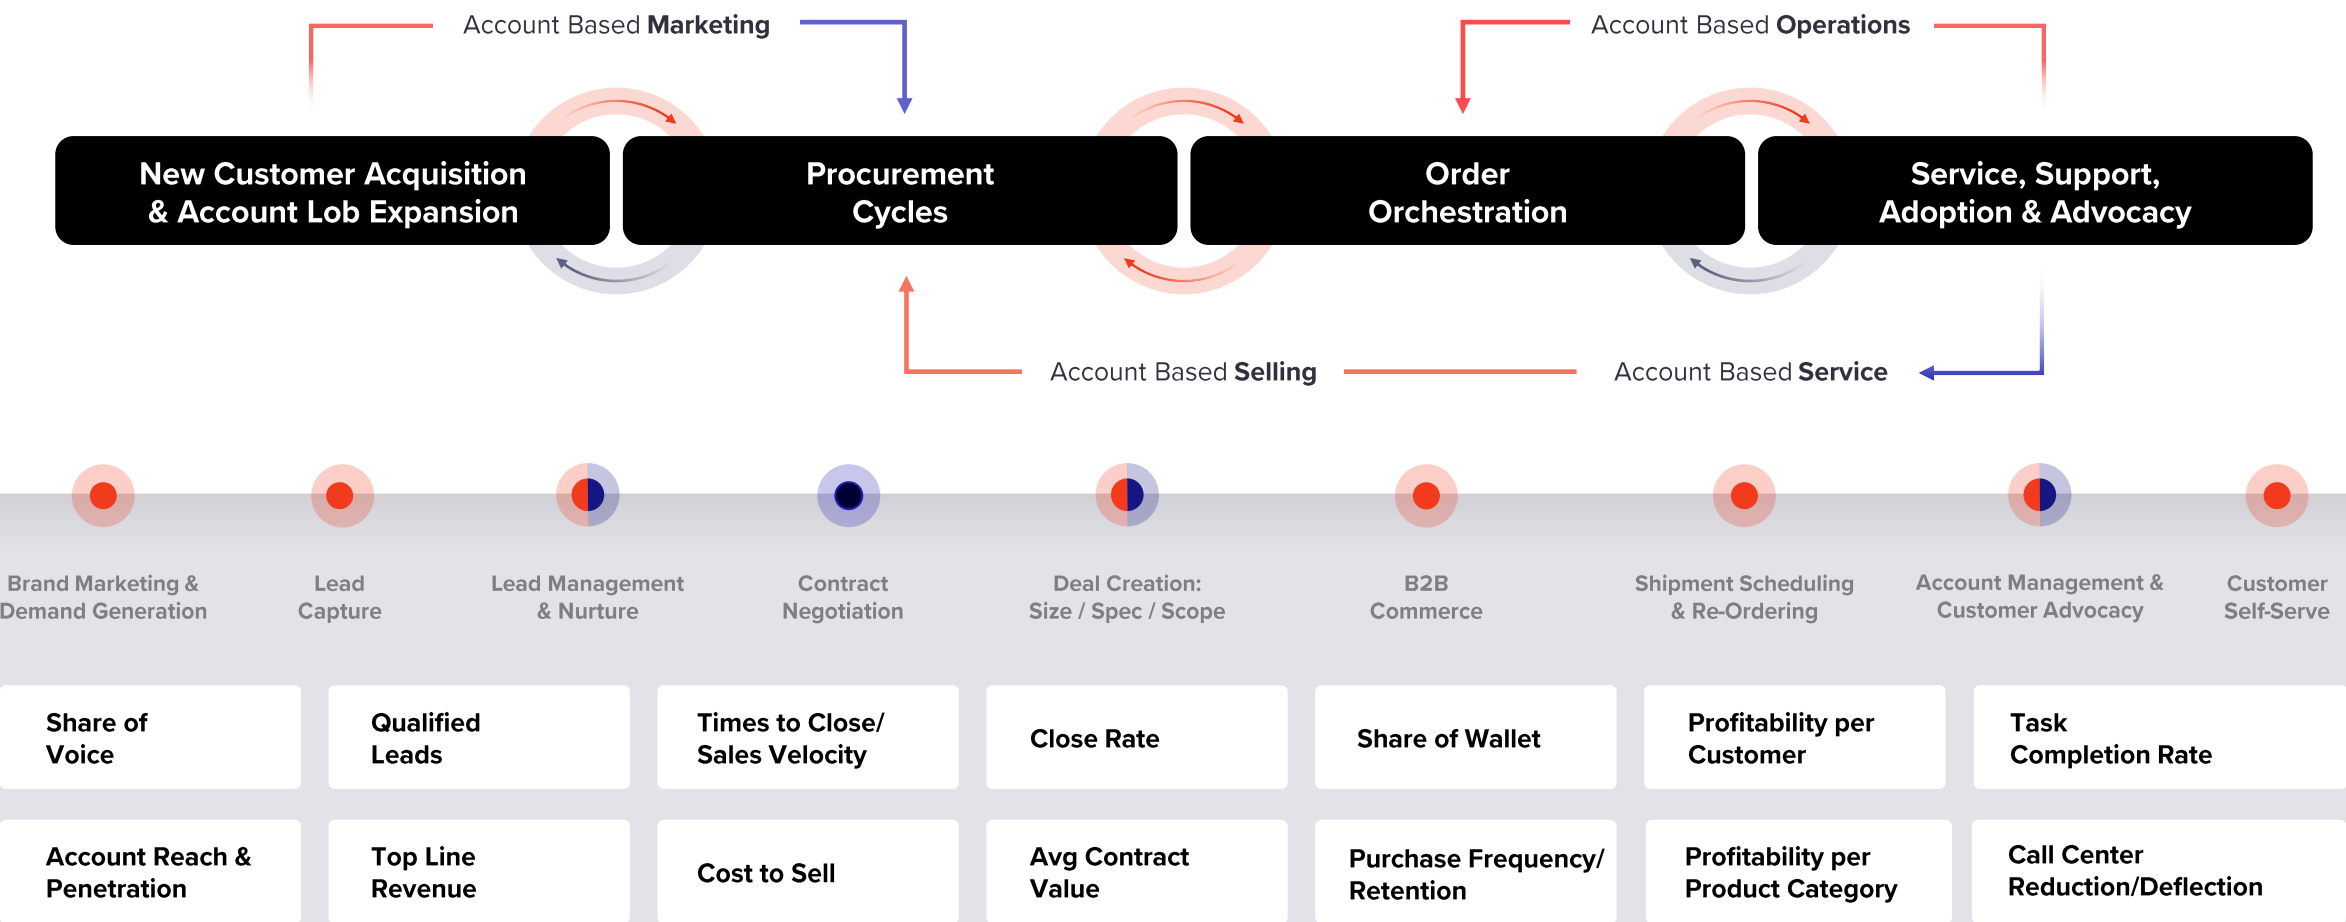

- Digital / AI Led
- Physical / Human Led

Driving Measurable Outcomes.

By leveraging **Account-Based Intelligence** to deliver leading **Account-Based Experiences**, B2B companies can more effectively drive **measurable outcomes** across these KPIs.

Account Based Everything Transformation

WHAT IT IS

Enabling comprehensive organizational transformation through an Account-Based Everything mindset that reshapes how your business thinks, operates, and engages with customers.

We partner with leadership teams to fundamentally reshape business strategy, organizational structure, and cultural mindset—aligning every function around high-value account success. Our approach transforms how teams think, operate, and measure success by embedding account-centricity into the DNA of the organization.

KEY BUSINESS OUTCOMES

- **Accelerated revenue growth** through strategic alignment of critical business functions around target account success and expansion.
- **Improved organizational agility** from cross-functional teams unified by shared account objectives and customer outcomes.
- **Enhanced competitive differentiation** by delivering coordinated, best-in-class experiences that competitors cannot replicate.
- **Sustained market leadership** through a customer-first operating model that drives continuous innovation and long-term relationships.

ENVISION THE FUTURE

North Star Digital Visioning

The digital landscape is changing rapidly, with companies struggling to meet customers' increasing expectation.

We help you define a future vision—and a path to get there.

Our Approach

Take a step back and reimagine your business in a digital-first world.

Your Challenges

- Unclear long-term vision in a digital-first world
- Stagnant innovation or failure to capitalize on digital trends
- Unfocused or misaligned digital investments

Our Solution

- Leadership visioning workshops
- Market trend and competitor analysis
- Ideation and value proposition design
- Definition of a digital North Star and investment themes

What You Get

- A shared, compelling digital North Star aligned to business ambition
- Fresh thinking on how digital can create value in and beyond your core
- Strategic focus areas and investment themes to guide execution
- High-level roadmap

ENVISION THE FUTURE

Agile Op Model Assessment

Becoming digital-first organization requires a fundamental shift in mindset and behavior, however many companies find themselves stuck in outdated project delivery models that can't keep up with business needs.

This isn't just processing change—it's a new way of working that aligns strategy, funding, and execution to accelerate digital transformation across your business.

Our Approach

Shift from siloed, IT-led initiatives to a modern, agile operating model.

Your Challenges

- Rigid, slow project-based delivery models
- Misalignment between business strategy and technology execution
- Lack of adaptability in digital transformation initiatives

Our Solution

- Current state assessment of operating model
- Value stream mapping and prioritization
- Redesign of governance, funding, and team structures
- Pilot implementation and change enablement

What You Get

- Clarity on where value is created and how to unlock it faster
- A scalable operating model aligned to customer and business outcomes
- Cross-functional collaboration and governance models that actually work

DESIGN A PATH TO INDUSTRY SUCCESS

B2B Customer Experience Assessment

Companies have invested in ABM, but few manage to deliver a true end-to-end experience.

We evaluate how well your business serves high-value accounts—from first touch to fulfillment and beyond.

Our Approach

Benchmark your current experience to find levers for growth.

Your Challenges

- Fragmented customer experiences across touchpoints
- Lack of visibility into account needs beyond sales
- Missed growth opportunities due to outdated service models

Our Solution

- Experience mapping for key accounts across research, sales, fulfillment, and service
- Maturity assessment and benchmarking (vs. best-in-class and competitors)
- Identification of experience gaps and value leakage points
- Prioritized roadmap of improvements

What You Get

- A clear view of your full account journey, across functions and touchpoints
- Benchmarking data that highlights competitive and operational gaps
- A prioritized roadmap to elevate your customer experience and drive retention

DESIGN A PATH TO INDUSTRY SUCCESS

Tech & Data Modernization

The B2B technology landscape is in a state of constant flux, with customer expectations, technology advancements, and pressure to drive efficiency and scale driving many clients to question: are my investments driving my business forward?

We help you design a smarter, more agile tech ecosystem that enables growth and enhances customer experience.

Our Approach

Identify where modernization can unlock real business value.

Your Challenges

- Outdated tech stack limiting scalability or flexibility
- Redundant or overlapping systems creating inefficiencies
- Tech investments that lack clear business ROI

Our Solution

- Technology audit and assessment
- Alignment mapping between tech and business capabilities
- Opportunity identification for consolidation, automation, or innovation
- Modernization roadmap with investment plan

What You Get

- A clear view of your current-state technology landscape and its pain points
- A modernization roadmap aligned to strategic goals and CX opportunities
- Guidance on where to invest, consolidate, or retire to maximize ROI

Value Realization & Growth Optimization

Transformation isn't just about change—it's about results. Whether you need to justify further investment or struggling to turn past change into real business performance, we can help identify where they are leaving value on the table.

The goal: unlock profitable growth by making the most of what you already have.

Our Approach

Reduce complexity, improve operational efficiency, and reinvest in growth.

Your Challenges

- Poor ROI from transformation initiatives
- Rising operational costs with limited top-line impact
- Lack of a clear reinvestment strategy for growth

Our Solution

- Current cost and investment mapping
- Identification of under-leveraged or duplicative capabilities
- Reinvestment modeling and scenario planning
- Growth-enabling roadmap tied to value realization metrics

What You Get

- Insight into where transformation and technology investments aren't paying off
- A clear, actionable path to reduce cost and reinvest for growth
- A roadmap that connects value capture to measurable business outcomes

OFFERING SUMMARY

Account Based Marketing (ABM)

WHAT IT IS

ABM transforms how organizations engage high-value prospects by concentrating resources on carefully selected accounts with the greatest revenue potential. Our comprehensive approach builds ABM as a systematic capability across strategy design, technology infrastructure, account intelligence, personalized journey orchestration, content optimization, and continuous measurement.

This creates sustainable competitive advantage through integrated engagements that deliver compounding returns as organizational capabilities mature and account relationships deepen over time.

KEY BUSINESS OUTCOMES

- **Higher Revenue Per Account** - Larger deal sizes and faster cycles from targeting high-value accounts
- **Improved Marketing ROI** - Clear measurement linking investments directly to pipeline and revenue
- **Accelerated Sales Velocity** - Reduced friction enables concentration on warm, high-intent prospects
- **Increased Customer Lifetime Value** - Structured approach to identify and capture growth (upsell/cross-sell) within existing clients

ABM Program Design & Maturity Audit

Turn your ambition to grow strategic accounts into a focused, actionable ABM plan.

Our data-driven approach helps you define the right goals, target accounts, and cross-functional approach to maximize relevance and results.

Our Approach

Transform ABM into a strategic growth engine with measurable impact.

Your Challenges

- Lack of alignment between sales and marketing on key accounts
- Not knowing where ABM gaps create the biggest revenue leaks
- Unclear on how to prioritize investments across technology, people, and processes

Our Solution

- Stakeholder interviews and ABM readiness/maturity assessment
- Target account segmentation and tiering to inform growth plan
- Development of ABM strategy pillars (e.g., 1:1, 1:few, 1:many)
- Prioritized roadmap to evolve ABM efforts

What You Get

- Insight into your ABM maturity ranking and key gaps to address
- A customized ABM strategy tailored to your business priorities
- Clarity on account selection, goals, and success metrics
- A cross-functional blueprint to guide execution at scale

MarTech & Data Readiness

Build a strong ABM foundation by ensuring your data and technology are aligned to your needs.

We evaluate your systems, data sources, and connections to ensure your end-to-end data pipeline is accurate, accessible, and aligned to your ABM strategy.

Our Approach

Build an effective data and technology foundation.

Your Challenges

- Poor data quality or inconsistent account records
- Lack of alignment between sales and marketing systems
- Difficulty measuring ABM success

Our Solution

- ABM technology audit and assessment
- Data quality audit across CRM, MAP, and third-party sources
- Identification of enrichment and integration needs

What You Get

- A clear scorecard of your ABM tech and data readiness
- Recommendations for cleaning, enriching, and governing data
- A path to more precise targeting and measurement

Representative

ABM Account & Audience Insights

Fuel your ABM program with the intelligence needed to target, personalize, and act.

Our strategists help you build a systematic approach to account insights—combining firmographics, intent, insights, and audience data into a single view.

Our Approach

Power your ABM strategy with actionable account and buyer insights—unifying data to target, personalize, and drive results.

Your Challenges

- Limited visibility into account behavior and buying signals
- Fragmented or underutilized data sources
- Uncertainty around who your buyers are, how to reach them, or what to say
- Inability to personalize effectively across touchpoints

Our Solution

- Targeting and personalization recommendations based on account insights and sizing
- Segment/persona-level insights based on 1P, 2P and/or 3PD

What You Get

- A structured, repeatable approach to developing account-level and buyer-level intelligence
- A clearer view of where to focus and how to drive engagement

Account-Based Journey Design

Bridge strategy and execution with personalized, multi-channel journeys that speak to the needs of your highest-value accounts.

We deliver actionable mapping of key insights on what buyers are feeling, thinking, and doing at each phase of the decision-making process to inform how you build, launch, and optimize tailored messaging to each of your account tiers and personas.

Our Approach

Turn buyer insights into action with personalized, multi-channel journeys tailored to every stage of the decision-making process.

Your Challenges

- One-size-fits-all journeys that doesn't resonate
- Siloed campaigns that don't align across channels
- Long campaign cycles and lack of insight into what works

Our Solution

- Persona and message refinement for top-tier accounts
- Campaign play design (1:1, 1:few, 1:many)
- Content gap analysis and creative brief development
- Activation planning across paid, owned, and earned channels

What You Get

- A set of campaign plays aligned to account needs and buyer journeys
- Guidance on personalization and delivery across tiers
- Improved speed to market and campaign performance

Content Strategy & Optimization

Create the right content, for the right accounts, at the right time—without burning out your teams.

We help you develop a scalable ABM content strategy and streamline your content supply chain so that every asset is purposeful, personalized, and efficiently produced.

Our Approach

Deliver personalized, high-impact content at scale with a streamlined ABM strategy.

Your Challenges

- ABM campaigns stall due to lack of relevant or timely assets
- Inefficient content development processes and unclear handoffs
- Difficulty measuring content effectiveness at the account level

Our Solution

- Content audit mapped to account journey stages and ABM tiers
- Gap analysis against campaign plans and buyer needs
- Content planning framework development (by tier, persona, stage)
- Workflow optimization for content intake, production, and personalization
- Integration of performance feedback loops (what content works where)

What You Get

- A strategic ABM content framework aligned to campaign and sales goals
- A streamlined content creation and activation process
- Greater efficiency in production and stronger content performance
- A scalable approach to personalized content across 1:1, 1:few, and 1:many efforts

Measurement & Optimization

Track, learn, and improve with a measurement approach built for ABM.

To realize success, you need to define and operationalize KPIs that reflect engagement quality, influence on pipeline, and ROI—so you can prove what's working and adjust what's not.

Our Approach

Prove and improve ABM impact with a measurement strategy that tracks engagement, pipeline influence, and ROI.

Your Challenges

- Lack of clarity on what to measure or how to show ROI
- Fragmented reporting between sales and marketing
- Inability to adapt quickly based on account engagement and journey progressions

Our Solution

- Definition of KPIs across ABM funnel stages
- Attribution and influence model design
- Creation of ABM performance dashboard and reporting cadence

What You Get

- A measurement framework to ensure efforts are strategic, effective, and accountable
- An indication of how ABM drives awareness, deepens engagement, and influences revenue
- Continuous feedback loops to inform campaign and strategy adjustments
- Greater accountability and alignment across sales and marketing

ACCOUNT-BASED

Selling

Account Based Selling is a highly targeted sales strategy to make teams more effective and efficient.

Sales and marketing teams work collaboratively to identify high-value accounts to engage and build personalized relationships with the goal of making sales cycles more autonomous and frictionless.

Sales Effectiveness

Provide capabilities to help sales teams cut through the noise and identify high value accounts and opportunities, engage with the right stakeholders, and deliver the right messaging.

Sales Efficiency

Provide experiences and capabilities to allow customers to self-service, automated certain tasks in order to give sales teams more time to focus on selling.

Our ABS Approach Transforms B2B Selling

Transitioning from a traditional B2B outside sales model to account-based selling, requires a fundamental **shift in strategy, execution, and measurement** to drive more impactful **business outcomes**.

TRADITIONAL B2B SELLING

ACCOUNT-BASED SELLING

Disconnected opportunity scoring between sales and marketing

Unified account and opportunity data across entire customer lifecycle

One size fits all approach to pipeline reporting and analysis

Data driven prioritization and next best action prompting

High volume of low value activity requires human interaction

Digitally enabled customer self service for all tasks

Swivel chair across many systems for sales and customers

Unified system of work for all commercial activity

Siloed commercial data across front, middle and back office

Integrated platforms for end-to-end data orchestration

Manual processes to facilitate tasks and communication

Automated workflows, queues and communication triggers

Inability to scale and grow without additional headcount

Ability to expand into new customers and markets through digital channels

ROI based on lead conversions or costs per lead

ROI measured on account lifetime value and deal acceleration

Key Sales Stakeholders

Though their motivations, and pain points vary, they must align to reach a shared success.

MOTIVATIONS

PAIN POINTS

Sales Manager

“I need to provide an accurate forecast to management.”

Accurate sales forecasting
Territory revenue growth

Unpredictable close dates
Pressure to do more with less

Sales Rep

“It is difficult to really know all of my customers’ needs.”

Quota achievement
Customer relationships

Too many accounts to actively manage all of them
Difficult to identify key buying signals

Head of ecommerce

“I need to grow our ecommerce channel to achieve my targets”

Top line channel revenue
Customer satisfaction

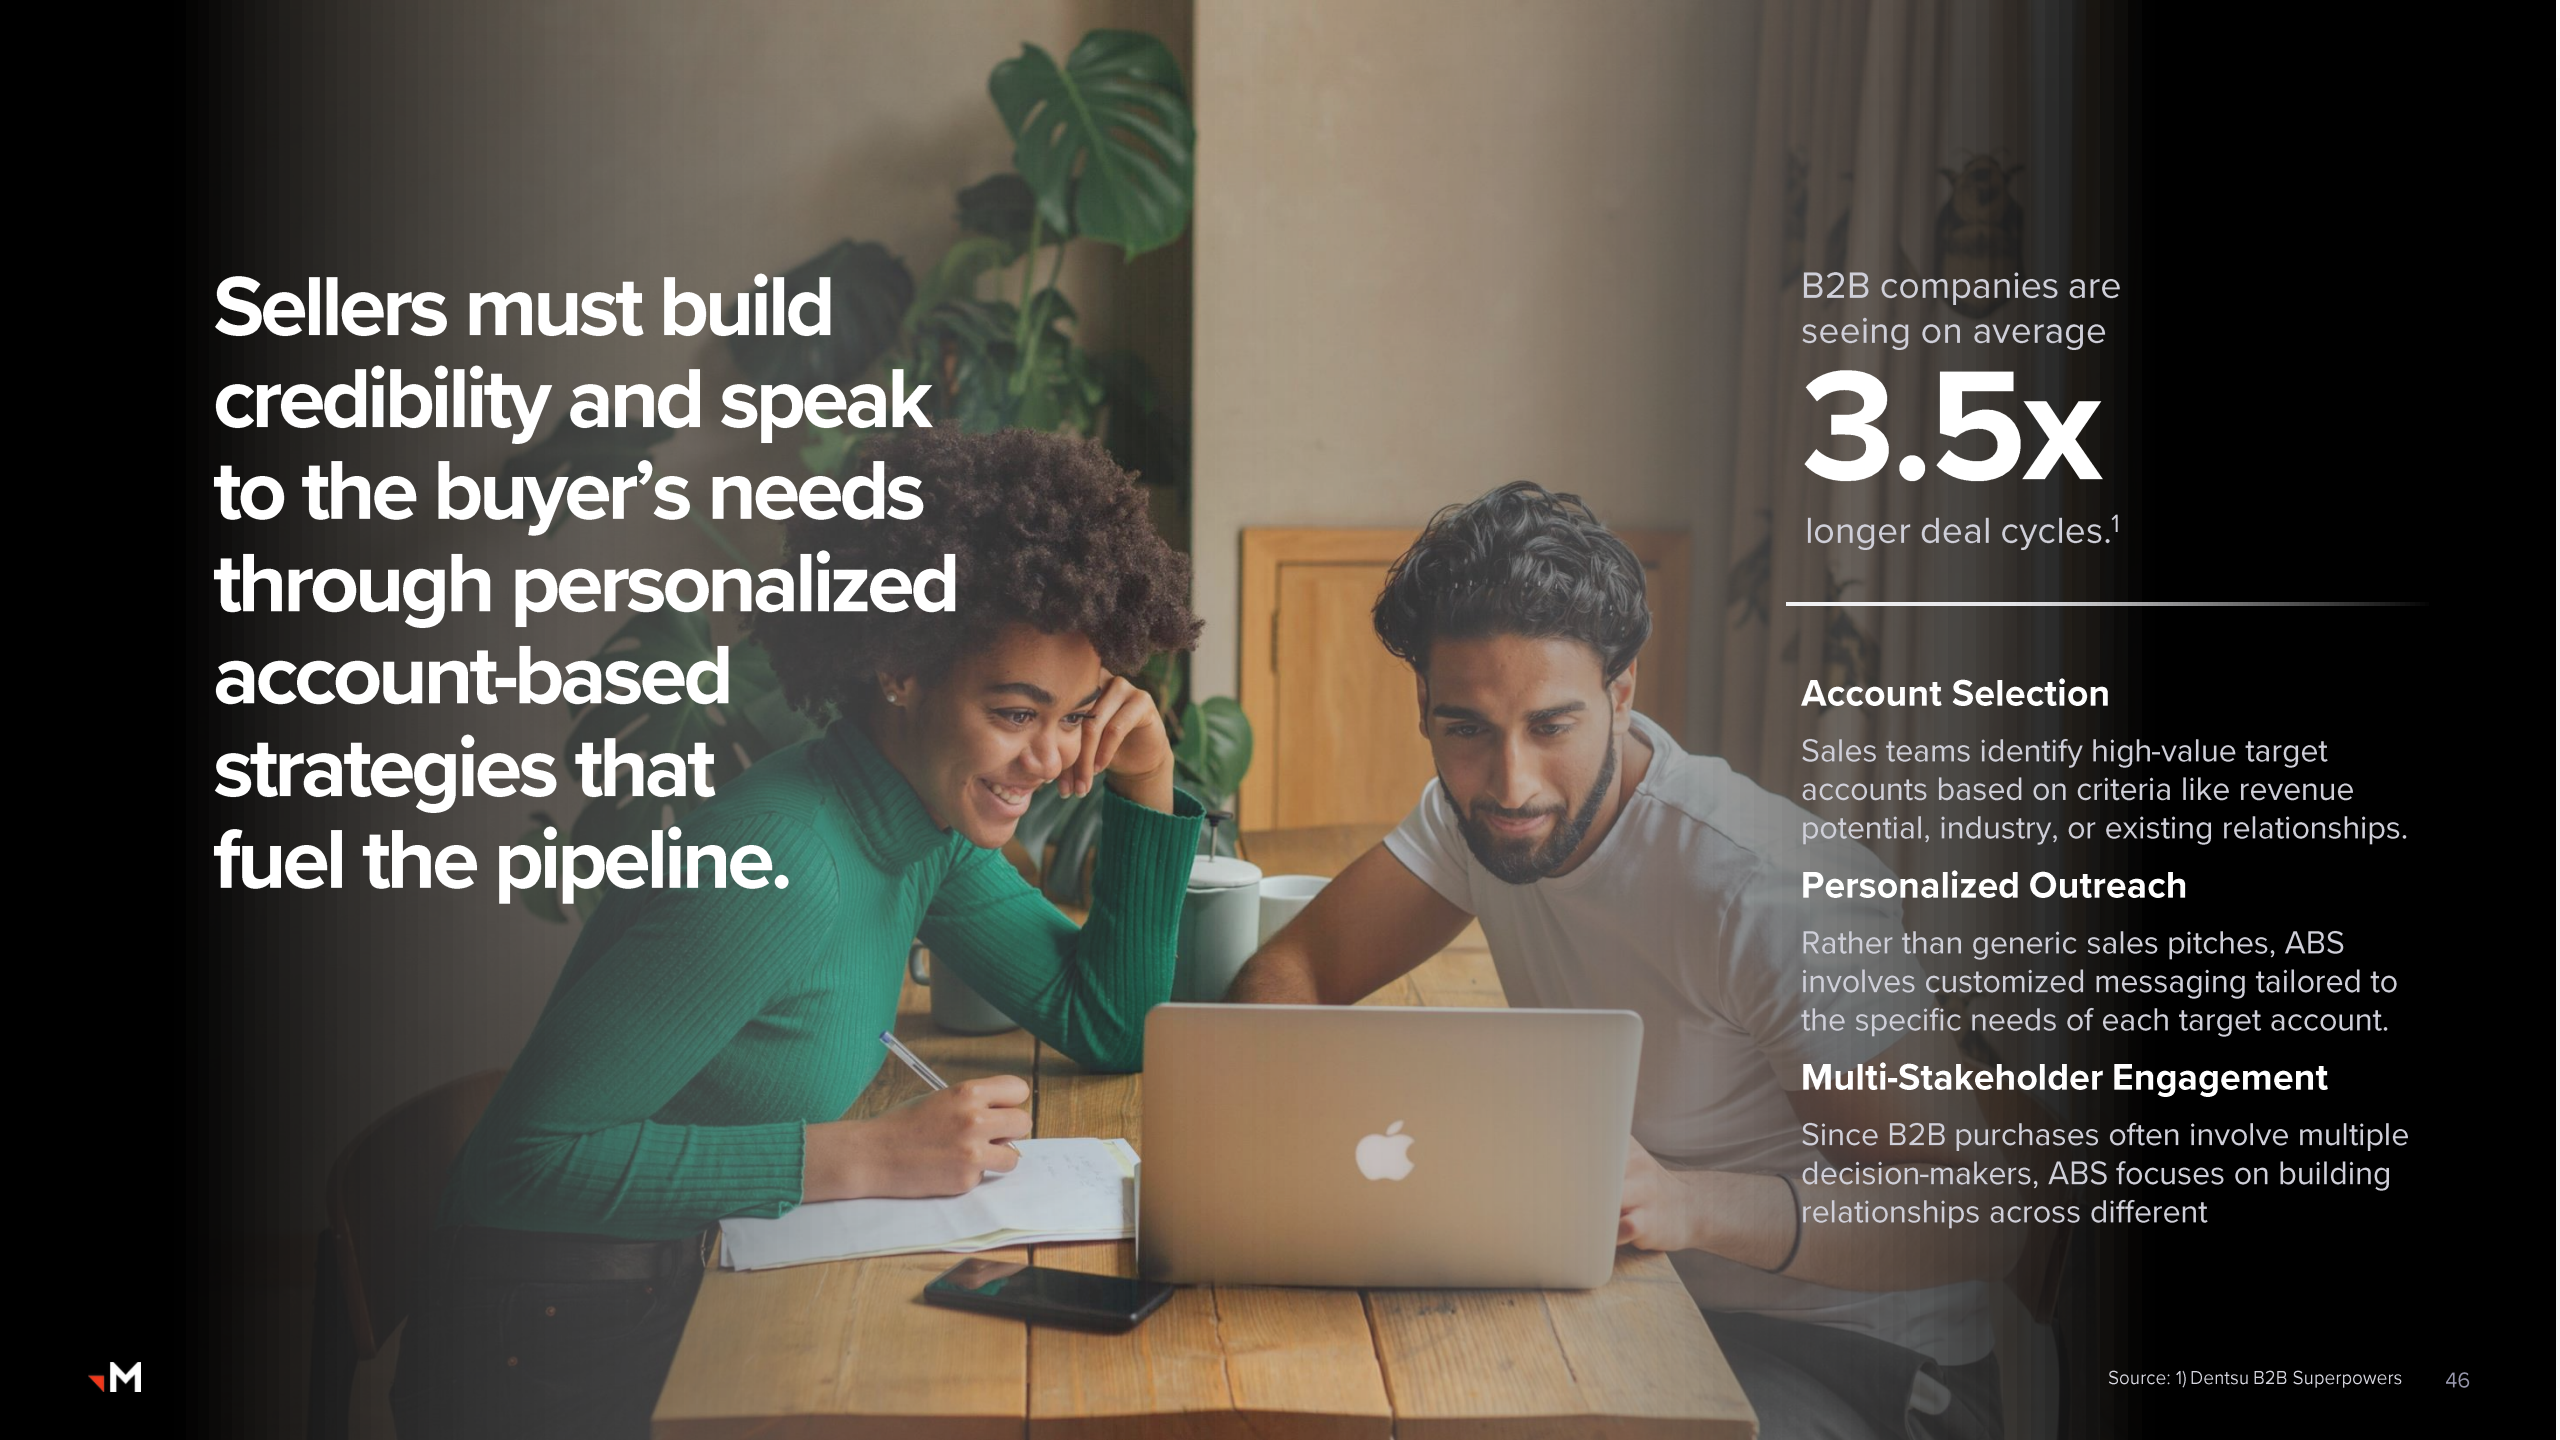

Only certain product groups saleable via commerce
Accurate pricing, entitlements, available to promise

CIO/CDO

“I need to harness our data while reducing technical debt.”

Optimize technology costs
Reduce technical debt
Increase business collaboration

Siloed systems and data
Legacy ERP and back-office processes

A man and a woman are sitting at a wooden desk, looking at a laptop. The woman is on the left, wearing a green turtleneck, and the man is on the right, wearing a white t-shirt. They are both smiling and appear to be in a collaborative work environment. A large potted plant is visible in the background.

Sellers must build credibility and speak to the buyer's needs through personalized account-based strategies that fuel the pipeline.

B2B companies are seeing on average

3.5x

longer deal cycles.¹

Account Selection

Sales teams identify high-value target accounts based on criteria like revenue potential, industry, or existing relationships.

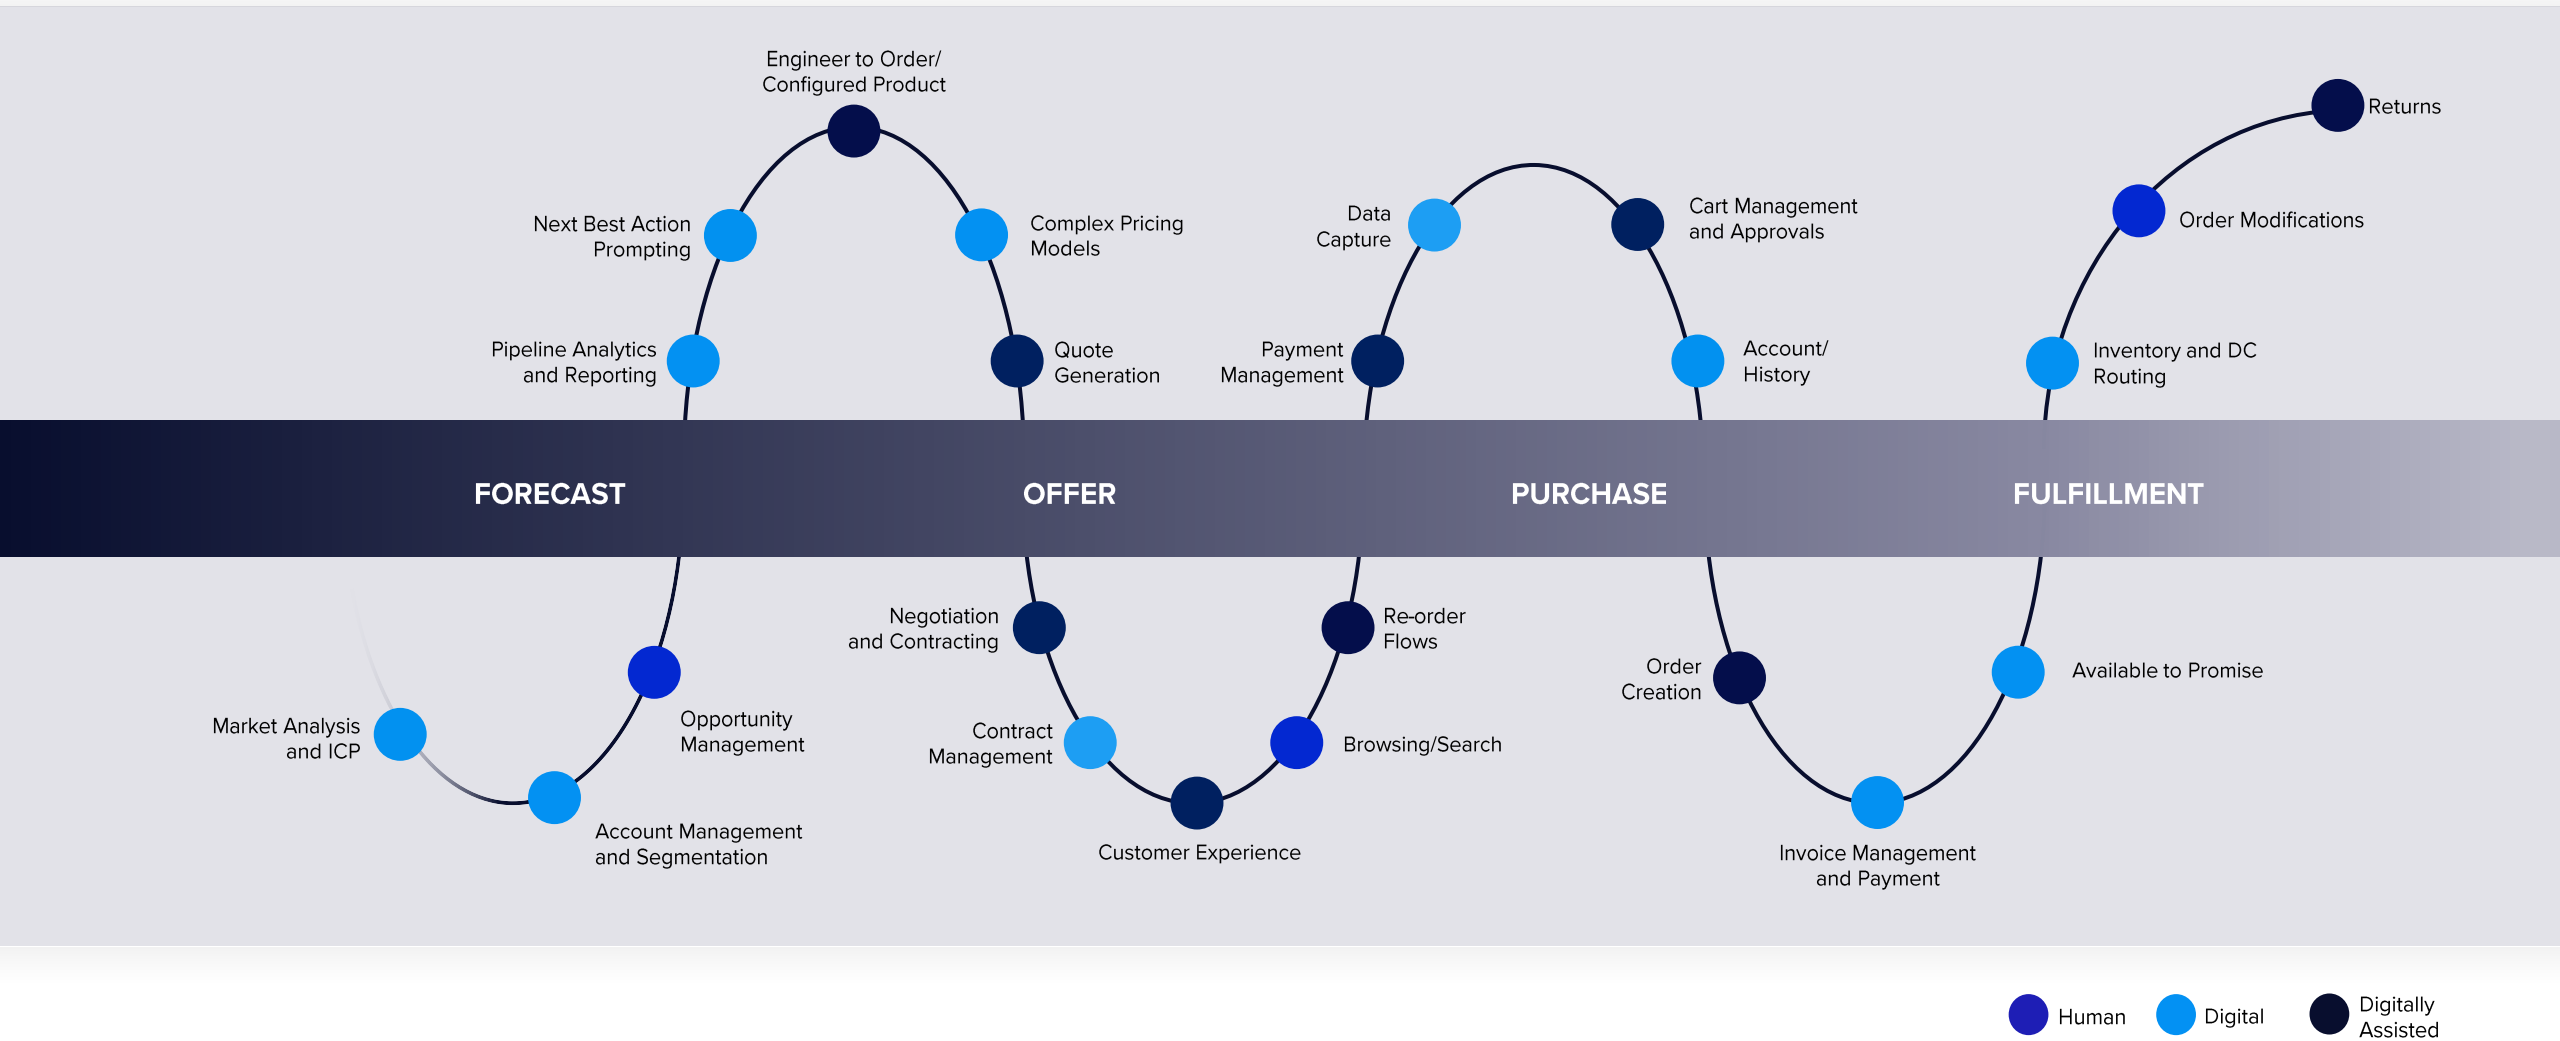

Personalized Outreach

Rather than generic sales pitches, ABS involves customized messaging tailored to the specific needs of each target account.

Multi-Stakeholder Engagement

Since B2B purchases often involve multiple decision-makers, ABS focuses on building relationships across different

OFFERING SUMMARY

Account Based Selling

WHAT IT IS

A comprehensive B2B sales transformation approach that orchestrates the entire customer journey from initial prospect identification through order fulfillment and ongoing relationship management.

Our Account Based Selling solution integrates AI-driven lead qualification, intelligent sales automation, personalized customer experiences, and seamless order management to create a unified, data-driven sales ecosystem. This end-to-end approach transforms traditional sales processes into a strategic, account-centric revenue engine that delivers measurable business outcomes across the entire customer lifecycle.

KEY BUSINESS OUTCOMES

Accelerated Revenue Growth: Streamlined MQL to SQL conversion with AI-powered lead scoring and automated nurturing workflows that reduce sales cycle time by up to 40%.

Enhanced Customer Experience: Personalized self-service capabilities, intelligent product recommendations, and seamless quote-to-cash processes that increase customer satisfaction and retention.

Operational Excellence: Automated order orchestration, smart fulfillment routing, and integrated supply chain management that reduces operational costs while improving delivery performance.

Data-Driven Decision Making: Real-time analytics and forecasting capabilities that provide actionable insights for strategic account planning and resource optimization.

Turn your ambition to grow strategic accounts into a focused, actionable ABM plan.

Our data-driven approach helps you define the right goals, target accounts, and cross-functional approach to maximize relevance and results.

Our Approach

Transform your selling approach with highly targeted data driven strategies.

Your Challenges

- Effective guided sales directs and supports sellers through their sales process. Businesses need to address the unique challenges to offer seamless and comprehensive experiences for their B2B clients while ensuring maximum efficiency and standards.

Our Solution

- Discovery: Create a future state plan of a sales funnel infused with AI including definition of Next Based Action
- Design: Evaluate the existing processes and how to mold them to the future state vision
- Build: AI and Sales CRM, CPQ, and other tool integration
- Testing with various sales roles and groups prior to rollout
- Training and change management
- Rollout to all global teams and groups

What You Get

- Improve sales efficiency (process standardization and automation)
- Improve collaboration and customer relation (remove silos and enable 360° View)
- Improve sales process and drive growth (conversion rate and cross-/up-sell)

to maximize relevance and results

Our Approach

B2B Commerce accelerates growth, lowers costs, and deepens customer relationships by delivering a seamless, data-driven digital buying experience.

Your Challenges

- Inefficient operations from manual, error-prone order and service processes.
- Limited growth due to restricted sales channels and poor scalability.
- Weak customer experience with no real-time, self-service buying

Our Solution

- Customer-facing storefront — personalized catalogs, contract pricing, bulk ordering, and account-specific promotions.
- Self-service capabilities — order history, reordering, shipment tracking, invoice access, and returns.
- Integration with back-office systems — ERP, CRM, OMS, PIM, and inventory for real-time pricing, stock, and order status.
- Advanced search and navigation — product filtering, configurations, and recommendations.
- Mobile-optimized experience — responsive design for buyers in the field or on-site.
- B2B-specific workflows — approvals, quotes, credit terms, and multi-user account management.

What You Get

- Decrease cost to service across sales and service (call deflection)
- Increase customer acquisition rates
- Increase average account value (cross-sell, sales velocity)
- Increase customer retention (great customer experience)

B2B Marketplace

Supply chain is more important than ever. Optimizing the supply chain via dropship and third-party marketplace experiences enables the ability to test and learn new product categories and increase SKU profitability.

Our Approach

Expand your sales reach with B2B Commerce through integrated third-party and dropship seller networks, creating a comprehensive digital marketplace that scales product offerings while optimizing operational efficiency.

Your Challenges

- Limited product catalog constrains growth
- High inventory costs and storage complexity for expanding SKU range
- Regional fulfillment gaps limiting market reach
- Complex seller/vendor onboarding processes causing delays and partner friction
- Difficulty maintaining quality control across distributed seller network

Our Solution

- Holistic vision for B2B Commerce (1P, Dropship, 3P)
- Business value case for B2B marketplace
- Merchandising / Category strategy for marketplace categories (Dropship, 3P)
- Comprehensive business process and operating protocol designs
- Platform recommendation, implementation, and integration
- Seller / Vendor onboarding facilitation (pilot and ongoing)
- Seller training and change management

What You Get

- SKU profitability uplift
- Category expansion
- Optimized regional fulfillment
- Seller diversification
- Revenue growth

Order Orchestration

Our solution offers a one-stop shop for all order data, providing full visibility and real-time notifications of any exceptions. This eliminates the need for manual tracking and "swivel chair" processes, streamlining operations and improving efficiency.

Optimizing performance and results.

Our Approach

Provide automation that allows customers to order how they want.

Your Challenges

- Most B2B orders still come in through offline channels or EDI
- Orders may need to be fulfilled across multiple ERPs
- Many orders require manual re-keying by customer service and exceptions lack visibility

Our Solution

- Automate order ingestion with intelligent AI driven processing for structured and unstructured data
- Quickly identify and automate resolution of exceptions
- Provide a single system of work for order visibility and management

What You Get

- Decrease cost to service across sales and service (call deflection)
- Increase order accuracy
- Reduce revenue leakage through robust exception management
- Seamless customer experience for ordering through all channels

Digital Shelf Analytics

Assess brand compliance across various KPIs like content, price, promo, ratings and reviews, visibility and more with an AI-powered platform to take a data-driven approach to measure, benchmark and improve channel performance across retailers, markets, competitors.

to maximize relevance and results

Our Approach

Track your brand across channels.

Your Challenges

- Inconsistent customer experience across Retailer platforms tarnishing brand image.
- Low competitor visibility with strategy, pricing, promotions and availability across retailer platforms.
- Model media spends on RMNs / on Retailer platforms to drive ROAS. Understanding promotion cycles across Retailer platforms and competition positioning

Our Solution

- Conduct discovery sessions to understand brands business needs to spearhead e-commerce sales
- Identify retailer platforms, competitors and metrics that define a winning strategy for the team
- Collect information and trends across retailer platforms to analyze trends impacting performance
- Work with commerce and media teams to develop strategies that help win the digital shelf across markets, retailers and competitors

What You Get

- An always-on dashboard showcasing insights across key KPIs impacting performance
- Regular cadence with client teams highlighting key changes and impact on strategy

ACCOUNT-BASED

Service & Advocacy

Account-based service and advocacy **transforms traditional service teams into revenue-generating growth engines** that proactively drive expansion, retention, and loyalty within strategic accounts.

Rather than simply resolving issues, these teams focus on **deepening relationships and identifying opportunities** that reduce churn while increasing account value and brand affinity.

Quality Service and Advocacy is no longer an option but the differentiator to creating customer loyalty and capturing new revenue.

- **60-70%** of B2B customers say they'd consider **switching vendors** if a better option came along
- **89%** of B2B customers have switched to a competitor after a **poor service experience**
- The Digitization of B2B driven by Alibaba has reduced costs and complexity for B2B customers to switch providers

Customer Service drives revenue

Service teams become Growth teams creating new revenue, driving repeat / ongoing purchase, reduce customer churn and increase brand affinity / brand loyalty.

TRADITIONAL B2B MARKETING

ACCOUNT-BASED SERVICE & ADVOCACY

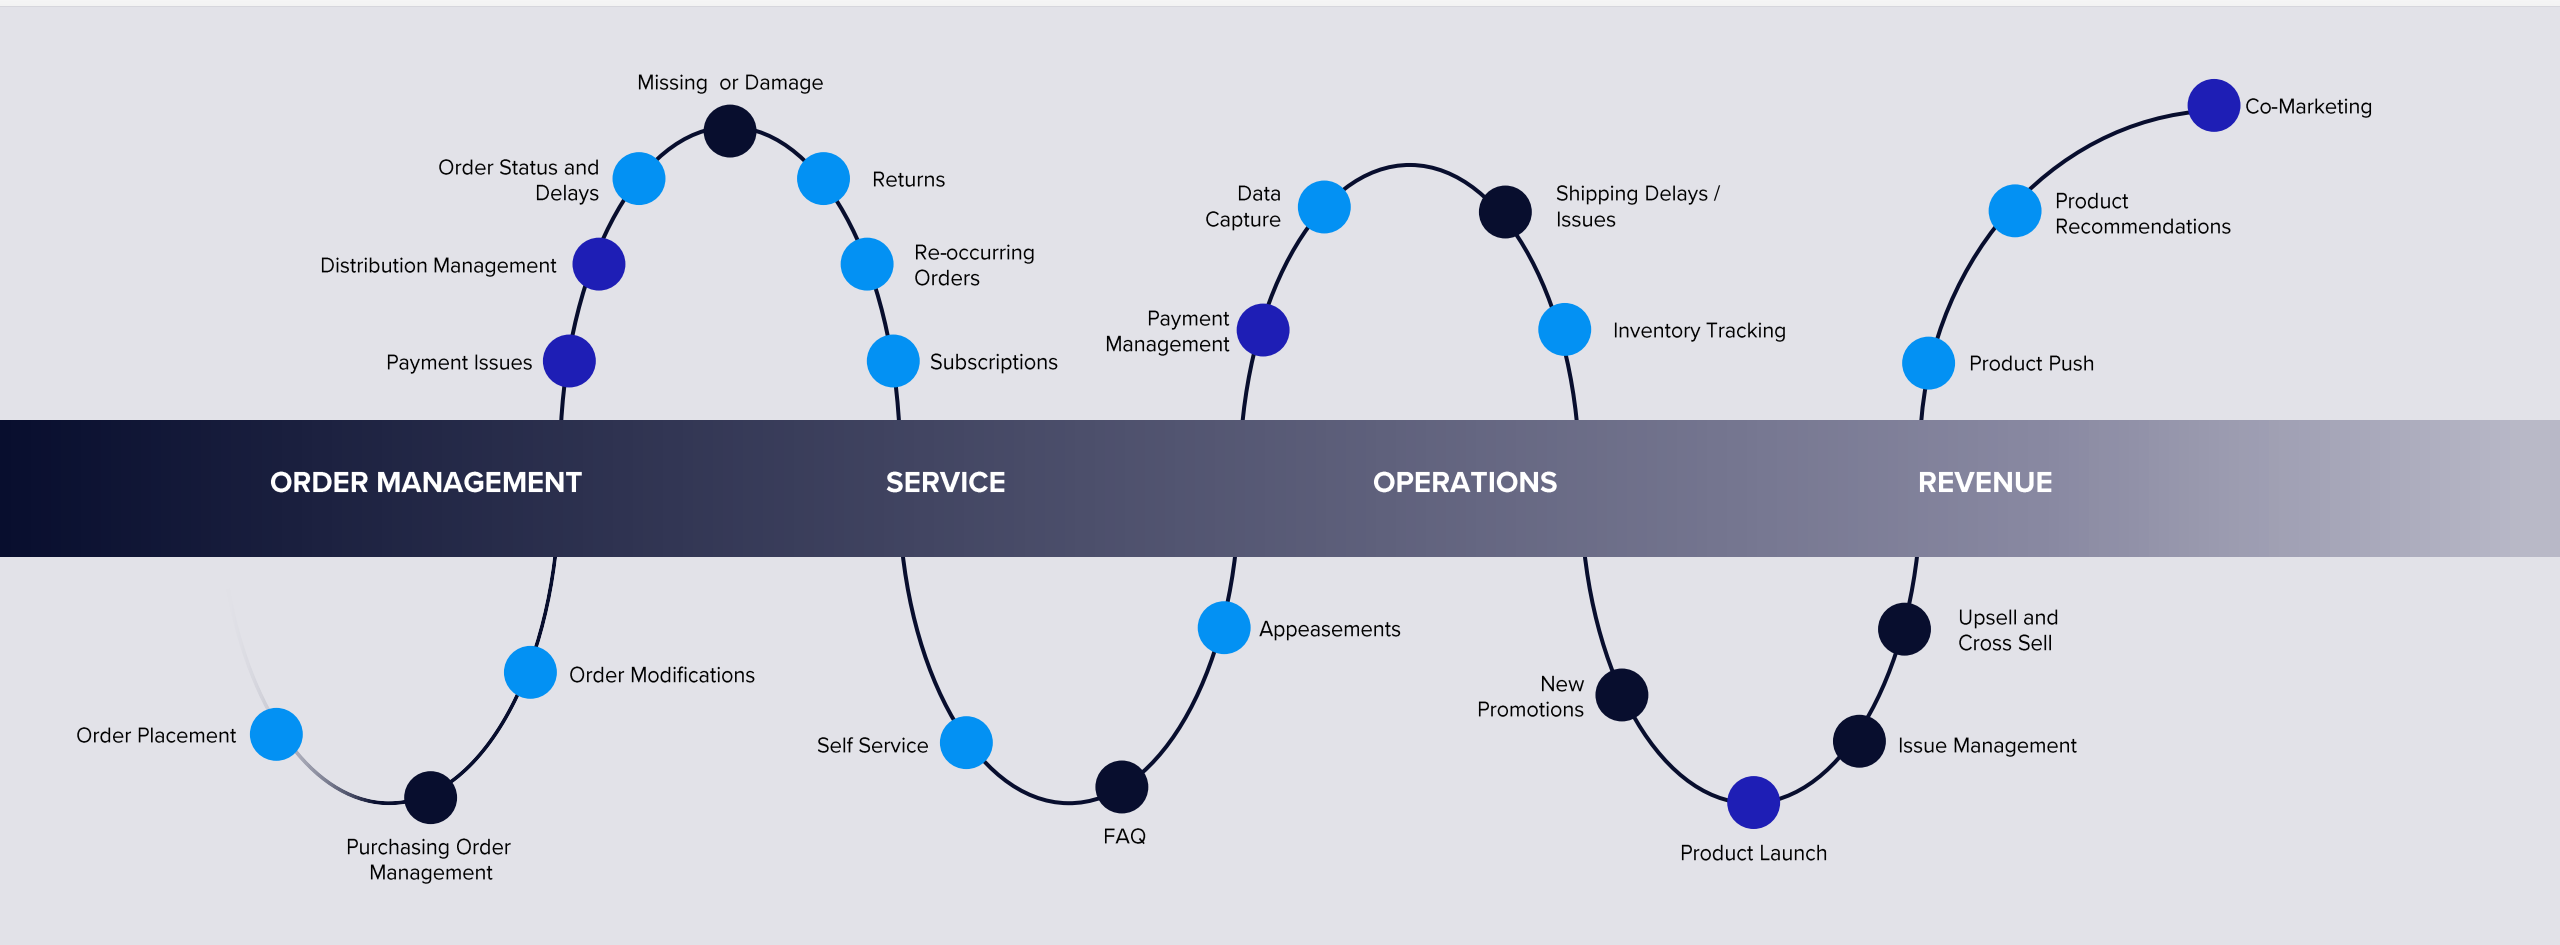

Trusted relationships	→	Increase brand loyalty and openness to recommendations or upgrades
Increased AOV	→	Up-sell and cross-sell from value additive offerings or adjacent services
Reduced Churn	→	Trust and convenience makes switching harder for buyers
Data driven recommendations	→	Quick relevant suggestions that are easy to buy
Feedback loop	→	Front line feedback to product and marketing teams

Key Sales Stakeholders

Though their motivations, and pain points vary, they must align to reach a shared success.

	Customer Service Manager	Sales / Account Team	Technical Product Leadership	CIO	Field Service
MOTIVATIONS	“Our customers are our priority, and want them to feel valued in resolving their inquiries.”	“The more I research the technology, the more options I find and I really need to narrow it down.”	“I need to ensure that any vendors we work with or products we explore will be compliant to our specifications and well received.”	“I need consolidated single platforms and systems of record.”	“Make my job easy by having all the information I need in one place and help me avoid delays in work completion.”
PAIN POINTS	TTR, CSAT, Call Volume, CS Staffing	Order transparency, issues leading to customer attrition	Understanding how customers use products, issues from product design	Total cost of ownership, FTEs to support platforms, release management	Avoidable delays, missing parts, dual data entry, information delays

The end goal: impact every touchpoint of the service journey

OFFERING SUMMARY

Account Based Service & Advocacy

WHAT IT IS

A comprehensive post-sale customer success platform that transforms traditional service operations into strategic revenue-generating and customer advocacy engines through AI-powered automation and intelligent service orchestration.

Our Account Based Service & Advocacy solution integrates intelligent case management, predictive service analytics, automated warranty processing, and field service optimization to create a unified customer success ecosystem. This approach transforms service interactions into opportunities for revenue growth, customer expansion, and brand advocacy while reducing operational costs and improving service delivery outcomes.

KEY BUSINESS OUTCOMES

Service-to-Revenue Transformation: Convert service interactions into revenue opportunities through intelligent upselling, cross-selling, and proactive customer expansion strategies that increase account value by 25-40%.

Operational Excellence: AI-driven case management, automated warranty processing, and optimized field service operations that reduce resolution time by 35% while improving first-call resolution rates.

Customer Advocacy & Retention: Proactive service delivery, personalized customer experiences, and intelligent churn prevention that increases customer lifetime value and Net Promoter Scores.

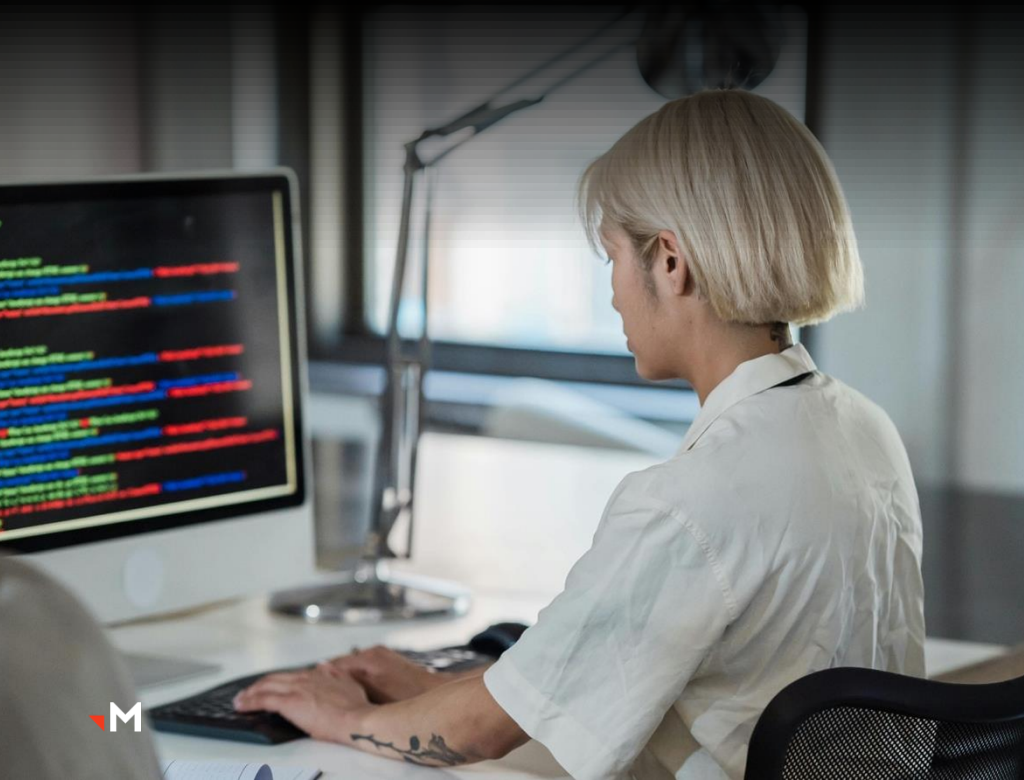

Strategic Account Growth: Data-driven insights and predictive analytics that enable account managers to identify expansion opportunities and strengthen customer relationships across the entire service journey.

ENGAGEMENTS

AI-Driven Service	Asset Management & Warranty	Service Modernization	Field Service
\$150-500K USD	\$200-600K USD	\$300-700K USD	\$250-700K USD

AI Driven Service

Customers want faster response times and reduced agent load. Use AI and automation to increase first-contact resolution and deflect low-value inquiries.

Our Approach

Transform your service approach with highly targeted data driven strategies.

Your Challenges

- Effective guided sales directs and supports sellers through their sales process. Businesses need to address the unique challenges to offer seamless and comprehensive experiences for their B2B clients while ensuring maximum efficiency and standards.

Our Solution

- Intelligently deployed Bots
- Next Best Action
- Auto-triage and workflows

What You Get

- Improve service efficiency (process standardization and automation)
- Improve collaboration and customer relation (remove silos and enable 360° View)
- Improve service process and drive growth (conversion rate and cross-/up-sell)

Representative
Clients:

Asset Management & Warranty

Serves multiple strategic and operational purposes, especially for manufacturers, field service providers, and B2B companies.

Our Approach

Automate warranty registration, asset tracking, and entitlement management

Your Challenges

- Incomplete visibility of installed assets and ownership.
- Manual, error-prone warranty activation processes.
- Lost revenue from unregistered warranties and expired service contracts.
- Poor service delivery due to lack of asset history and entitlements.
- Inability to forecast maintenance, upgrades, or replacements.

Our Solution

- Provide real-time visibility into assets and their lifecycle.
- Automate and standardize warranty registration and entitlement.
- Improve service team efficiency and customer satisfaction.
- Create revenue through warranty renewals, upsells, and proactive service.
- Enable accurate reporting and product performance insights

What You Get

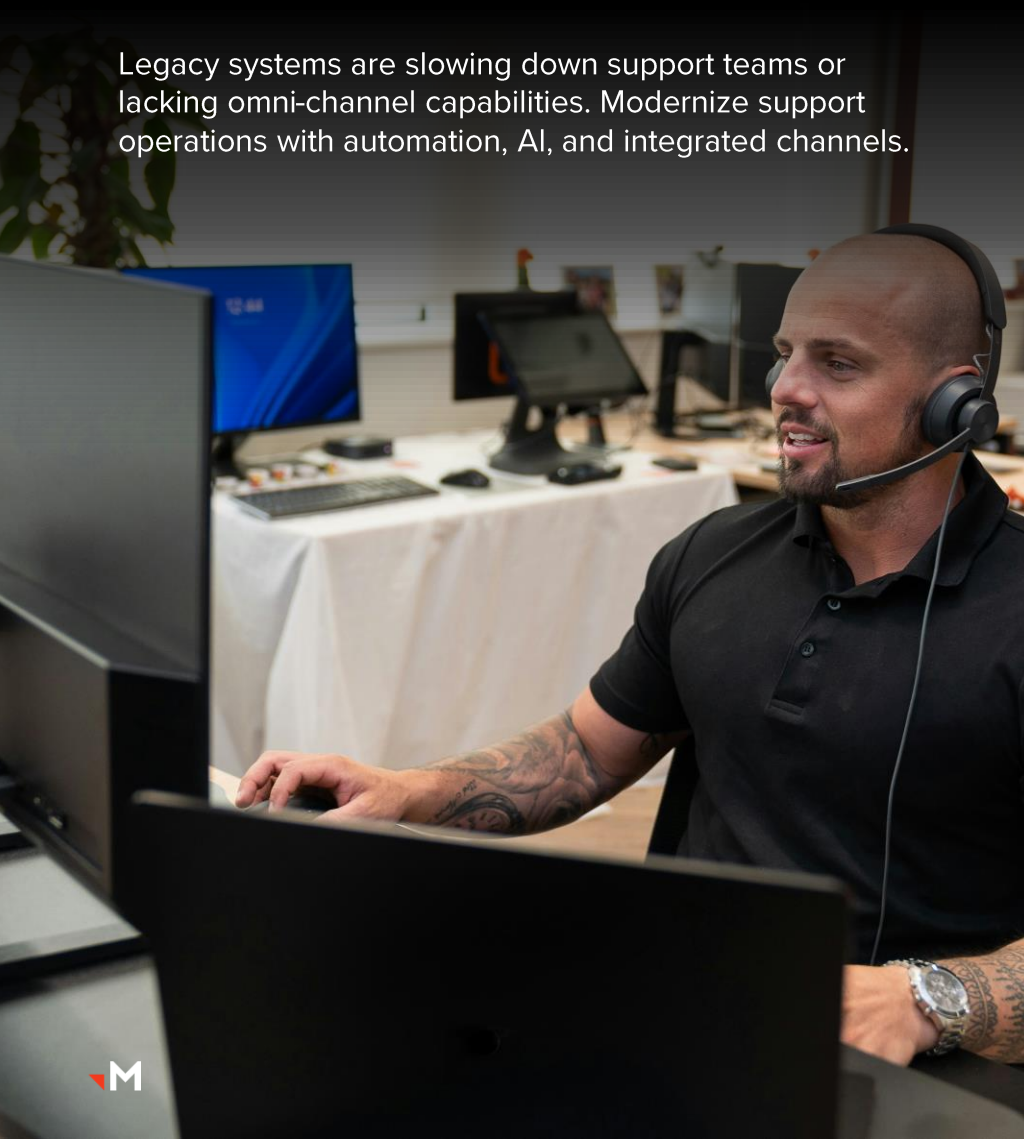

- Operational efficiency
- Customer satisfaction
- Revenue enablement

Service Modernization

Legacy systems are slowing down support teams or lacking omni-channel capabilities. Modernize support operations with automation, AI, and integrated channels.

Our Approach

Modernize B2B customer service by unifying data, teams, and channels on one platform to deliver proactive support, streamline operations, and strengthen long-term customer relationships.

Your Challenges

- Meeting rising customer expectations for fast, personalized, and consistent support while dealing with fragmented systems, outdated processes, and limited visibility across the customer lifecycle.

Our Solution

- Case management
- Omni-channel routing (chat, voice, email, social)
- Service Console
- Knowledge management

What You Get

- Decrease cost to service across sales and service (call deflection)
- Allows CSRs to focus on high value activities
- Increase average account value (cross-sell, upsell)
- Increase customer satisfaction

Field Service

The customer has technicians, installers, or mobile service workers. Digitally transform field service for better efficiency, scheduling, and real-time updates to maximize relevance and results.

Our Approach

Connects your frontline teams with real-time data, intelligent scheduling, and mobile tools to deliver faster, smarter, and more personalized onsite service

Your Challenges

- Inefficient scheduling and dispatching, leading to missed appointments or underutilized resources.
- Lack of real-time visibility into technician location, job status, and inventory.
- Disconnected systems and data silos that hinder coordination between service, sales, and support teams.
- Inconsistent customer experiences due to limited communication and service delays.
- Limited mobile capabilities, slowing down onsite resolution and documentation.

Our Solution

- Mobile Field Service app
- Smart scheduling & dispatching
- Asset & parts tracking
- Offline capabilities

What You Get

- Improved efficiency and cost savings through optimized scheduling, reduced repeat visits, and streamlined operations.
- Higher customer satisfaction and loyalty by delivering fast, transparent, and reliable onsite service.
- Increased revenue opportunities via preventative maintenance, service contracts, and empowered field teams

ACCOUNT-BASED

Operations & Automation

Account-based operations and automation **transforms traditional workflows** into **revenue-generating efficiency engines** that proactively drive productivity, resource optimization, and scalability across strategic accounts.

Operational Excellence is no longer optional but the foundation to scaling efficiently and maintaining competitive advantage.

- **50-70% reduction in internal communication lag** through integrated platform migration eliminating email-based processes
- **40-60% decrease in manual task overhead** via automated workflows and intelligent routing systems
- **Top 20% of customers receive premium service** while mid-tier accounts benefit from optimized automation and self-service capabilities

Key Stakeholders

Though their motivations, and pain points vary, they must align to reach a shared success.

	Operations Manager	Customer Success Manager	IT Leadership	CIO	Finance Leader
MOTIVATIONS	<i>"I need to streamline our workflows and reduce manual overhead while maintaining service quality across all customer tiers."</i>	<i>"The more efficiently we can serve our strategic accounts, the better relationships we can build and revenue we can protect."</i>	<i>"I need to ensure our systems integrate seamlessly and provide the automation capabilities our teams require."</i>	<i>"I need consolidated operational visibility and the ability to scale efficiently without proportional headcount growth."</i>	<i>"Make our operations cost-effective by having clear ROI on automation investments and resource allocation optimization."</i>
PAIN POINTS	Optimize resource allocation, improve team productivity, reduce operational costs	Deliver premium service to top accounts, reduce churn, increase account expansion	Platform integration, system reliability, scalable infrastructure	Operational efficiency, cost optimization, scalability planning	Cost control, ROI measurement, budget optimization
	Manual processes, email-based workflows, lack of automation visibility	Inconsistent service delivery, manual prioritization, limited account insights	Siloed systems, integration complexity, maintenance overhead	Limited operational visibility, scaling challenges, resource allocation inefficiencies	Unclear automation ROI, operational cost transparency, budget allocation inefficiencies

Our ABO Approach Transforms Operations

Transitioning from traditional email-based workflows to account-based operations requires a fundamental shift in resource allocation, automation, and service delivery to drive more impactful business outcomes.

TRADITIONAL B2B OPERATIONS

- Communication silos and inefficiencies
- One size fits all, service-based delivery

- Manual task overhead
- Reactive resource allocation agnostic of value

- Siloed productivity, no cross-team visibility
- Operational efficiency measured by task completion

ACCOUNT-BASED OPERATIONS

- **Integrated platforms (JIRA, Slack, Salesforce) reduce communication lag**
- **Strategic tiering ensures top 20% of customers receive premium human-touch service**

- **Automated workflows and intelligent routing reduce manual tasks**
- **Data-driven resource deployment optimized by account value and customer tiers**

- **Integrated analytics provide real-time visibility into team performance and bottlenecks**
- **Success measured by customer health scores and operational impact on revenue**

OFFERING SUMMARY

Account Based Operations & Automation

WHAT IT IS

A comprehensive internal operations transformation that restructures workflows, communication channels, and resource allocation based on account value and customer tiers to maximize efficiency while delivering differentiated service experiences.

Our Account Based Operations & Automation solution migrates internal workflows from email-based processes into integrated productivity platforms like JIRA, Slack, and Salesforce. This tiered approach ensures your top 20% of customers receive premium human-touch service while mid and lower-tier accounts benefit from intelligent automation and self-service capabilities, optimizing resource allocation and operational efficiency across your entire customer portfolio.

KEY BUSINESS OUTCOMES

Workflow Optimization & Productivity:

Eliminate email-based processes by migrating to integrated platforms (JIRA, Slack, Salesforce) that reduce internal communication lag by **50-70%** and improve cross-team collaboration efficiency.

Account-Based Resource Allocation:

Strategic tiering ensures top **20% of customers** receive premium human-touch service while automating mid-tier interactions, optimizing resource deployment and service quality across customer segments.

Operational Efficiency & Scalability:

Automated workflows and intelligent routing systems that reduce manual task overhead by **40-60%** while maintaining service quality standards and enabling team scalability.

Data-Driven Decision Making:

Integrated analytics across productivity tools provide real-time visibility into team performance, customer health scores, and operational bottlenecks enabling proactive management and strategic optimization.

ENGAGEMENTS

Workflow Migration & Integration**\$150-\$1M+ USD****Resource Optimization****\$150-1M USD****Productivity Platform Implementation****\$250-1M+ USD****Automation & Process Intelligence****\$100-1M+ USD****Communication & Collaboration Optimization****\$150-500KUSD**

Workflow Migration & Integration

Transform email-based processes into streamlined productivity workflows through strategic platform migration and integration, enabling real-time collaboration and automated task management across teams.

Our Approach

Migrate critical workflows from email to integrated platforms (JIRA, Slack, Salesforce) with automated handoffs and intelligent routing.

Your Challenges

- Email bottlenecks causing communication delays and lost context
- Disconnected systems creating duplicate work and data silos
- Manual task routing and assignment processes
- Lack of workflow visibility and progress tracking

Our Solution

- Platform assessment and migration roadmap development
- Custom workflow design and automation implementation
- Integration architecture connecting JIRA, Slack, and CRM systems
- Change management and team training programs

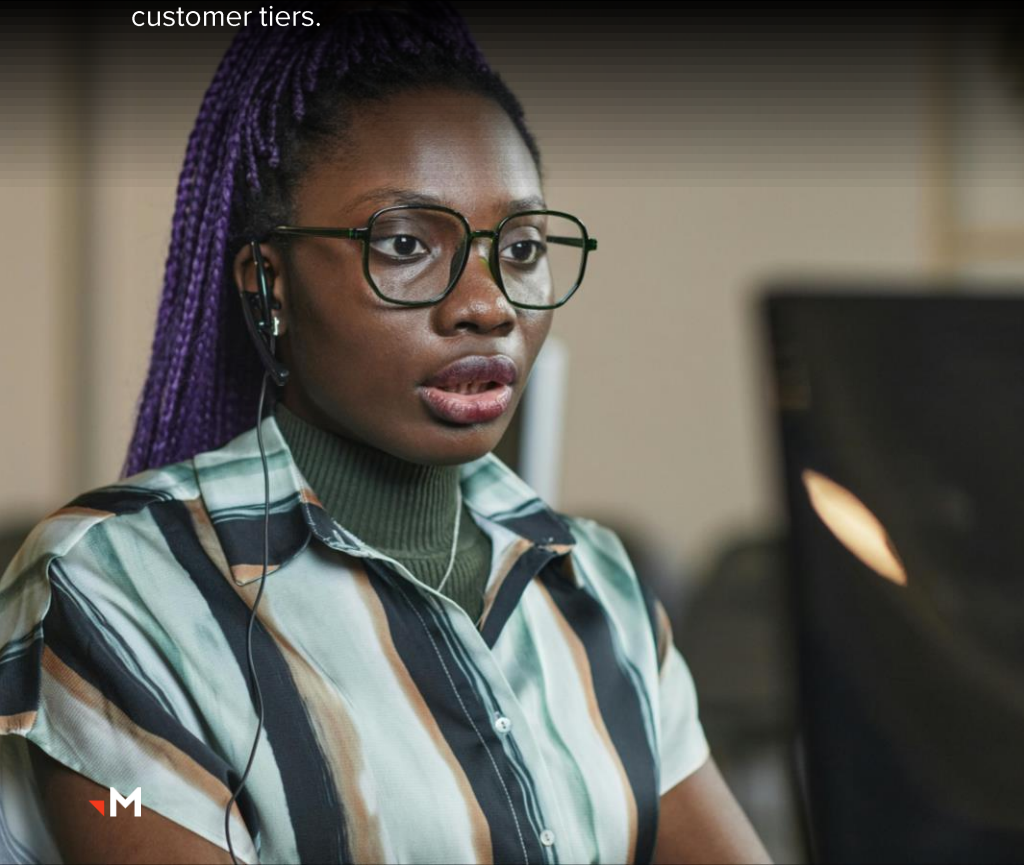

What You Get

- 50% reduction in communication response time
- Unified workflow visibility and tracking
- Automated task routing and escalation

**Representative
Clients:**

Resource Optimization

Implement strategic customer segmentation and resource allocation frameworks that ensure your most valuable accounts receive premium service while optimizing operational efficiency across all customer tiers.

Our Approach

Design account-based service models where top 20% receive white-glove treatment while mid and lower tiers benefit from intelligent automation.

Your Challenges

- Equal resource allocation regardless of account value
- High-value customers receiving standard service levels
- Team capacity constraints limiting service quality
- Unclear customer lifetime value and growth potential

Our Solution

- Customer value analysis and tier classification framework
- Service level agreement design by customer tier
- Resource allocation optimization and team specialization
- Automated routing based on customer tier and urgency

What You Get

- Premium experience for top 20% of customers
- Internal effort focused on revenue generation
- 30% improvement in resource utilization
- Increased customer and employee satisfaction scores

**Representative
Clients:**

Productivity Platform Implementation

Deploy and configure integrated productivity ecosystems including JIRA, Slack, and Salesforce with custom workflows, automation rules, and seamless data synchronization across platforms.

Our Approach

End-to-end implementation of JIRA, Slack, and Salesforce with custom configurations tailored to your operational requirements.

Your Challenges

- Equal resource allocation regardless of account value
- High-value customers receiving standard service levels
- Team capacity constraints limiting service quality
- Unclear customer lifetime value and growth potential

Our Solution

- Platform architecture design and technical implementation
- Custom workflow creation and automation rule setup
- Data migration and synchronization configuration
- User training and adoption support programs

What You Get

- Fully integrated productivity ecosystem
- 90% user adoption within 60 days
- Real-time data synchronization

**Representative
Clients:**

Automation & Process Intelligence

Deploy intelligent automation systems that learn from operational patterns, automatically route tasks based on complexity and priority, and provide predictive insights for proactive process optimization.

Our Approach

Implement AI-powered automation and process mining to eliminate manual tasks and optimize workflow efficiency.

Your Challenges

- High volume of repetitive manual tasks consuming team capacity
- Inconsistent process execution and quality control
- Reactive approach to process bottlenecks and issues
- Limited visibility into process performance metrics

Our Solution

- Process mining and optimization opportunity identification
- Intelligent automation rule development and deployment
- Predictive analytics for proactive process management
- Performance monitoring and continuous improvement frameworks

What You Get

- 60% reduction in manual task overhead
- Predictive process optimization
- Consistent quality and compliance

Representative
Clients:

Communication & Collaboration Optimization

Transform internal communication patterns through structured channels, automated notifications, and context-aware messaging that reduces information scatter while improving team coordination and response times.

Our Approach

Optimize communication flows through structured Slack channels, automated notifications, and intelligent message routing.

Your Challenges

- Information scattered across multiple communication channels
- Critical updates buried in email threads and chat noise
- Delayed responses due to unclear escalation paths
- Team members missing important notifications and updates

Our Solution

- Communication channel architecture and governance design
- Automated notification and escalation workflow setup
- Context-aware messaging and smart thread management
- Team communication training and best practices implementation

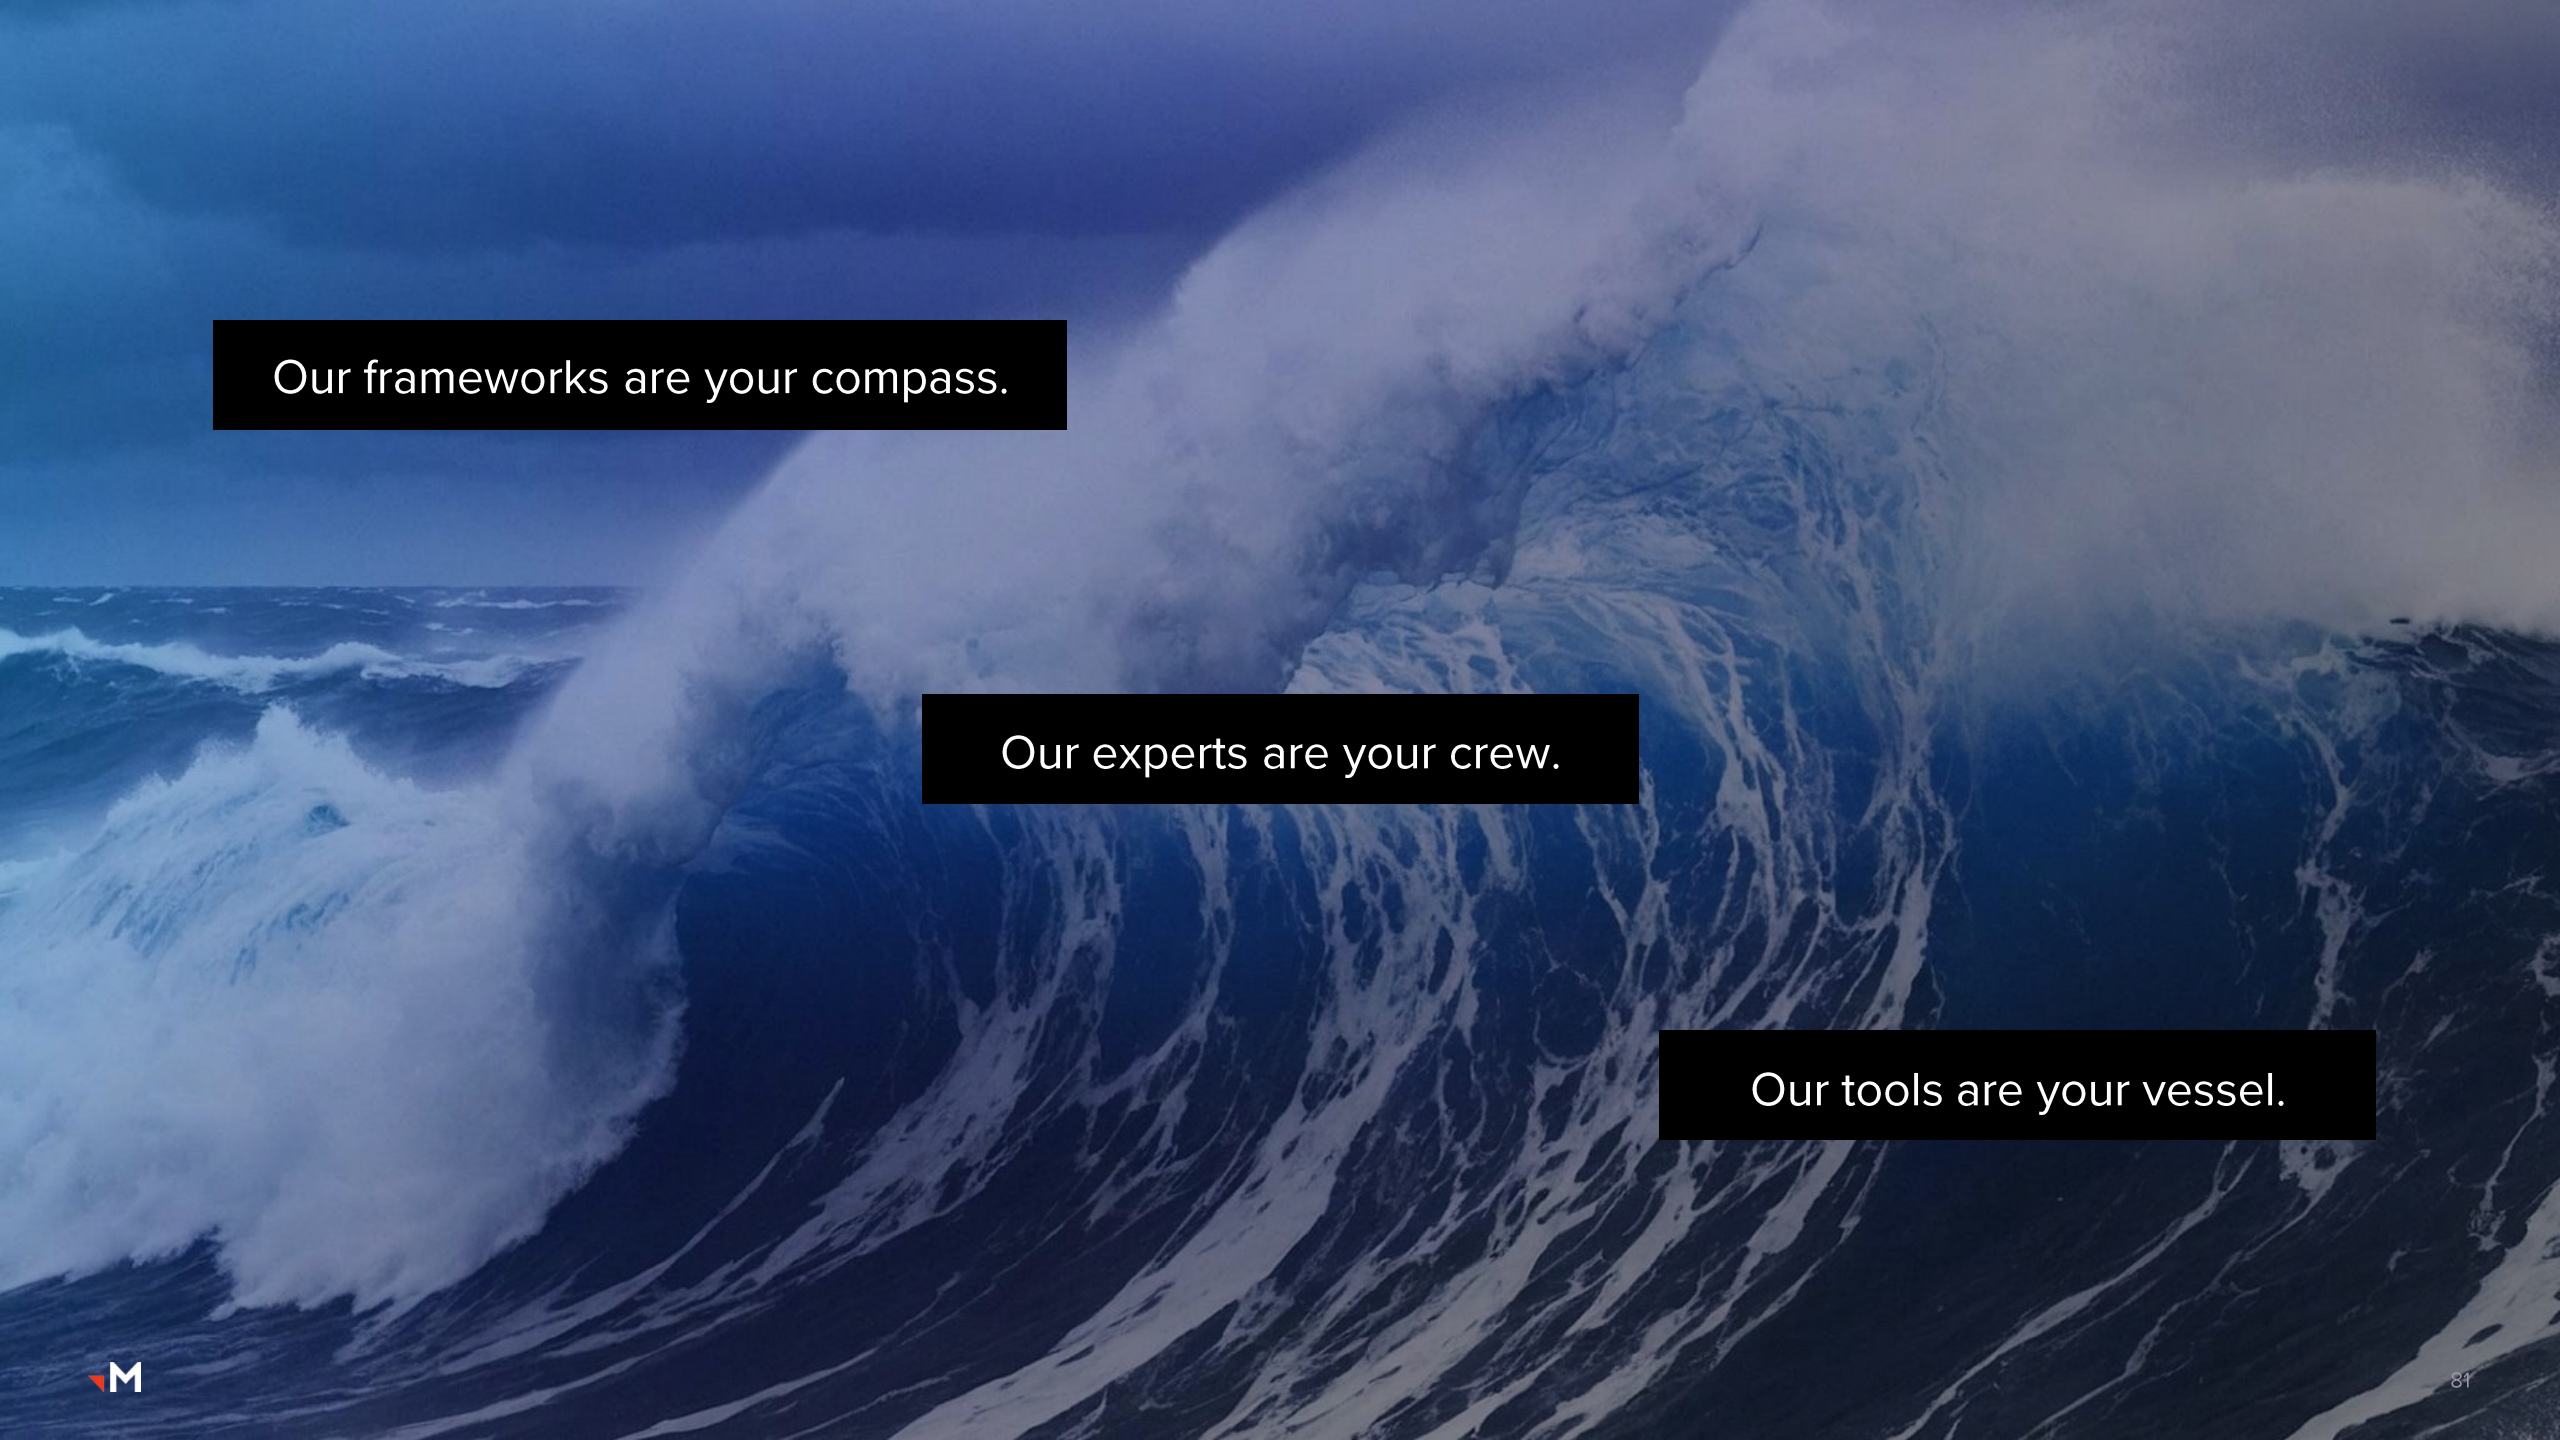

What You Get

- 40% faster response times
- Centralized information access
- Improved team coordination
