

Pre-AMER Summit Briefing

AMER Salesforce - Objectives of the Summit

#1 - Unified and elevated way of showing up to Salesforce

Everyone leaves with a shared understanding of the AMER targets, growth ambitions, prioritized industries, and the specific GTM focus areas that will define success. Across AMER leadership, we build a unified narrative that explains what we solve, why it matters and where Merkle creates unique value.

#2 - Strong GTM narrative anchored in the Global Offerings and AMER differentiation

The summit clarifies the top five offerings we want to be known for, ensuring AMER shows up to Salesforce with a focused identity rather than a broad catalog. We align on the problems these offerings solve, the use cases we deploy and the outcomes clients can expect, creating a simple and memorable value story in the ecosystem.

#3 - A practical operating model to execute the plan

Day 2 turns strategy into action, giving the team a shared stakeholder plan, rightshoring model, talent readiness approach and commercial motions across OSP, staff augmentation and the core offerings. The summit ends with DRIs, clear action items and a repeatable operating cadence to maintain momentum.

OUR ASKS AHEAD OF AMER SUMMIT

#1 - Provide Feedback on our Positioning & Joint Value Proposition

Our Salesforce Presentation (3/24)

We will provide an updated introduction to Salesforce designed to function as a corporate elevator pitch for presenting Merkle to Salesforce stakeholders. The aim is to eliminate any confusion and ensure Merkle is represented consistently – Once validated we will socialize this deck across CRG Members.

Our Client (Pure-Play) Presentation (3/26)

We frequently receive requests for slides that present our Salesforce Practice and its services. In a comparable but slightly modified manner, we aim to create an introduction tailored to engage client stakeholders and highlight Merkle's expertise as a digital consultancy with strong systems integration capabilities.

We will validate during the Summit our Positioning and clear any confusion across practice/CRG leadership

OUR ASKS AHEAD OF AMER SUMMIT

#2 - Prepare the Working Session on Strategic Plays & Supported Use Cases

Working Session - Groups

The CRG Solution & Alliance team has been establishing a standard method for documenting essential Sales Plays and Supported Use Cases. Our primary goal on Day 1 is to confirm the key Sales Plays we aim to prioritise in AMER and to specify the Supported Use Cases associated with these critical plays.

Future of Advertising

AI For Enterprise

B2B Transformation

AI For CX

E2E Loyalty

JOINT VALUE PROPOSITION
(WE WILL HAVE 1)

STRATEGIC PILLARS
(AIM FOR 3 TO 5)

PRIORITIZED SALES PLAYS
(AIM FOR 5 TO 7)

SUPPORTED USE CASES
(AIM FOR 5 TO 7)

The aim of the working session will be to bring X-Practice contribution to shaping the way we will win with our prioritized plays

OUR ASKS AHEAD OF AMER SUMMIT

Sales Play Example: Owned & Paid Marketing ROI

CORE INDUSTRY PROBLEM

Marketing and Media teams still operate in silos. This creates wasted spend, fragmented customer journeys, and inconsistent personalization across channels. As a result, brands struggle to drive efficient traffic, convert onsite, and sustain loyalty.

MERKLE BRINGS

Merkle combines data, identity, media science and creative to power outcome-focused customer experience management. Our identity solutions unlock first-party driven personalization, while our media and Martech expertise guide the right activation across owned channels and into conversion. This ensures audiences are relevant, experiences are consistent, and ROI improves across the full funnel.

SALESFORCE BRINGS

Salesforce enables enterprises to manage prospecting, engagement and customer lifecycle data in a unified way. Its CRM, Martech and zero-copy integration with Snowflake make it an ideal foundation for real-time data activation. Salesforce connects sales, service, media and marketing signals to create a single system of engagement across the customer journey.

JOINT UNLOCK

Together with Merkle's Merkury solution, brands can activate first-party data with precision and scale. Onsite retargeting becomes purchase-signaled instead of impression-based. When orchestrated with Agentforce, the next best experience becomes revenue productive. Marketing ROI increases and customer lifetime value is optimized.

TOP 5 CLIENT INTENT SIGNALS

- 1 "I need more relevant traffic driven to my site/commerce"
- 2 "I'd like my site to offer the right level of personalization & conversion"
- 3 "I need my Media and Digital team to be more efficient"
- 4 "I wish our Marketing Strategy would truly be multi-channel"
- 5 "We are looking at innovative ways to orchestrate the Next-best-experience"

STARTER USE CASES

1st Party Data Informed Audiences

On-site Personalization & Optimization

NBX – Orchestrated Multi-Channel Experience

OUR ASKS AHEAD OF AMER SUMMIT

Use Case Example: 1st Party Data Informed Audiences

THE PROBLEM

Many enterprise clients struggle to connect their adtech and CRM systems natively due to the fragmented structure of Marketing and Media client organisations and the lack of a combined Media + CXM Agency of Record. As a result, they often create publisher audiences using criteria-based algorithms rather than defining look-alike audiences based on their most valuable clients.

HOW IT WORKS TOGETHER

MERKLE facilitates the development of a comprehensive and integrated data strategy that leverages CRM data to create more effective look-alike audiences. Whether media activation is handled by dentsu or another agency, our team builds a strong infrastructure to attract more relevant visitors to your platforms.

SALESFORCE Data 360, Core CRM, Commerce Cloud, and Marketing form the data backbone, providing access to key consumer attributes essential for audience building. By using Mulesoft and Informatica, we integrate data across enterprise systems, while Snowflake's native zero-copy architecture enhances the use of existing data lake infrastructures.

RESULT: Enhanced look-alike audiences that generate up to 15% more targeted traffic to your site. When combined with second- and third-party data sources, these audiences become significantly more effective in attracting relevant visitors to your business.

APPLICABLE INDUSTRIES: All Industries, with a focus on B2C consumers.

#3 – Ground Game Connections & Execution Plan

Elevating our Ground Game (3/24)

Our AMER Salesforce leadership has established a wide range of connections with Salesforce stakeholders. Some Salesforce members have direct links to nearly 20 individuals within Merkle's leadership. Without a consistent narrative, this could lead to 20 different versions of our strengths and unique qualities, ultimately causing confusion and disengagement.

1. **We want to Clarify who are the Stakeholder we believe will help us succeed this year.**
2. **Accurately report on the state of that relationship and identify who are the primary point of contacts.**
3. **Refine the story we will tell these stakeholders to be relevant to their challenges.**
4. **Measure progress towards creating raving fans with clear accountability and report of progress.**

On Day 2 we want to discuss the key relationships we need to develop to win in AMER and agree how we divide and conquer.
