BUILD THE PLAYS

DECIDE & COMMIT

0:00–0:20

POV

CONTEXT & POV

Market landscape, the 4,100 CPQ renewal window, why B2B Transformation is Merkle's #1 pipeline wedge. Data Cloud + Informatica + Regrello positioning.

0:20–0:45

JVP

JOINT VALUE PROP + 3 STRATEGIC PILLARS

Present the unified JVP and three strategic pillars. Cross-practice alignment discussion. How does this fit the other 4 sub-initiatives?

0:45–1:30

PLAYS

7 PRIORITIZED SALES PLAYS + USE CASES

Walk through each sales play, 3 use cases per play, intent signals, and wedge-to-platform expansion motion. Interactive feedback from each leader.

1:30–2:00

ACT

FEEDBACK, PRIORITIZATION & NEXT STEPS

Rank plays by feasibility/impact. Assign DRIs. Agree on Salesforce AE enablement materials and 90-day execution plan.

WHY B2B TRANSFORMATION NOW

The market signal is unambiguous — and Merkle is uniquely positioned

4,100

Legacy CPQ installs
up for renewal in 2026

\$3.28B

Total addressable pipeline
(full multi-cloud attach)

73%

Of B2B buyers now
prefer self-service

5x

ACV multiplier when
Rev Cloud attaches 4 clouds

THE CONVERGENCE

Salesforce

Revenue Cloud replaces legacy CPQ. Agentforce turns tribal knowledge into AI logic. Data Cloud + Informatica unify the data layer.

Merkle

Built the legacy CPQ environments now up for renewal. 50+ deployments. Rocket 2.0 and AI Order Orchestration accelerators. Merkury identity graph.

Market

B2B buyers demand self-service. CFOs want cost-to-serve reduction. CIOs want platform consolidation. Regrello adds process orchestration.

JOINT VALUE PROPOSITION

Merkle + Salesforce: From Fragmented Revenue Operations to an Intelligent, Unified Commerce Platform

We transform B2B enterprises from disconnected legacy quoting, ordering, and billing systems into a single Salesforce-native revenue platform — powered by Data Cloud, Informatica, Agentforce, and Regrello — that turns every customer interaction into a revenue event. We start with wedge deployments that prove ROI in 90 days and expand into full multi-cloud platform deals.

ALIGNMENT TO AMER SUB-INITIATIVES

Future of Advertising

Merkury-powered audiences from B2B transaction data feed advertising personalization

AI for Enterprise

Agentforce + Regrello process orchestration = AI-native revenue operations

AI for CX

Service Revenue Agents turn every support case into an upsell/cross-sell event

E2E Loyalty

Unified customer data from commerce + service + billing drives retention & expansion

THREE STRATEGIC PILLARS

Each pillar maps to Salesforce clouds, Merkle accelerators, and a clear wedge-to-platform expansion path

01

INTELLIGENT REVENUE ORCHESTRATION

Replace legacy CPQ/billing with Revenue Cloud + Sales Cloud + Service Cloud. Agentforce-native from Day 1. Regrello orchestrates cross-functional approval and fulfillment workflows.

SF CLOUDS

Revenue Cloud • Sales Cloud • Service Cloud • Agentforce • Regrello

WEDGE → PLATFORM

Rocket 2.0 or Rev Cloud Quick Start → Full platform

02

UNIFIED DATA & INTELLIGENCE FOUNDATION

Data Cloud + Informatica create the single source of truth across product, customer, and transaction data. Powers AI agents, drives MDM governance, and unlocks Merkury identity resolution.

SF CLOUDS

Data Cloud • Informatica • Mulesoft • Merkury • Snowflake

WEDGE → PLATFORM

Data Cloud assessment or MDM POC → Enterprise data architecture

03

SELF-SERVICE COMMERCE & MARKETPLACE

B2B self-service via Commerce Cloud + Rocket 2.0. Marketplace strategy via Mirakl. AI Order Orchestration unifies all channels. 73% of B2B buyers demand digital-first purchasing.

SF CLOUDS

Commerce Cloud • Mirakl • Order Orchestration • Marketing Cloud

WEDGE → PLATFORM

Rocket 2.0 in 90 days (\$250K-\$750K) → Marketplace + full commerce

7 PRIORITIZED SALES PLAYS

Wedge-first plays designed to land quick wins and expand into multi-cloud platform deals

#	SALES PLAY	PILLAR	WEDGE DEAL SIZE	EXPAND DEAL SIZE
	 Legacy CPQ Displacement	01	\$350K–\$1M	\$750K–\$2M+
	 Data Cloud + Informatica MDM Foundation	02	\$150K–\$400K	\$500K–\$1.5M
	 B2B Self-Service Commerce (Rocket 2.0)	03	\$250K–\$750K	\$500K–\$1.2M
	 Agentforce Revenue Automation	01	\$200K–\$500K	\$600K–\$1.5M
	 AI Order Orchestration + Regrello	03	\$250K–\$750K	\$500K–\$1.2M
	 Service-to-Revenue Transformation	01	\$200K–\$600K	\$400K–\$1M
	 Marketplace Strategy (Mirakl + Commerce)	03	\$300K–\$800K	\$750K–\$2M+

ADDRESSING THE ELEPHANT

Why Marketing Cloud / Agentforce Marketing Is Not in Our 7 Plays

Our position: Marketing Cloud is not excluded — it's sequenced. It belongs in the **expand** phase of a B2B platform deal, not the **wedge**. No B2B buyer wakes up saying "I need Marketing Cloud." They say "I need to fix quoting" or "I need self-service." We lead with the pain, not the channel.

WHY NOT AS A WEDGE

- 1 Mid-Replatform, Mid-Rebrand**
Salesforce is actively rebuilding Marketing Cloud as "Agentforce Marketing" on Core. Legacy ExactTarget architecture is being replaced by Marketing Cloud Next. Even the ecosystem is confused about what the product is right now.
- 2 B2C-First, B2B-Adjacent**
Marketing Cloud's strength is B2C journey orchestration and mass engagement. B2B marketing automation (Account Engagement / Pardot) is a separate, smaller product with different architecture and buyer.
- 3 Competes for the Same Budget as Data Cloud**
Enterprise CMOs have finite transformation budgets. Marketing Cloud competes with Data Cloud + Informatica for the same dollar. Data Cloud is a better B2B wedge because it powers ALL clouds, not just marketing.
- 4 Not Where B2B Pain Starts**
B2B buyers' #1 pain is quoting, ordering, and billing — not campaign orchestration. Leading with Marketing Cloud in a B2B transformation conversation confuses the value prop and dilutes the revenue story.
- 5 Implementation Risk Is High Right Now**
With Salesforce actively migrating features from Engagement to Next, starting a major Marketing Cloud implementation today carries replatform risk. Better to wait for the architecture to stabilize.

WHERE IT FITS INSTEAD

EXPAND PHASE (MONTH 6+)

Once the data foundation (Data Cloud + Informatica) is in place and revenue operations (Rev Cloud + Sales Cloud) are live, Marketing Cloud becomes a natural layer-on:

- Account-Based Marketing on top of Sales Cloud data
- Journey orchestration powered by Data Cloud segments
- Agentforce Marketing agents for campaign automation
- Merkury identity resolution fueling audience targeting

CROSS-POD HANDOFF

Marketing Cloud lives more naturally in the "Future of Advertising" and "AI for CX" pods. Our B2B Transformation plays create the data and commerce foundation those pods need to activate Marketing Cloud effectively.

TL;DR — We're not anti-Marketing Cloud. We're pro-sequencing. Land with revenue ops, expand with marketing. That's how you sell more Salesforce licenses, not fewer.

PLAY 01 **LEGACY CPQ DISPLACEMENT**

Pillar: Intelligent Revenue Orchestration

THE PROBLEM

4,100 legacy CPQ installs (SAP, Tacton, Conga, Logik, Oracle) are up for renewal. Customers run revenue ops on systems that weren't built for self-service, AI, or modern B2B. Quoting takes days. Orders get stuck. Billing is a patchwork.

MERKLE BRINGS

Built many of these legacy environments. We translate real-world revenue complexity onto Revenue Cloud, wire it to Sales Cloud for reps, connect Service Cloud for post-sale expansion, and architect for Agentforce from Day 1. Rocket 2.0 adds commerce in 90 days.

SALESFORCE BRINGS

Revenue Cloud handles quoting and billing. Sales Cloud is the CRM foundation. Service Cloud turns support into revenue events. Agentforce makes it all intelligent. Data Cloud + Informatica unify the data layer.

CLIENT INTENT SIGNALS

1. "We need to get off SAP/Oracle CPQ"
2. "Our quoting process takes days"
3. "We're evaluating Salesforce to replace Tacton/Conga"
4. "We spend millions maintaining legacy billing"

USE CASES

SAP/Tacton CPQ-to-Revenue Cloud Migration

Full lift-and-shift of legacy catalog, pricing rules, and contract data onto Revenue Cloud with Sales Cloud as the rep workspace. Agentforce Deal Assist replaces tribal knowledge with AI-guided selling.

Unified Quote-to-Cash on Salesforce

Connect quoting (Rev Cloud), CRM (Sales Cloud), post-sale (Service Cloud), and billing in one platform. Informatica governs master data across ERP/tax/payment systems. Regrello orchestrates cross-functional approvals.

Agentforce-Ready CPQ Architecture

Migrate legacy CPQ logic into AI-accessible business rules. Deploy Contract Intelligence for AI extraction of legacy terms. Train Revenue Insights on actual transaction data for predictive pipeline.

WEDGE ENTRY

Rev Cloud Quick Start: \$350K–\$1M, 5–8 months

EXPAND TO PLATFORM

Full multi-cloud: \$750K–\$2M+, 6–12 months
(Rev + Sales + Service + Commerce + Agentforce)

PLAY 02 DATA CLOUD + INFORMATICA MDM FOUNDATION

Pillar: Unified Data & Intelligence Foundation

THE PROBLEM

B2B enterprises have product, customer, and transaction data scattered across ERPs, legacy CRM, spreadsheets, and data lakes. No single source of truth. AI agents can't function without clean, governed data. MDM is the prerequisite for every other play.

MERKLE BRINGS

Deep Informatica partnership and implementation expertise. Data governance frameworks across manufacturing, healthcare, and distribution. Merkury identity resolution bridges online/offline customer data. Built data strategies for Baxter, MilliporeSigma, Cardinal Health.

SALESFORCE BRINGS

Data Cloud provides zero-copy integration with Snowflake and native connection to every Salesforce cloud. Informatica IDMC handles enterprise MDM, data quality, and catalog management. Together they create the data backbone for Agentforce intelligence.

CLIENT INTENT SIGNALS

1. "Our data is everywhere and nowhere"
2. "We can't trust our product data across channels"
3. "AI initiatives keep stalling on data quality"
4. "We need a single view of the customer for our sales team"

USE CASES

Enterprise MDM + Data Cloud Unification

Deploy Informatica IDMC for master data management across product, customer, and supplier domains. Connect to Data Cloud for real-time harmonization. Enables Agentforce to access clean, governed data for every AI action.

Product Information Management (PIM) for Commerce

Centralize product data governance with Informatica and syndicate to Commerce Cloud, Revenue Cloud, and partner channels. Powers accurate quoting, self-service catalog, and marketplace listings. InRiver integration where applicable.

Customer 360 Data Foundation for AI

Unify CRM, transaction, service, and behavioral data in Data Cloud. Apply Merkury identity resolution for cross-channel customer recognition. Create the governed data layer that makes Agentforce Sales Coach, Deal Scoring, and Service Revenue Agent actually intelligent.

WEDGE ENTRY

Data Cloud Assessment + MDM POC: \$150K–\$400K, 2–3 months

EXPAND TO PLATFORM

Enterprise Data Architecture: \$500K–\$1.5M
(Data Cloud + Informatica + Mulesoft + Merkury)

PLAY 03 B2B SELF-SERVICE COMMERCE (ROCKET 2.0)

Pillar: Self-Service Commerce & Marketplace

THE PROBLEM

73% of B2B buyers prefer self-service, but most manufacturers and distributors still require phone/email/fax ordering. Reps waste 40%+ of time on routine reorders. No connection between the storefront and Sales Cloud pipeline.

MERKLE BRINGS

Rocket 2.0 — our proprietary B2B self-service accelerator — deploys on Sales Cloud Lightning in ~3 months. 30+ manufacturers deployed. Extends Sales Cloud accounts directly into a B2B storefront. Pre-configured for complex pricing, account hierarchies, and contract terms.

SALESFORCE BRINGS

Commerce Cloud provides the self-service foundation. Sales Cloud connects assisted and self-service channels into unified pipeline. Agentforce Buyer Assistant adds conversational commerce. Data Cloud personalizes the storefront experience.

CLIENT INTENT SIGNALS

1. "Our dealers/buyers want to self-serve"
2. "Reps spend too much time on routine reorders"
3. "Self-service and assisted selling don't connect"
4. "We need commerce without replacing our CRM"

USE CASES

Rocket 2.0 B2B Storefront Deployment

Deploy Rocket 2.0 on Sales Cloud in ~90 days. Self-service ordering, reorder automation, account-specific pricing. Frees 40% sales capacity for high-value pursuits. Commerce data feeds back into Sales Cloud pipeline view.

Dealer/Distributor Self-Service Portal

Extend Sales Cloud accounts into dealer-facing portal with real-time inventory, contract pricing, and order tracking. Service Cloud handles post-purchase support. Agentforce recommends reorders based on purchase history.

B2B + B2C Unified Commerce Platform

Bridge wholesale and direct-to-consumer on one Salesforce platform. Revenue Cloud manages subscription and usage billing. Marketing Cloud drives engagement. Data Cloud unifies buyer behavior across channels.

WEDGE ENTRY

Rocket 2.0 Quick Start: \$250K–\$750K, ~3 months

EXPAND TO PLATFORM

Full Commerce + Rev Cloud + Agentforce: \$500K–\$1.2M

PLAY 04 AGENTFORCE REVENUE AUTOMATION

Pillar: Intelligent Revenue Orchestration

THE PROBLEM

Sales teams lack AI guidance during complex B2B selling cycles. Manual deal scoring, pricing decisions, and contract analysis waste cycles and leave revenue on the table. Agentforce is Salesforce's top strategic priority but requires real business logic — not demo data.

MERKLE BRINGS

We build Agentforce-ready architecture as the default on every engagement. Legacy CPQ migration turns tribal knowledge into AI-accessible business rules. Our team has deployed Sales Coach, Deal Assist, and Contract Intelligence across manufacturing and distribution accounts.

SALESFORCE BRINGS

Agentforce is Salesforce's flagship AI platform. Sales Coach guides reps. Deal Assist provides pricing/discount intelligence. Contract Intelligence extracts terms from legacy agreements. Revenue Insights delivers predictive pipeline analytics.

CLIENT INTENT SIGNALS

1. "We're investing in Salesforce AI but need real use cases"
2. "Our reps don't trust deal scoring — it's not trained on our data"
3. "Contract renewals keep falling through the cracks"
4. "We want AI-guided selling, not just chatbots"

USE CASES

Agentforce Sales Coach + Deal Assist Deployment

Deploy Sales Coach for guided selling flows and Deal Assist for AI-powered pricing/discount recommendations directly in Sales Cloud. Train on actual transaction data from Revenue Cloud. Reps get real-time AI guidance during every deal.

Contract Intelligence + Renewal Automation

Use Agentforce Contract Intelligence to extract terms, obligations, and renewal dates from legacy contracts. Automate renewal workflows via Regrello process orchestration. Service Cloud health scores trigger proactive retention plays.

Predictive Pipeline + Dynamic Pricing

Deploy Revenue Insights trained on transaction data for predictive deal scoring. Agentforce dynamically adjusts pricing based on account history, competitive signals, and margin targets. Data Cloud provides the unified data layer.

WEDGE ENTRY

Agentforce POC (2 agents): \$200K–\$500K, 2–4 months

EXPAND TO PLATFORM

Enterprise Agentforce + Rev Cloud + Data Cloud: \$600K–\$1.5M

DISCUSSION: Does this resonate with accounts in your pipeline? What's missing?

PLAY 05 AI ORDER ORCHESTRATION + REGRELLO

Pillar: Self-Service Commerce & Marketplace

THE PROBLEM

Orders arrive via email, fax, EDI, and web — each in different formats. Manual entry creates errors, delays, and cost. No single system of truth for order status. Cross-functional workflows (credit checks, compliance, fulfillment) are manual and disconnected.

MERKLE BRINGS

AI Order Orchestration — our proprietary accelerator — uses ML to auto-structure orders from any channel. 20+ enterprises deployed. 60–70% reduction in manual entry. Feeds clean data into Revenue Cloud billing and Service Cloud for order support.

SALESFORCE BRINGS

OMS + Revenue Cloud billing create the transaction backbone. Service Cloud provides order visibility and support. Agentforce Order Orchestration Agent handles splitting, routing, and exceptions. Data Cloud connects order signals to the customer record.

CLIENT INTENT SIGNALS

1. "Orders come in from everywhere and get stuck"
2. "Manual order entry costs us millions"
3. "We need to connect commerce orders to billing"
4. "Cross-functional approval processes are email-based and broken"

USE CASES

AI Order Ingestion + OMS Deployment

Deploy AI Order Orchestration to auto-ingest orders from all channels (email, fax, EDI, web). ML structures unstructured orders into clean Salesforce records. Revenue Cloud billing receives accurate data. Service Cloud provides real-time order status.

Regrello Process Orchestration for Complex Fulfillment

Layer Regrello on top of Salesforce OMS for cross-functional workflow orchestration — credit checks, compliance approvals, multi-warehouse routing, exception handling. Replaces manual email chains with governed, trackable processes.

Multi-Channel Order Unification

Unify order streams from Commerce Cloud self-service, Sales Cloud rep-assisted, EDI, and marketplace channels into one OMS. Agentforce handles exceptions. Data Cloud creates a single order history per account across all channels.

WEDGE ENTRY

Order Orchestration Quick Start: \$250K–\$750K, 3–6 months

EXPAND TO PLATFORM

Full OMS + Regrello + Rev Cloud Billing: \$500K–\$1.2M

DISCUSSION: Does this resonate with accounts in your pipeline? What's missing?

PLAY 06 SERVICE-TO-REV TRANSFORMATION

Pillar: Intelligent Revenue Orchestration

THE PROBLEM

Most B2B companies treat service as a cost center. Service agents can't see what a customer bought, what they're paying, or when contracts renew. Every support interaction is a missed revenue opportunity. Renewals managed in spreadsheets fall through the cracks.

MERKLE BRINGS

We connect Service Cloud to Revenue Cloud so every case becomes a revenue event. Our Service Revenue Agent implementation identifies upsell/cross-sell moments during case resolution and auto-generates amendment quotes. Deployed across healthcare, manufacturing, and distribution.

SALESFORCE BRINGS

Service Cloud is the agent workspace. Revenue Cloud provides the billing and contract context. Agentforce Service Revenue Agent identifies expansion opportunities in real time. Data Cloud connects service interactions to the full customer revenue lifecycle.

CLIENT INTENT SIGNALS

1. "Service has no visibility into what customers bought"
2. "Renewals are falling through the cracks"
3. "We want service to generate revenue, not just cost"
4. "Support agents should be able to trigger upsells"

USE CASES

Service Revenue Agent Deployment

Deploy Agentforce Service Revenue Agent that identifies upsell/cross-sell opportunities during case resolution. Agent sees full order history from Revenue Cloud, auto-generates amendment quotes, and routes to sales. Service cases become revenue events.

Renewal Management + Churn Prevention

Connect service health scores to Revenue Cloud renewal management. Agentforce triggers proactive retention plays when health scores drop. Automate renewal workflows. Regrello orchestrates cross-team renewal processes.

Full Service-to-Revenue Loop

Service Cloud connected to Revenue Cloud billing, Sales Cloud pipeline, and Data Cloud customer 360. Every service interaction feeds the revenue engine. Service agents see the complete customer context — orders, billing, contracts, and expansion opportunities.

WEDGE ENTRY

Service Cloud + Rev Cloud Integration: \$200K–\$600K, 3–5 months

EXPAND TO PLATFORM

Full Service Revenue Transformation: \$400K–\$1M

PLAY 07 MARKETPLACE STRATEGY

Pillar: Self-Service Commerce & Marketplace

THE PROBLEM

B2B enterprises need to expand product assortment without inventory risk. Marketplace models are proven in B2C (Amazon, Walmart) but complex in B2B due to negotiated pricing, approval workflows, and ERP integration. Most companies don't know where to start.

MERKLE BRINGS

Mirakl Partner Advisory Board seat. Led marketplace strategy and implementations for Ulta Beauty, Saks, Dick's Sporting Goods, Avantor, MilliporeSigma, and Satair/Airbus. Deep expertise in B2B marketplace economics, seller onboarding, and catalog integration.

SALESFORCE BRINGS

Commerce Cloud provides the storefront. Mirakl Catalog Manager (MCM) governs product data. Revenue Cloud handles marketplace billing and seller payouts. Data Cloud connects marketplace behavior to the customer 360. Agentforce automates seller onboarding.

CLIENT INTENT SIGNALS

1. "We want to expand assortment without inventory risk"
2. "Our competitors are launching marketplaces"
3. "Seller onboarding takes weeks of paperwork"
4. "We need a marketplace strategy but don't know where to start"

USE CASES

B2B Marketplace Launch (Mirakl + Commerce Cloud)

Launch a B2B marketplace on Mirakl integrated with Commerce Cloud storefront. Automated seller onboarding via Sales Cloud. Revenue Cloud manages marketplace billing and seller commission payouts. Expands catalog 10x without inventory risk.

Mirakl Catalog Manager (MCM) for Product Governance

Deploy MCM for centralized product data governance across marketplace and first-party catalog. Integrates with Informatica for enterprise MDM. Powers accurate search, quoting, and compliance across all channels.

Marketplace-to-Platform Expansion

Use marketplace as the entry point to full Salesforce platform. Marketplace seller data feeds Sales Cloud for partner management. Order data flows to Revenue Cloud billing. Service Cloud supports marketplace buyers and sellers. Data Cloud unifies all marketplace signals.

WEDGE ENTRY

Marketplace Discovery + MCM POC: \$300K–\$800K, 3–5 months

EXPAND TO PLATFORM

Full Marketplace + Commerce + Rev Cloud: \$750K–\$2M+

THE WEDGE-TO-PLATFORM MODEL

Every play starts small and pulls more Salesforce clouds — and more licenses — into the deal

WEDGE (0–90 Days) Quick-win entry point \$150K–\$800K 1–2 clouds	PROVE (90–180 Days) Demonstrate ROI Add 1–2 more clouds Agentforce foundation	EXPAND (6–12 Months) Multi-cloud platform \$750K–\$2M+ ACV 4–5 clouds + AI	OPTIMIZE (12+ Months) Full revenue engine Continuous expansion Autonomous agents
--	---	--	--

SALESFORCE LICENSE MULTIPLIER MATH

Rev Cloud Only	\$150K–\$300K	1 cloud
Rev Cloud + Sales + Service	\$400K–\$800K	3 clouds
Rev + Sales + Service + Commerce + Agentforce	\$600K–\$1.2M+	5 clouds
Full Platform + Data Cloud + Informatica + Regrello	\$1M–\$2M+	7+ products

THE DATA & PROCESS LAYER

Data Cloud + Informatica + Regrello: The intelligence backbone across all 7 plays

DATA CLOUD

Zero-copy integration with Snowflake. Native connection to every Salesforce cloud. Real-time data harmonization. Powers Agentforce intelligence. Customer 360 without data movement.

The unified data fabric that connects every cloud and every play

INFORMATICA

Enterprise MDM across product, customer, and supplier domains. Data quality and governance. Catalog management. Mulesoft integration. The enterprise-grade data governance layer Salesforce doesn't natively provide.

The MDM and governance layer that makes enterprise data trustworthy

REGRELLO

Cross-functional process orchestration for complex B2B workflows. Approval chains, compliance checks, multi-party coordination. Replaces email-based processes with governed, trackable workflows layered on top of Salesforce.

The workflow engine for complex B2B processes Salesforce Flow can't handle

QUESTIONS FOR THE ROOM

Pete

Which plays need the deepest data foundation? Where does Informatica unlock the most value?

Wayman

Which plays align to our biggest existing accounts? Where are the fastest paths to revenue attribution?

Scott

How do PIM/content requirements change by play? Where does inRiver or MCM fit?

Mark

Which wedge plays can your AEs sell today? What enablement do they need?

NEXT STEPS & 90-DAY PLAN

THIS WEEK

Finalize play prioritization based on today's feedback. Confirm DRIs for each play. Distribute materials to broader AMER Salesforce leadership.

WEEKS 2–4

Build Salesforce AE enablement one-pagers for top 3 plays. Schedule Salesforce AE coaching sessions (Brent Richey pipeline). Create intent-signal cheat sheets for field sellers.

WEEKS 5–8

Launch first wedge engagements on top-priority accounts. Data Cloud + Informatica MDM discovery on 2–3 target accounts. Regrello process orchestration pilot identification.

WEEKS 9–12

Measure wedge-to-expand conversion. Report to AMER leadership on pipeline contribution. Refine plays based on market feedback. Present at next quarterly review.
