

Content Supply Chain Build Offering Toolkit

UPDATED: MARCH 2026

YOUR 1-PAGE SUMMARY

GTM HUB PAGE

This [link](#) has all the content to support the offering: training, engagement models, case studies, thought leadership, Merkle reports, etc.

Content Supply Chain: Build

WHAT IT IS

The **Content Supply Chain Build** is a platform designed for global enterprises seeking to scale content operations. Beginning with work design and change and built on an intelligent data fabric, the solution:

- Accelerates content workflow orchestration & collaboration
- Incorporates dentsu’s proven AI content production capabilities
- Produces content ready for dynamic syndication

This data-first build approach ensures brand integrity and regulatory compliance, enables AI adoption governance, and delivers enterprise agility to scale globally.

CSC Build is where IT and marketing leaders partner to realize value from CSC platform investments.

KEY BUSINESS OUTCOMES

Value Realization

310% ROI in 6 months

Enterprises implementing modern content supply chain platforms realize 310% ROI with payback periods under 6 months through combined efficiency gains, cost reduction, and revenue impact.

Content Velocity & Cost Optimization

2X output increase

Reduce content production costs and cycle times **by 20-30%**, **increasing** content **output 2x** without proportional increase in headcount.

Governance and Risk Mitigation

50% decrease in breaches

Achieve compliance and control AI adoption through automated governance, reducing compliance breaches **by up to 50%**.

WEDGE

ENGAGEMENTS

CSC Strategy Blueprint
2-4 Months

Investment: \$350k - \$500k USD

A foundational blueprint to inform a larger body of work. Focuses on aligning current state, target state, and priority efforts.

Innovation Accelerator
9-12 months

Investment: \$700K–\$1.5M USD

A focused program that anchors in a single use case, channel, market or portion of the supply chain. Used to prove out bigger investment

Turnaround and Recovery
5-12 months

Investment: \$500k - \$2M USD

Work is in progress and failing. They need immediate help, Not a strategic program, but we sell a lot of this work.

Enterprise Transformation
2-5 Years

Investment: \$5M+/year USD

Anchored with a PMO, this scaled, multi-year engagement unifies work across strategy, implementation, change, and vendor management to holistically build a complex supply chain

KEY CAPABILITIES

Engagements pull together these capabilities as client need state demands.

PART 1: POV and Narrative

These slides include content that supports the offering narrative. It includes problem space definition, predictions or expectations on how the market will develop, supporting market research, the opportunity space, and our unique POV or approach to solving the problem.

These slides are ready for client or prospect presentation.

Merkle's BUILD approach

Build.Buy.Borrow: The right sequence

Build: Blueprint content supply chain processes before touching technology. Map workflows, design governance frameworks, architect role-based operations, and establish a marketing data fabric including enterprise metadata and taxonomy.

Buy: Platform selection and refinement becomes strategic with a blueprint in hand. Technology that fits your architecture, not vendor defaults.

Borrow: Partner with experts who architect and use content supply chains at scale in organizations like yours.

The Merkle difference

Adoption-First Methodology: Change management and workforce enablement architected into platform design from day one. By 2027, organizations using proper adoption strategies will see average \$650K+ annual value per application as the digital adoption platform market reaches \$4.1 billion.

90-Day Value Waves: Prove ROI before scaling investment. Measure platform utilization, time to proficiency, and business outcomes through incremental delivery aligned to 2026-2030 transformation cycles.

Practitioners, Not Consultants: Merkle architects and implements value-generating content supply chains for some of the world's biggest brands, including Lumen (64% reduction in content creation time) and Adobe (82% efficiency gained per campaign). We use what we build.

The BUILD offering portfolio

- Content Supply Chain Strategy Blueprint (6-8 weeks)
- Enterprise Transformation (2-5 years)
- Innovation Accelerator (3-6 months)
- Turnaround and Recovery (3-6 months)

PART 2:

Case Studies and Why Merkle

This content provides reasons to believe that we are uniquely qualified to solve the client challenge presented in the preceding narrative.

Case studies should only be presented under NDA. If no NDA exists, the case studies should be blinded.

These slides are ready for client or prospect presentation.

Why Merkle

Accelerating Engagement and Growth with a Modern Content Supply Chain

BUSINESS CHALLENGE

Lumen was evolving from a traditional network service provider to a modern B2B tech solutions partner. But their disconnected marketing and CX technology stack, manual workflows, and siloed data architecture prevented them from delivering personalized customer experiences at scale.

MERKLE SOLUTION

Merkle developed a comprehensive digital transformation strategy spanning data modernization, content supply chain optimization, and technology architecture alignment. Through strategic assessments, enterprise-wide data strategies, and hands-on implementation support, we equipped Lumen to compete as a leading technology services provider.

- **Content Supply Chain Optimization:** Accelerated content creation from 25 days to 9 days through Adobe GenStudio
- **Enterprise Data Strategy:** Developed roadmaps to optimize Adobe and Salesforce platform integration
- **Architecture Modernization:** Created a transformation roadmap with detailed integration strategies
- **Operating Model and Process Design:** Recommended governance frameworks and standardized processes
- **Customer Journey Development:** Built the foundation for real-time, personalized engagement strategies

3x

creation time

B2B TECH AND OPERATING STRATEGY

B2B Operating Model Design, Workflow Enablement, and Segmentation Strategy

BUSINESS CHALLENGE

A global semiconductor manufacturer struggled with Content Supply Chain fragmentation across regional teams and product lines. Campaigns were planned in silos, content lacked clear audience mapping and global initiative alignment, and no standardized processes connected creative work to revenue goals.

MERKLE SOLUTION

Transformed workflow enablement to stabilize Content Supply Chain operations, achieving measurable improvements in campaign efficiency and financial accountability. Merkle implemented Workfront standardizing templates and automating workflows, reducing creative briefing cycle time by 40% and eliminating non budget approved content production. The solution delivered reusable processes that improved resource allocation visibility and created audit trails connecting every content asset to campaign objectives and revenue targets. Additionally, the solution facilitated the coordination between agency partners and the organization, reducing manual email communications and ad-hoc approval process flows.

4

Global regions on-boarded

80+

60%

reduction in duplicate briefs

B2B TECH AND OPERATING STRATEGY

Drive transformation through an adaptive end-to-end Content Supply Chain Solution

BUSINESS CHALLENGE

Fragmented tools and manual processes slowed content delivery and limited efficient collaboration across global client and agency of record teams.

MERKLE SOLUTION

We integrated Adobe's marketing technology stack to create GenStudio dentsu+, a unified content supply chain solution. Merkle's comprehensive discovery uncovered 110 optimization opportunities, with 35% addressable through technology and proposed an integrated workflow ecosystem and roadmap to eliminate manual handoffs and enable scalable content production with built-in governance and measurement.

THE WORK

- Launched a Future-State Architect Design connecting Workfront, AEM, DI Studio, Firefly, Creative Cloud, Figma and distribution platforms
- Established metadata taxonomy and content organization framework with established governance policies for asset ownership and workflows
- Built 12 AI powered creative automations, WF-to-WF, Workfront-to-AEM, Dropbox, and to DI-Studio integrations for scaled asset production
- Delivered Customer Journey Analytics proof-of-concept, enabling end-to-end content performance measurement
- Created a Change Management and Adoption Plan, with identified Champions, roadmap and support infrastructure

UPON IMPLEMENTATION RESULTS

**\$3.3M Projected
Annual Savings**

**82% Efficiency Gained Per
Campaign**

**Integrated Adobe and
dentsu innovations**

**Reimagined content
creation and visibility**

We power the experience economy.

\$35B+

Merkle delivers what system integrators and traditional agencies can't: marketing transformation expertise paired with enterprise technology depth.

We build modern marketing operating systems that deploy compliant, culturally relevant campaigns at market speed through proven technology, custom development, and agency excellence – simultaneously.

What makes us different:

- **Marketing-first technologists** – Business value and creative expertise drive our technology decisions
- **Enterprise transformation rigor** – CSC platform depth, AI methodology, and change management capabilities agencies lack
- **Bilingual execution** – We speak both IT and Marketing, eliminating translation gaps and delivering integrated solutions

	 MERKLE	CONSULTING FIRMS	AGENCIES	SYSTEM INTEGRATORS
	Cohesive full growth services	Strategic advisory, fragmented (sometimes outsourced) delivery	Marketing and creative heritage, basic technology implementation	Tactical implementation, lack of strategic/marketing capability

Content Supply Chain Strategy Blueprint

YOUR CLIENT-FACING 1-PAGE SUMMARIES LOOK LIKE THESE

OVERVIEW

CSC Strategy Blueprint

Define your content supply chain current state, target state, and priority initiatives in a technology assessment.

The CSC Strategy Blueprint creates stakeholder alignment before larger transformation efforts begin. Our team assesses existing workflows, technology capabilities, and organizational readiness to establish a clear baseline and define your target Content Supply Chain operating model. The engagement delivers a prioritized roadmap that sequences initiatives based on business impact and feasibility.

INCLUDES (DELIVERABLES)

- Current State Assessment
 - Quantitative Maturity Model
 - People, process & technology observations
- Target State Operating Model
- Target State Process Maps
- Key Observations and Themes
- Future State Prioritized Initiative roadmap
- Business case for Transformation investment

EXAMPLE DELIVERABLES

CSC Strategy Blueprint Timeline -GOLD

Timeline may be adjusted for assessments of externally developed environments, and Level of engagement by Merkle.

Bronze = 8 weeks

Silver = 12 weeks

DISCOVERY & ANALYSIS

9 Weeks

Understand current state and define the future vision

- Conduct stakeholder interviews across teams
- Audit current technology stack, operations, and people roles
- Map existing workflows identifying bottlenecks, pain points, and inefficiencies
- Assess organizational readiness and identify key stakeholder sand sponsors

WORKFLOWS & ENABLERS

6 Weeks

Prioritize initiatives and show system integration

- Create future-state technology blueprint
- Define future-state operating model
- Map technology recommendations to use-cases & business impact
- Validate vision with stakeholder alignment session
- Create clear RACI by group or organization participating in the process or delivery

IMPLEMENTATION ROADMAP

4 Weeks

Sequence investments and define value frameworks

- Develop phased implementation roadmap
- Establish KPIs, success metrics and project value outcomes
- Deliver final readout with investment requirements
- Provide business case for transformation investment (BVA)

Investment: \$500,000 *

Timing: 16 Weeks

Outcomes:

- Aligned stakeholder vision
- Clear investment priorities
- Defined transformation roadmap
- Validated business case

* Investment starting point and final figure dependent on scope & complexity.

PACKAGED ENGAGEMENT

Innovation Accelerator

YOUR CLIENT-FACING 1-PAGE SUMMARIES LOOK LIKE THESE

Proving business value through a structured approach

Throughout the assessment and the POC, we establish clear baselines, design a blueprint for change, and measure impact to demonstrate tangible value across people, process, and technology.

IDENTIFY BASELINES ACROSS PEOPLE, PROCESS & TECH

DESIGN THE BLUEPRINT

DEMONSTRATE VALUE

$$\left(\frac{\text{Effort Savings}}{\text{Pre}} \right) \times 100 = \% \text{ EFFICIENCY/LIFT}$$

OUR APPROACH FOR DRIVING MEASURABLE IMPACT

- "Roll-up-our-sleeves" rapid prototyping across marketing ecosystem teams
- Produce current state benchmark analysis
- Identify improvements, gaps, and key process needs
- Create blueprint for future state
- Compare baselines against future state
- Pressure-test change elements
- Ensure regular and scalable quick wins
- Track pre- vs post-change performance
- Quantify efficiency, adoption, and ROI gains
- Refine through ongoing feedback and optimization

OVERVIEW

Innovation Accelerator

Prove content supply chain value through a focused pilot targeting a single use case or market.

Innovation Accelerator enables organizations to explore and validate innovative content supply chain capabilities through a focused, low-risk pilot aligned to a specific use case, market, or channel. This engagement activates platforms, workflows, governance, and AI-enabled content production within a controlled environment—allowing teams to test new approaches, assess platform potential, and measure impact without disrupting core operations. Backed by Merkle’s cross-platform expertise and proven accelerators, Innovation Accelerator generates the insights, performance data, and organizational confidence needed to inform smarter investment decisions and guide future scale.

INCLUDES

- Use case definition and success criteria
- AI content production proof of concept
- Pilot platform configuration
- Performance measurement framework
- Workflow design and implementation
- Scale readiness assessment and recommendations

Innovation Accelerator Program Timeline

MONTHS

SELECT THE OPPORTUNITY & ITS VALUE

1-4 mos

Criteria for a successful POC

- Content & Technology Stack Audit
- System Integration and API Assessment
- Taxonomy, Governance and Workflow analysis
- Gap Identification and Impact Qualification
- POC Use Case Selection & Success Criteria

BUILD A PILOT

4-6 mos

Deploy the POC:

- Platform Configuration & Environment Setup
- Taxonomy & Metadata Deployment
- Workflow Design & Automation Implementation
- Workflow Implementation and Training
- Performance Measurement & Blueprint Documentation

MEASURE IMPACT

2-4 mos

Quantify business value, democratize and scale implementation:

- Performance and KPI Analysis
- Business Impact and ROI Quantification
- Roadmap Development and Business case

Investment: \$700K – 1.5+M

Timing: 9-12+ months

Outcomes:

- Validated proof for specific use case
- Quantified efficiency and cost improvements with baseline comparison
- Blueprint for scaled implementation across enterprise
- Platform capabilities demonstrated with real production workflows
- Confidence and momentum for broader transformation investment

PACKAGED ENGAGEMENT

Turnaround & Recovery

YOUR CLIENT-FACING 1-PAGE SUMMARIES LOOK LIKE THESE

OVERVIEW

Turnaround & Recovery

Stabilize failing content operations with rapid intervention and targeted course correction.

Turnaround & Recovery stabilizes failing or stalled content supply chain initiatives through rapid diagnosis, executive governance reset, and targeted remediation across technology, process, and organizational dimensions. This engagement prioritizes immediate operational stabilization, reduction of implementation debt, and correction of workflows and configurations that impede delivery. By restoring clear ownership, decision rights, and user confidence, Turnaround & Recovery establishes a credible foundation for sustained optimization and scalable content operations.

INCLUDES

- Operational diagnostic and root cause analysis
- Stabilization plan and immediate remediation
- Workflow optimization and process fixes
- Executive governance and decision-rights reset
- Recovery roadmap with milestones with re-baselined success metrics
- Technology configuration remediation and integration corrections
- Reduction in implementation and customization debt
- Team realignment and role clarification
- Adoption Recovery and targeted enablement

Turnaround & Recovery Program Timeline

DIAGNOSE & RE-ANCHOR

4-6 Weeks

Shared understanding of why the implementation failed and what must change to recover.

- Perform a comprehensive operational diagnostic across technology, workflows, governance, and adoption
- Identify systemic root causes of failure, including customization debt, tooling gaps, and decision breakdowns
- Evaluate current-state platform configurations, integrations, and end-to-end data flows
- Align executive sponsors on recovery scope, priorities, decision rights, and success criteria
- Re-baseline outcomes, constraints, and risk assumptions to support a realistic recovery path

STABILIZE & RESET

4-6 Weeks

A stabilized environment that supports consistent delivery while recovery work continues.

- Establish a recovery PMO with clear decision rights, escalation paths, and delivery cadence
- Execute rapid stabilization actions to reduce day-to-day friction for delivery teams
- Rationalize workflows to eliminate unnecessary steps, handoffs, and manual workarounds
- Remediate critical configuration and integration issues impacting delivery
- Define short-term operating guardrails to prevent regression during recovery

RECOVER & REMEDIATE

6-10 Weeks

A corrected and supportable content supply chain foundation aligned to how the organization *actually* works.

- Remediate platform configurations and integrations using platform-native patterns
- Reduce over-customization and implementation debt to improve scalability and supportability
- Redesign core workflows aligned to roles, throughput, and business priorities
- Clarify team roles, responsibilities, and ownership across the content supply chain
- Re-establish core governance standards for intake, prioritization, and compliance

READOPT & ENABLE

4-6 Weeks

Re-engaged teams, consistent system usage, and visible momentum toward long-term optimization.

- Execute adoption recovery focused on priority roles and critical workflows
- Deliver targeted enablement tied directly to real work, not generic training
- Reinforce new ways of working through playbooks, job aids, and operating rituals
- Validate early wins and measure improvement against re-baselined success metrics
- Prepare transition plan to optimization or scale-out engagement

Investment: \$500K-\$2+M

Timing: 5-12+ Months

Outcomes:

- Restored operational stability and predictable delivery
- Simplified, supportable platform foundation
- Re-established accountability and governance
- Faster throughput and higher content reuse

PACKAGED ENGAGEMENT

Enterprise Transformation

YOUR CLIENT-FACING 1-PAGE SUMMARIES LOOK LIKE THESE

OVERVIEW

Enterprise Transformation

Rebuild your content supply chain holistically through unified strategy, implementation, and change management.

Enterprise Transformation addresses organizations ready to fundamentally reimagine content operations at scale. Anchored with a dedicated PMO, this engagement unifies platform implementation, workflow redesign, data architecture, AI integration, and organizational change under a single program. We coordinate across internal stakeholders and external vendors to deliver sustained efficiency, governance, and adaptability.

INCLUDES

- Program governance framework and PMO structure
 - Enterprise platform implementation
 - Content data fabric architecture
- AI adoption and governance framework
 - Organizational change management program
 - Vendor coordination and integration management

Several ways in which Merkle partners with clients on AI Observability

Effective observability systems require tailored infrastructure, seamless tool integration, and ongoing optimization. Together, these elements create the necessary foundation for continuous improvement.

1 **Bespoke Observability Systems**

Design & build tailored measurement & evaluation infrastructure

2 **Implementation of 3rd Party Solutions**

Evaluate & integrate open source or proprietary tools

3 **Analytics & Continuous Improvement**

Use data insights for ongoing system enhancement

POTENTIAL COMPONENTS:

- Baseline & ongoing performance evaluations
- Iterative testing & learning
- Best practice recommendations

DOOR OPENER

INTELLIGENT WORK ORCHESTRATION

5-Whys Workshop

BUSINESS CHALLENGES / CLIENT NEEDS

Organization experiences recurring operational failures despite multiple tactical fix attempts, with cross-functional teams addressing symptoms rather than uncovering and resolving systemic root causes.

OBJECTIVE

Apply structured 5-Whys methodology to uncover true root causes, establish cross-functional consensus on identified issues, work to create collaborative culture, and identify quick wins alongside strategic orchestration recommendations.

OUTCOMES

- Validated root causes with supporting evidence and stakeholder consensus
- Strategic recommendations addressing systemic issues (not just tactical band-aids)
- Quick win opportunities to deliver efficiency improvements
- Cross-functional alignment on problem definition and solution approach
- Clear pathway from root cause findings to broader orchestration strategy

SCOPE & DELIVERABLES

- Facilitated workshop investigating specific workflow friction or recurring operational failure
- Apply 5-Whys methodology with cross-functional stakeholders to uncover root causes
- Single problem focus (e.g., "Why do campaigns consistently miss launch dates?" or "Why is content approval taking 3+ weeks?")
- 8-15 participants representing all workflow touchpoints (requestors, executors, approvers, technology owners)
- Pre-workshop prep: Brief stakeholder interviews, process documentation review
- Workshop facilitation: 4-6 hours over 1-2 sessions
- Pre-Workshop Brief (5 slides)
- Workshop Facilitation
- Root Cause Analysis Report (10-15 slides)
- Executive Debrief (60 minutes)

IDEAL FOR...

- Organizations with specific recurring workflow failures causing business impact
- Clients who've tried tactical fixes but problems persist (symptom treatment vs. root cause)
- Cross-functional teams experiencing finger-pointing and blame rather than systemic problem-solving

Investment: **See market pricing**

Timing: 3 Weeks

RESOURCES:

- Principle
- Sr. Manager

The diagram illustrates a data architecture and activation flow. It starts with data sources like Snowflake (Data Warehouse), LiveRamp (Data Enrichment/Identity Resolution), Amplitude (Analytics/Audience Management), and Nifty Images (Real-time personalization). These feed into a central processing layer with tools like Braze (ESP, Personalization, Journey Orchestration), Talon.One (Offer Management), branch (Deep Linking), and SANITY (Creative Hosting). The processed data then flows to AWS (Deep Format AI - Offer Customization) and finally to Customer X via various channels like Email, Mobile App, and Social Media (Facebook, Snapchat, TikTok, Instagram, YouTube). A 'Golden Record' is shown as a central hub for identity resolution. A 'NEW' section highlights 'Enterprise Asset Management' and 'Creative automation'.

Enterprise Transformation Program Timeline

STRATEGY & ALIGNMENT

2-4 Months

Define vision, outcomes, and secure executive sponsorship

- Market & Client Context Analysis:** Trends, benchmarks, competitive landscape.
- Value Hypothesis & Business Case:** ROI targets, KPIs, funding model.
- Executive Alignment & Governance Setup:** Exec buy-in, steering committee, decision rights.
- Change Readiness Assessment:** Culture, capacity, risk posture.

PLANNING AND TECH ENABLEMENT DESIGN

2-4 Months

Architect the operating model workflows

- Current State Assessment:** Tech stack, data, workflows, governance maturity.
- Target State Blueprint:** Roles, RACI, orchestration design.
- Integration & Architecture Planning:** Composable design, interoperability.
- Governance Framework:** Taxonomy, Privacy, consent, AI guardrails.

IMPLEMENTATION ACTIVATION

5+ Months

Stand up capabilities and prove value

- Platform Configuration & Integration:** Data, identity, content, decisioning.
- Workflow Orchestration:** Intake → decisioning → activation → measurement.
- Enablement & Adoption Programs:** Training, change management, playbooks.
- Pilot Use Cases:** Quick wins to validate hypotheses.

MEASUREMENT & OPTIMIZATION

3-12 Months

Instrument value and optimize continuously.

- Reporting Kit Setup:** Dashboards, KPIs, feedback loops.
- Performance Tracking:** ROI realization, adoption metrics.
- Optimization Cycles:** Test-and-learn, AI tuning, workflow refinement.
- Reporting & Communication:** Executive updates, success stories.

Investment: \$5M+

Timing: 12-24 Months

Outcomes:

- Unified content operating system
- Scalable enterprise governance
- Reduced production cycle times
- Increased content output capacity
- Reduced costs of production

* Timelines assume active participation from designated client SMEs or dedicated resources across all phases.

The schedule reflects the transformation of the **core enterprise delivery process. Encompassing participating business units are managed as a distinct customer with own timing and cost.

PART 4: Training

The aim of this **INTERNAL ONLY** section is for sales teams to learn the details of the offering, how it fits in the overall Merkle capability landscape, the various packages you can sell within this offering based on client needs, and how to sell it to clients and prospects.

Complete the Content Supply Chain Diagnostic

An interactive 45-question diagnostic that evaluates client content operations across five core areas on a 1 to 5 scale:

- 1. Creation and Production
- 2. Workflow and Planning
- 3. Asset Management
- 4. Delivery and Activation
- 5. Data, Reporting, and Insights

Goals:

- Establish quantitative baseline of current capabilities
- Identify operational gaps
- Prioritize improvement initiatives

HEALTH CHECK DELIVERABLES

Current State v. Industry Benchmark Report

Data-Driven Business Case

MATURITY LEVEL SCORES

DEFINED

Score
1.0 – 1.9

Siloed teams, manual work and reactive / chaotic approach to content. Reliance on tools like excel, email and WeTransfer to manage content.

INTEGRATED

Score
2.0 – 2.9

Tools like DAMs and project management may be used, but other workflows are manual and limited connections between content, experience and media teams.

OPTIMIZED

Score
3.0 – 3.9

Connected teams with integrated tech, working to common objectives and measuring against standardized KPIs.

INNOVATIVE

Score
4.0 – 5.0

Fully connected and integrated teams across markets, powered by data, tech and intelligence, with more and more work being done by AI agents.

Content Supply Chain: Build

CSC Diagnostic scores Mapped to Build and Activate Offerings

Build
Move a client from blueprint to enterprise transformation with engagements to prove value along the way.

Activate
Designed to take a client's CSC build from enterprise adoption to run & optimize managed services.

Client Journey: **BUILD** → **ACTIVATE** Cross-sell once Build stabilizes

YOUR 1-PAGE SUMMARY

CONTENT SUPPLY CHAIN: BUILD

CSC Strategy Blueprint

BUSINESS CHALLENGES

- Unclear transformation investment priorities
- Misaligned stakeholder content vision
- Undefined target operating model
- Inability to Scale Content for Omnichannel Demand
- Limited Visibility into Work, Costs, and Performance

OBJECTIVE

Assess current content supply chain workflows, technology, and organizational readiness to define a clear target state. Align stakeholders on priority initiatives and sequencing before committing to larger platform investments. Deliver a business case that enables confident decision making.

FOLLOW-ON ENGAGEMENTS

- Enterprise Transformation
- Innovation Accelerator
- Content Data Fabric

CLIENT EXAMPLES

Princess Cruises

APPROACH

- Facilitate stakeholder alignment sessions
- Conduct stakeholder discovery interviews
- Identify technology capability gaps
- Map technology recommendations to use-cases & business impact

DELIVERABLES

- Current state assessment
- Target operating model & process maps
- Prioritized implementation roadmap
- Business case for transformation investment

MERKLE PRODUCTS AND IP

- CSC Framework and Maturity Models

Investment: \$500,000

Timing: 8-16 Weeks

Outcomes:

- Aligned stakeholder vision for content supply chain transformation
- Clear investment priorities validated by business case
- Defined technology implementation roadmap
- Validated business case enabling confident executive decision-making

YOUR 1-PAGE SUMMARY

CONTENT SUPPLY CHAIN: BUILD

Innovation Accelerator

BUSINESS CHALLENGES

- Limited (if any) AI, Automation, Modularity, Experimentation
- Innovation Is Slow, Risky, and Hard to Operationalize
- High Curiosity, Low Confidence in Emerging Technologies
- Disconnected Experiments Across Teams
- Unclear ROI from Innovation Investments
- Legacy Processes Constrain Modern Content Ambitions
- Gap Between Strategy and Execution

OBJECTIVE

Rapidly validate the business value of targeted platform innovations through a structured, low-risk approach. The Innovation Accelerator helps align stakeholders, de-risk investment decisions, and establish a clear path from experimentation to scalable transformation.

FOLLOW-ON ENGAGEMENTS

Enterprise Transformation
Continuous Value Accelerator

CLIENT EXAMPLES

APPROACH AND DELIVERABLES

- Define pilot scope criteria
- Configure pilot platform environment
- Implement targeted workflow design
- Execute AI production proof
- Assess enterprise scale readiness

MERKLE PRODUCTS AND IP

- AEM, Assets, Jira, WF proprietary integrations
- Figma, Creative Cloud, Adobe Assets, Workfront connectors
- AEM, Figma, Frame, WF, AEM integrations
- Assets, Marketing Cloud, Journey Analytics connectors

Investment: \$700 – 1.5+M

Timing: 9-12 months

Outcomes:

- Validated platform capabilities
- Quantified business impact
- Reduced investment risk
- Internal capability foundation

YOUR 1-PAGE SUMMARY

CONTENT SUPPLY CHAIN: BUILD

Turnaround & Recovery

BUSINESS CHALLENGES

- Stalled content supply chain initiatives due to fragmented ownership and over-customization
- Low adoption as tools and workflows diverge from how teams actually work
- Unclear governance and slow decision-making impacting speed and quality
- Prior investments have not delivered expected efficiency or scale

OBJECTIVE

Restore stability and confidence in the content supply chain by diagnosing root causes of failure and implementing targeted remediation across technology, process, and governance. This engagement resets ownership, reduces complexity, and re-establishes scalable operating foundations—positioning the organization for sustained optimization and delivery at scale.

FOLLOW-ON ENGAGEMENTS

- Innovation Accelerator
- Enterprise Transformation
- Long-term Model Maturation
- Continuous Value Accelerator

CLIENT EXAMPLES

Novo Nordisk, Highmark Health

APPROACH

- Conduct operational diagnostic assessment
- Identify root cause failures
- Execute immediate stabilization plan
- Implement workflow process corrections
- Reset governance, roles, and decision rights
- Deliver recovery milestone roadmap

DELIVERABLES

- Rapid current-state assessment to identify critical risks, blockers, and root causes
- Immediate stabilization actions and high-impact quick wins
- Prioritized recovery roadmap with clear milestones and ownership
- Platform, process, and data remediation to restore operational confidence
- Executive readout with findings, progress, and recommended path forward

Investment: \$500K - \$2+M

Timing: 5-12 Months

Outcomes:

- Restored operational stability
- Preserved platform investments
- Rebuilt stakeholder confidence
- Clear optimization pathway

YOUR 1-PAGE SUMMARY

CONTENT SUPPLY CHAIN: BUILD

Enterprise Transformation

BUSINESS CHALLENGES

- Fragmented enterprise content operations
- Complex multi-vendor technology landscape
- Inconsistent governance across markets
- Inconsistent Brand, Messaging, and Compliance
- Slow Time-to-Market

OBJECTIVE

Rebuild the content supply chain holistically through coordinated strategy, platform implementation, and organizational change. Unify workflows, data architecture, and AI capabilities under an integrated operating system. Establish enterprise governance that ensures brand integrity and compliance at scale.

FOLLOW-ON ENGAGEMENTS

CSC Activate Adoption
Continuous Value Accelerator

CLIENT EXAMPLES

Dentsu Creative – Adobe, Microsoft

APPROACH AND DELIVERABLES

- Establish PMO governance structure
- Implement enterprise content platform
- Design content data fabric
- Deploy AI governance framework
- Execute organizational change program
- Program Governance Framework
- Current State Assessment
- Change Readiness Assessment
- Design Documentation
- Reporting Infrastructure
- Post-launch Support

Investment: \$5M / year + \$200K/BU
Timing: 2 -5 years

- Outcomes:**
- Unified content operating system
 - Scalable enterprise governance
 - Reduced production cycle times
 - Increased content output capacity
 - Reduced costs of production

Content Supply Chain: Build

Buyers and Industries

Understand our buyer and their motivation as well as the outcomes we deliver that help them meet their goals. Dive into industry-specific considerations.

PRIMARY AUDIENCE

CEO/CTO/CMO

C-suite executives responsible for justifying and directing major technology investments. They need to build or rebuild content infrastructure that can scale across markets while meeting regulatory requirements. Their concerns center on designing the right foundation before committing significant capital.

Concern #1

Undefined technology architecture

Lack of clarity on which platforms, integrations, and capabilities are needed to support content operations at scale. No blueprint exists to guide transformation investment.

Concern #2

Fragmented systems and data

Content lives in disconnected systems with no unified data fabric. Teams work in silos, duplicating effort and unable to share assets or insights across markets.

Concern #3

Governance gaps creating risk

No frameworks exist for AI governance, compliance automation, or brand control. Technology decisions are made without guardrails, creating regulatory exposure.

PRIMARY OUTCOMES

CSC Build designs and implements the foundational infrastructure for enterprise content operations. We architect intelligent platforms, unified data fabrics, and governance frameworks that enable organizations to scale content production while maintaining brand integrity and regulatory compliance. Build creates the foundation; Activate operationalizes it.

Outcome	Why CSC Build Matters
KPI: Platform Integration Completeness	Measures the percentage of content systems unified under a single architecture. Directly impacts ability to orchestrate content end-to-end and eliminate redundant technology spend.
KPI: Data Architecture Maturity	Measures completeness of the content data fabric, including taxonomy coverage and metadata standardization. Indicates readiness for AI-powered production and content intelligence.
KPI: Governance Framework Coverage	Measures the percentage of workflows with embedded compliance automation and approval controls. Demonstrates ability to scale while maintaining regulatory compliance.
KPI: Time to Platform Value	Measures elapsed time from implementation start to first measurable business outcome. Validates the business case for continued investment. Target: positive ROI within 6 months.

Content Supply Chain: Build

01

Buyers and Industries

Understand our buyer and their motivation as well as the outcomes we deliver that help them meet their goals. Dive into industry-specific considerations.

PRIMARY AUDIENCE

VP of Marketing, VP of Digital Experiences, Director of IT

This buyer typically reports to the C-suite mentioned in the previous slide. More often than not, this buyer is our decision maker who needs sign-off from the C-suite for project initiation. This buyer typically owns technology strategy and infrastructure decisions for marketing or digital teams and is concerned more strategically than operationally. They are generally responsible for evaluating platforms, defining requirements, and building the business case for transformation investments. This buyer is focused on designing the right foundation that will support the organization for years to come. They will be concerned with architecture decisions, vendor selection, integration complexity, and long-term scalability.

Architecture Decisions

This buyer wants confidence that technology choices will support current needs and future scale. How do we design the right foundation?

Transformation Leadership

This buyer wants a clear roadmap and business case to secure executive commitment. How do we get leadership buy-in for transformation?

PEERS AND INFLUENCERS

C-Suite, Enterprise Architecture, Finance and Procurement

Decision makers at this level are typically influenced across many roles inside the organization that will impact their final decisions. They will typically require buy-in from peers and members of their teams before making a final recommendation to the C-suite. Build decisions involve significant capital investment and long-term technology commitments.

Financial Return

Finance requires detailed business cases with clear ROI projections. Build investments are capital-intensive, requiring 310% ROI with payback periods under 6 months to justify transformation spend.

Enterprise Architecture

IT architecture teams evaluate platform decisions against enterprise standards, security requirements, and integration complexity. They must approve technology selections and own long-term maintainability.

Compliance and Legal

In regulated industries, legal and compliance must validate that governance frameworks, AI guardrails, and audit capabilities meet regulatory requirements before implementation begins.

Content Supply Chain: Build

Buyers and Industries

Understand our buyer and their motivation as well as the outcomes we deliver that help them meet their goals. Dive into industry-specific considerations.

TARGET INDUSTRIES

Describe specific industries or verticals where this offering is particularly relevant.

Industry	Why CSC Build Matters	Do we have vertical-specific content?
Healthcare and Life Sciences	Pharmaceutical and healthcare organizations require purpose-built content infrastructure with MLR approval workflows, claims management systems, and compliance automation embedded from design. Legacy systems cannot be adapted; new architecture is required.	In Development
Financial Services	Financial institutions need content platforms designed for multi-jurisdiction compliance, disclosure automation, and audit trail requirements. Fragmented systems create unacceptable regulatory risk that only architectural redesign can address.	In Development
Technology and Software	Technology companies scaling rapidly need content infrastructure designed for velocity. Build engagements create composable architectures that support fast iteration and multi-product content operations.	Lumen Case Study

PART 4: TRAINING

Content Supply Chain: Build

Commercial Guidance

The adoption gap problem (143% vs 35% ROI) represents a significant addressable market of organizations with existing platform investments.

Internal pricing slides for each engagement can be found on the following slides.

Key Competitors	Internal IT and "Build It Ourselves" Clients often believe internal technology teams can architect and implement content platforms without external expertise. Without structured transformation methodology, governance frameworks, and cross-functional change management, internal builds typically result in siloed solutions that fail to scale or achieve enterprise adoption.	Platform Vendor Professional Services <i>Adobe Professional Services, Salesforce Services, Sitecore Services??</i> Platform vendors offer implementation services but prioritize their own technology stack over client-optimal architecture. Their services focus on technical deployment rather than the work design, operating model transformation, and adoption planning that determine whether platforms deliver business value. Merkle provides vendor-agnostic strategy with implementation expertise across multiple platforms.
	Global Consulting Firms <i>Accenture Song, Deloitte Digital, IBM iX, Publicis Sapient</i> These firms offer end-to-end transformation with strong strategy and consulting arms, deep Adobe and other platform partnerships, and global delivery capabilities. However, their engagement models often prioritize billable hours over outcomes, creating extended timelines and dependency. Merkle differentiates through marketing-first transformation methodology, faster time to value, and knowledge transfer that builds internal capability.	Systems Integrators <i>Cognizant, Infosys, Wipro, Tech Mahindra</i> SIs compete aggressively on price for platform implementation and technical integration. They excel at configuration and customization but lack the marketing domain expertise, creative production capabilities, and business transformation experience required to design content supply chains that actually get used. Their implementations often require rescue engagements when adoption fails.
Key Alliances	Adobe: Premier partner with 1,300+ certified employees and the most global Adobe product specializations. Build offerings leverage Experience Cloud, Workfront, GenStudio, and AEM for intelligent content platforms. Featured Adobe Content Supply Chain Partner with proven implementations across regulated industries. Other Work Management Partner Platforms: Aprimo (marketing operations and digital asset management), Bynder (digital asset management and creative automation), Monday.com (work management and workflow automation), and Opal (marketing planning and content calendar). These platforms form the foundation of Build engagements depending on client technology landscape. AI and Automation Partners: Gradiant (agentic AI for content supply chain automation), Jasper (enterprise AI content platform), Writer (enterprise generative AI for brand-consistent content), Typeface (enterprise AI content generation), and Canva Enterprise (design automation and brand templates). Build engagements architect AI governance and establish foundations for AI-powered content production across client-preferred platforms. dentsu Creative and Tag: For Build engagements that include content production components, dentsu's global creative network provides production capabilities that can be embedded into platform architecture from day one, enabling seamless transition to Managed Content Production if clients choose outsourced operations.	

Content Supply Chain: Build

Why Merkle

Merkle is uniquely positioned to help our clients thrive and win in the current landscape. Understand how the Merkle story resonates in this context and grab relevant case studies.

OUR STORY: KEY DIFFERENTIATORS

The transformation consultancy that speaks both IT and Marketing.

We deliver the "and," not the "or." Unlike system integrators focused on technical implementation or agencies limited to creative execution, Merkle bridges both to drive business value from content supply chain investments.

Not an SI, not a traditional agency. We're marketers and creative experts first, technologists second. We bring enterprise AI rigor and transformation methodology that agencies cannot match, with the business acumen that SIs lack.

Proven in regulated industries. Deep experience with pharma (Sanofi, Novo Nordisk, Pfizer, J&J, Lilly), financial services, and CPG. Compliance is built into workflows from day one.

Build.Buy.Borrow delivers faster, lower cost. Our accelerators deliver 40 to 50% lower cost and 12 to 18 months faster than pure build. Clients own the IP and build internal capability, not dependency.

Adobe mastery. 1,300+ certifications. #1 partner with the most global Adobe product specializations. Leader in Global Adobe Services PEAK Matrix (Q4 2025).

OUR WORK

Client	Project	Market	Description	Link to case
Lumen	Accelerating Engagement and Growth with a Modern Content Supply Chain	AMER	With the right strategies, data integration, and implementation support, Lumen now has a clear pathway for advanced personalization and industry leadership. They're ready to deliver the seamless, modern experiences B2B buyers now expect, with a solid foundation to innovate for B2B needs of the future.	LINK
Adobe AOR	Drive transformation through an adaptive end-to-end Content Supply Chain Solution	AMER	We integrated Adobe's marketing technology stack to create GenStudio dentsu+, a unified content supply chain solution ecosystem. Uncovering 110 optimization opportunities and proposed an integrated workflow and roadmap to automate and enable scalable personalization.	LINK

PART 4: TRAINING

Content Supply Chain: Build

Sales Guidance

Help selling through the offering, from handling objections to understanding similar/competitive offerings where they exist.

GUIDANCE AND GUIDELINES

CSC Build targets clients planning new platform investments or rescuing failed implementations. The differentiator is our work design and change management approach, not just technology implementation.

Content Supply Chain Strategy Blueprint is the wedge for clients considering transformation. Position as decision enablement that de-risks investment decisions.

Enterprise Transformation requires multi-year commitment and executive sponsorship. Turnaround & Recovery addresses clients with failing initiatives who need immediate stabilization.

Watch for cross-sell: Build clients are strong candidates for Activate once platforms stabilize and require ongoing optimization.

WHAT TO LISTEN FOR

Concerns around content production bottlenecks, inability to scale, or disconnected teams working in siloed systems.

Frustration with failed or stalled platform implementations where investments have not delivered expected outcomes.

Pressure to modernize content operations, reduce production costs, or accelerate time to market.

Client need 1: "We need a content platform strategy but do not know where to start."

Client need 2: "Our implementation failed and we need to figure out what went wrong."

Client need 3: "We cannot scale content production to meet demand."

Client need 4: "Our teams work in disconnected systems with no visibility."

QUALIFYING QUESTIONS

Have you invested in content platforms before, and what was the outcome?

What is driving the urgency for content transformation now?

How many tools and systems are involved in producing a single piece of content?

Do you have executive sponsorship and budget allocated for transformation?

What does your current content production process look like end to end?

Are there compliance or regulatory requirements affecting your content operations?

How do you measure content performance and connect insights to production?

What is your timeline and appetite for a multi-year transformation program?

Are there specific use cases or markets you would want to pilot first?

What happened after your last implementation partner transitioned off?

Do you have internal resources to maintain platforms after implementation?

How do you currently handle content governance and brand compliance?

Levels of Engagement – Definition and Examples

BRONZE – TEAM / COLLABORATIVE

A Bronze engagement focuses on enabling a single team through targeted technology enablement or an Innovation Accelerator. It helps teams work more collaboratively and transparently by activating specific capabilities, improving visibility into work, and validating value quickly within a well-defined scope.

Example: *the Web team needs a central way to manage their work instead of working through email and chat tools for their creative development direction, reviews, approvals, and staging for publication.*

SILVER – ORGANIZATION / CROSS-FUNCTIONAL

A Silver engagement extends enablement across multiple teams or functions to drive alignment and consistency. It focuses on standardizing processes, improving cross-functional collaboration, and establishing lightweight governance to support shared outcomes and operational efficiency.

Example: *a campaign is launching and needs support from advertising, social, media, web, retail, CRM, etc. to uniformly execute on the briefed initiative.*

GOLD – ENTERPRISE / CROSS-ORGANIZATIONAL

A Gold engagement supports enterprise-wide transformation by connecting strategy and execution across business units. It aligns platforms, processes, and governance at scale to maximize enterprise value, improve decision-making, and establish a sustainable foundation for ongoing transformation.

Example: *The business development organization needs input and collaboration with marketing, retail organization, legal compliance, corp comm, and events to support a national Lunar New Year initiative.*

Turnaround & Recovery Pricing

	BRONZE	SILVER	GOLD
When to Use	When rapid triage is needed to stabilize operations, with limited budget or access to client SMEs; single BU or contained scope.	When failures span multiple teams/platforms and you need targeted remediation plus governance reset; moderate budget and active client SMEs.	When the implementation is broadly failing across BUs, with heavy customization and adoption issues; requires full PMO, de-customization, and a path to scale.
Discovery	Rapid diagnostic and stabilization to identify root causes and restore basic operational continuity.	Targeted recovery engagement to stabilize operations, remediate critical gaps, and reset governance.	Comprehensive turnaround program restoring stability, adoption, and scalable foundations for optimization.
Timeframe	2-3 months	4-8 months	9-12 months
Client Engagement	Light-touch; named client SMEs participate in discovery and decision reviews	Active participation from client SMEs across platforms and operations	Dedicated client resources embedded throughout the program
Collaboration	Weekly checkpoints; limited cross-team workshops	Weekly governance, bi-weekly working sessions	Integrated PMO, cross-functional workstreams, executive steering
Deliverables:	• Operational diagnostic and root-cause analysis • Immediate stabilization actions • Risk and gap register • High-level recovery recommendations	• Diagnostic and stabilization • Workflow and configuration remediation • Governance and role reset • Adoption recovery plan • Recovery roadmap	• Full diagnostic and stabilization • Platform and integration remediation • De-customization and debt reduction • Adoption recovery and enablement • Transition-to-optimize roadmap
Resources	Engagement Lead Ops SME Workfront/AEM SME (part-time) Analytics Lead	PMO Lead Platform Leads Ops Designer Change Lead Analytics Lead	Program Director Full PMO Platform & Integration SMEs Change & Enablement Analytics Lead
Cost	\$450K - \$650K	\$ 900K - \$1.3M	\$1.6M - \$2.0M
Warranty/ Postlaunch	30-Day Stabilization Assurance • Post-engagement check-in within 30 days of close • Validation of stabilization actions and remediation outcomes • Advisory support for clarification or minor adjustments • Knowledge transfer of findings, recommendations, and next-step guidance Best for: Ensuring initial fixes hold while the client prepares for a deeper recovery or build engagement.	60-Day Recovery Assurance • Hypercare support for up to 60 days post-launch • Monitoring of stabilized workflows, configurations, and governance processes • Remediation of identified defects or issues related to delivered scope • Limited change requests aligned to agreed recovery objectives • Outcome validation against re-baselined success metrics Best for: Organizations needing confidence that fixes are embedded and operating as intended.	90-Day Optimization-Ready Assurance • Dedicated hypercare support for 90 days post-launch • Ongoing monitoring and tuning of workflows, configurations, and integrations • Active governance and escalation support during transition to steady state • Adoption reinforcement and targeted enablement as needed • Support for transition into Build or Optimize engagement Best for: Enterprises requiring continuity, stability, and a controlled handoff into long-term optimization.

Content Supply Chain: Build

Enterprise Transformation

BRONZE – Foundational Functional Transformation

Essential modernization for a targeted function or business unit, establishing the foundational elements of a content supply chain transformation. This tier focuses on high-level strategy, basic governance, and initial technology enablement, providing clients with quick wins and a solid base for future growth. Engagement is streamlined, with limited stakeholder involvement and a focus on core process improvements that set the stage for broader transformation.

4-6 months

- Committed to 1-3 internal processes
- Weekly check-ins
- Team-level stakeholder involvement in line w/ scope

Core client team only

1. **Program Governance Framework:** Basic PMO structure and governance setup
2. **Vision & Outcomes Definition:** Initial strategy, business case(s), and ROI targets
3. **Current State Assessment:** High-level review of tech stack, workflows, and data
4. **Change Readiness Assessment:** Culture and capacity snapshot
5. **Platform Implementation:** Basic configuration, limited integration and automation
6. **Workflow Orchestration:** Intake and activation process mapping
7. **Reporting Kit Setup:** Basic dashboards and KPI tracking
8. **Post-launch Support:** 2 weeks of remote support, basic reporting

Project Manager | BSA | Architect | Analyst

\$ 300K-\$1.5M

2 weeks post-launch support; basic reporting kit, embedded functional resource optional

SILVER – Expanded Cross-functional Transformation

Expanded transformation across multiple functions and teams, deepening strategy, governance, and technology adoption. This tier introduces integrated workflows, pilot use cases, and structured change management programs, engaging a broader set of stakeholders to drive measurable improvements in efficiency and collaboration. Silver is designed for organizations seeking to connect departments and unlock greater value from their content operations, paving the way for enterprise-wide transformation.

6-12 months

- Committed to up to 5 internal processes
- Bi-weekly meetings
Broader organization-level stakeholder engagement

Cross-functional teams; some vendor coordination

1. **Expanded Governance & PMO:** Enhanced program management and governance models
2. **Comprehensive Strategy & Alignment:** Full vision, outcomes, and executive sponsorship
3. **Market & Client Context Analysis:** Trends, benchmarks, competitive landscape
4. **Value Hypothesis & Business Case:** ROI targets, KPIs, funding model
5. **Current State Assessment:** Detailed review of tech stack, workflows, governance maturity
6. **Target State Blueprint:** Roles, orchestration design, RACI matrix
7. **Integration & Architecture Planning:** Composable design, interoperability
8. **Governance Framework:** Taxonomy, privacy, consent, AI guardrails
9. **Platform Implementation:** Configuration and integration of core systems, automation in data flows and processes
10. **Workflow Orchestration:** Intake, decisioning, activation, measurement
11. **Enablement & Adoption Programs:** Training, change management, playbooks
12. **Pilot Use Cases:** Quick wins to validate hypotheses
13. **Reporting Kit Setup:** Dashboards, KPIs, feedback loops
14. **Performance Tracking:** ROI realization, adoption metrics
15. **Post-launch Optimization:** 1 month of support, reporting dashboards

Program Manager | Project Manager | BSA | Architect | Sr. Analyst

\$ 1M-3M

3 months post launch support and 1 month of monitored optimizations; reporting dashboards; embedded resources optional

GOLD – Comprehensive Global Transformation

Holistic, enterprise-wide transformation of the content supply chain, executed at a global scale. It integrates strategy, technology, data, workflows, and organizational change across all business units, regions, and external partners. The focus is on future-proofing the organization, driving end-to-end strategy innovation, implementation, enablement, AI integration, and enabling continuous optimization.

18-24+ months

- Full inventory of key enterprise level processes
- Weekly steering committee
- Full stakeholder and executive engagement across enterprise organizations

Full org collaboration; vendor integration; PMO-led governance

1. **Dedicated PMO & Governance:** Full program management office, executive steering
2. **Unified Strategy & Implementation:** Holistic strategy, platform implementation, workflow redesign
3. **Market & Client Context Analysis:** Deep-dive trends, competitive landscape, benchmarks
4. **Value Hypothesis & Business Case:** Detailed ROI modeling, KPIs, funding model
5. **Executive Alignment & Governance Setup:** Full exec buy-in, decision rights, steering committee
6. **Change Readiness Assessment:** In-depth culture, capacity, risk posture analysis
7. **Current State Assessment:** Comprehensive review of tech stack, data, workflows, governance maturity
8. **Target State Blueprint:** Roles, orchestration design, RACI, org structure
9. **Integration & Architecture Planning:** Advanced composable design, interoperability, vendor integration
10. **Governance Framework:** Taxonomy, privacy, regulatory considerations, consent, AI guardrails, legal and other compliance
11. **Platform Implementation:** Full configuration, integration, data, identity, content, decisioning, AI engines (symbolic, generative, agentic, ML, DL)
12. **Workflow Orchestration:** End-to-end process mapping, activation, measurement, optimization
13. **Enablement & Adoption Programs:** Training, change management, playbooks, ongoing enablement
14. **Pilot Use Cases:** Multiple pilots, quick wins, hypothesis validation
15. **Reporting Kit Setup:** Executive dashboards, KPIs, feedback loops, success stories, predictive models
16. **Performance Tracking & Optimization:** Continuous improvement cycles, AI tuning, workflow refinement

Program Manager | Project Manager | BSA per practice | Architect per tool | Sr. Analyst

\$3M – \$5M

3+ months post-launch support and optimization, executive reporting, continuous improvement cycles; embedded team optional
